[EXTERNAL]: Policy statement updated - need for LSRPs and SSEs to have an A-901 license at site remediation sites

In consideration of P.L. 2019, c. 397, often referred to as the "Dirty Dirt law," enacted January 21, 2020, the New Jersey Department of Environmental Protection has updated its existing Policy Statement: Licensed Site Remediation Professionals and Certified Subsurface Evaluators Do Not Need to Have an A-901 License When Overseeing Remediation (available at https://www.nj.gov/dep/srp/guidance/archive/).

This updated policy further clarifies the situations when Licensed Site Remediation Professionals and Certified Subsurface Evaluators do not need to have an A-901 license and or Certificate of Public Convenience and Necessity (CPCN) when overseeing remediation, as well as those situations when an A-901 license is required.

The updated policy is available at www.nj.gov/dep/srp/guidance/.

Celebrating its 50th anniversary in 2020, the New Jersey Department of Environmental Protection is dedicated to protecting New Jersey's environment and public health. The agency prioritizes addressing climate change, protecting New Jersey's water, revitalizing its communities and managing and promoting its natural and historic resources.

For the most recent information about the DEP, follow its Twitter feed at @NewJerseyDEP or visit www.nj.gov/dep.
