Subject [EXTERNAL]: Revised Response Action Outcome Guidance Document (Version 3.1) Available

[EXTERNAL]: Revised Response Action Outcome Guidance Document (Version 3.1) Available

The New Jersey Department of Environmental Protection (Department) has updated two sections of the Response Action Outcome Guidance Document and posted a new version (Version 3.1 November 2021).

In Section V.A.2.a (Response Action Outcome Variations, Limited Restricted Use RAO), the bullet referring to impact to ground water soil screening levels (IGWSSLs) and migration to ground water soil remediation standards (MGWSRs) has been removed, as this language is not applicable to limited restricted use RAOs.

Section VI. (Issuing RAOs Involving Ground Water Remedies and Coordination with Remedial Action Permits) has been updated in its entirety, and references to technical impracticability have been removed.

Additional information regarding these changes can be found in the Change Log at <https://www.nj.gov/dep/srp/guidance/>.

Version 3.1 of the Response Action Outcome Guidance Document should be used immediately.

Celebrating its 50th anniversary in 2020, the New Jersey Department of Environmental Protection is dedicated to protecting New Jersey's environment and public health. The agency prioritizes addressing climate change, protecting New Jersey's water, revitalizing its communities and managing and promoting its natural and historic resources.
