[SRRA]: LSRP Case Study Training - the Next Generation! - Rutgers, New Brunswick

Registration has opened for the LSRP Case Study Training - the Next Generation!, to be held on Wednesday, October 24, 2018, from 8:30 AM to 3:30 PM (check in time 8:00 AM), at Rutgers University in New Brunswick.

This interactive one-day workshop has been updated and redesigned to offer the latest information on remediating contaminated sites, with a smaller class size to allow for increased student interaction and participation. The program will use an invented case study that includes various areas of concern and site conditions to demonstrate how LSRPs can approach the technical aspects of investigation and remediation activities at contaminated sites in New Jersey. The examples come from real-life site remediation cases.

Note: The Site Remediation Professional Licensing Board encourages anyone interested in taking the licensing examination to take this pre-requisite course now, as the frequency of the course and exam could change. As a reminder, the course must be completed no more than three years prior to the submission of the application to sit for the licensing exam.

** This course will satisfy the pre-requisite course requirement in order to take the LSRP Licensing Exam OR will qualify for 6 CECs. It will not count for both. **

Register at www.cpe.rutgers.edu/courses/current/en0520ca.html.
