[EXTERNAL]: Site Remediation and Waste Management Program's Updates to the Case Inventory Document (CID) Training: Webinar Registration is Closed

The New Jersey Department of Environmental Protection's (NJDEP) Site Remediation and Waste Management Program (SRWMP) announced a detailed training on the updates to the Case Inventory Document (CID). Due to the overwhelming response, the registration for the virtual training is now closed.

As stated in the January 25, 2021 Listserv, the maximum number of individual participants supported by GoToWebinar for this training is 500. The maximum number of participants has been exceeded and registration has ended.

Historically, the Department's data indicates that approximately 75% of the attendees that have registered for a training event, attend the training event. Therefore, the Department anticipates that all registrants who want to, will be able to participate in the upcoming training. On the morning of the upcoming training, please log on as early as possible after 8:30 AM to ensure a spot in the webinar.

The presentation will be posted on the Site Remediation Program's Training page within a few days after the training for the individuals who were unable to attend (www.nj.gov/dep/srp/srra/training/).

Celebrating its 50th anniversary in 2020, the New Jersey Department of Environmental Protection is dedicated to protecting New Jersey's environment and public health. The agency prioritizes addressing climate change, protecting New Jersey's water, revitalizing its communities and managing and promoting its natural and historic resources.
