[EXTERNAL]: A New Site Remediation DataMiner Report: Case Inventory Document and Associated Areas of Concerns

The New Jersey Department of Environmental Protection (NJDEP) has created and posted a new DataMiner Report called Case Inventory Document and Associated Areas of Concerns. This report summarizes the Areas of Concern (AOC) uploaded to a case and makes the Case Inventory Document (CID) available as a downloadable document. This report also provides a list of Registered USTs associated with the CID. The CID provides key information about a site and this report will provide that information in a timely fashion without the need for the Office of Record Access. This report is now available in DataMiner under the Site Remediation, Case Tracking Category. https://www13.state.nj.us/DataMiner/.

Questions regarding this revised form should be directed to the Bureau of Information Systems at 609-292-9418.
