[SRRA]: Administrative Guidance Regarding Compliance with Remedial Action Report Timeframes Now Available

The New Jersey Department of Environmental Protection, Site Remediation and Waste Management Program announces the availability of a new administrative guidance, "Administrative Guidance Regarding Compliance with Remedial Action Report Timeframes."

With the increase in the number of sites completing remedial investigations, the Department expects in the next few years that there will be an increase in the number of sites submitting remedial action reports that document either (a) achievement of the applicable remediation standards or (b) progression of the remediation such that the Department can issue a remedial action permit. In addition, the Department expects that there also may be an increase in requests for timeframe extensions for the submission of the remedial action report. The Department has prepared the referenced administrative guidance that describes the expectations for the remedial action report and applicable timeframes, and provides tips for justifying an extension for a remedial action report. Please find this guidance at www.nj.gov/dep/srp/guidance/#top_admin.
