[SRRA]: Summary of existing guidance regarding Ground Water Remedial Action Permit Applications - vertical delineation of ground water contamination and monitored natural attenuation proposals

The New Jersey Department of Environmental Protection (NJDEP) has posted a new document to assist the PRCR in ensuring vertical delineation of the contaminant plume is complete, and that the MNA GWRAP Application is complete prior to submission. This document is available on the SRP Guidance Library ([www.nj.gov/dep/srp/guidance/#rap\\_gw](http://www.nj.gov/dep/srp/guidance/#rap_gw)), under "Remedial Action Permit for Ground Water."
