Date & Time: 2/3/2022 11:05:00 AM
Subject [EXTERNAL]: Site Remediation and Waste Management Program's Updates to the Fill Material Guidance for SRP Sites and Updates to the Historically Applied Pesticides Guidance Training

[EXTERNAL]: Site Remediation and Waste Management Program's Updates to the Fill Material Guidance for SRP Sites and Updates to the Historically Applied Pesticides Guidance Training

The New Jersey Department of Environmental Protection's (NJDEP's) Site Remediation and Waste Management Program (SRWMP) will be providing training on the updates to both the Fill Material Guidance for SRP Sites and Historically Applied Pesticides (HAP) Technical Guidances. The virtual training will be held on Wednesday, March 9, 2022, from 9:00 am to 12:00 pm via GotoWebinar (see registration information below).

Fill Material Guidance for SRP Sites:

The Fill Guidance has been revised (October 2021, Version 4.0) and was made available on the NJDEP/SRP Web Page. This training session will highlight the requirements of the written pre-approval criteria that were published in the August 2018 amendments to the Technical Requirements for Site Remediation for both off-site and on-site use of alternative fill material. Additional topics will include a detailed description of the pre-approval process, sampling of the receiving site and donor material, material considerations (PCBs, recycled concrete-Beneficial Use Determinations, asphalt millings, etc.), and the "essential elements" of a Fill Use Plan.

Historically Applied Pesticide Technical Guidance:

The revised Historically Applied Pesticide (HAP) Technical Guidance, Version 3.1 was posted February 2, 2022. The training session will include a brief overview on HAP and the changes in the guidance document which were made to be consistent with the Department's Remediation Standards Rule and the Response Action Outcome RAO Guidance document.

The presentation is being delivered remotely and will only be available virtually. **NO in-person option for this training is offered at this time.** The maximum number of individual participants supported by GoToWebinar for this training is 500. Please do not wait to register if you are interested in attending. As the capacity for this platform does not exceed 500 participants, additional slots cannot be made available.

Presenters:

Fill Material Guidance for SRP Sites:

Greg Neumann, Co-Chair, NJDEP-Bureau of Environmental Evaluation and Risk Assessment
Rodger Ferguson, Co-Chair, LSRP, PennJersey Environmental Consulting
Anthony Fontana, NJDEP-Bureau of Solid Waste Permitting
Amanda Gettelfinger, NJDEP-Bureau of Environmental Evaluation and Risk Assessment
Brian Montag, K & L Gates LLP
Myla Ramirez, NJDEP-Bureau of Environmental Evaluation and Risk Assessment
Neil Rivers, LSRP, Langan Engineering & Environmental Services

Historically Applied Pesticide Technical Guidance:

Lynne Mitchell, Chair, NJDEP-Remediation Review Element
Ray Strassler, NJDEP-Bureau of Inspection and Review

To Register for the Webinar:

Please register for the New Jersey Geo-Web Site Remediation Profile Training on Wednesday, March 9, 2022, at 9:00 am at:

Registration URL

<https://attendee.gotowebinar.com/register/4440981760697478924>

Webinar ID

After registering, you will receive a confirmation email containing information about joining the webinar. **You will be able to join the webinar starting at 8:45 am on March 9, 2022.**

Continuing Education Credits (CECs):

The NJDEP has applied to the Site Remediation Professional Licensing Board (SRPLB) for 2.0 Technical Credits and 0.5 Regulatory Credits for this course. Once the CECs are approved, certificates will be made available via an email link to those participants who have requested to receive CECs and meet the requirements. Credits also may be applicable to NJ PE licenses, PE licenses from other states, and PG licenses from other states; please verify the requirements that apply to your licenses.

The List of Board-Approved Continuing Education Programs is Available at:

www.nj.gov/lsrpboard/board/education/approved_continuing_education_courses_all_dates.pdf.

After the course, the Licensed Site Remediation Professional Association (LSRPA) will provide eligible attendees detailed instructions via email regarding how to obtain a CEC certificate.

Presentation Materials:

The slides and resulting audio will be posted on the DEP training web page (www.nj.gov/dep/srp/srra/training/) after the presentation for future reference.

The New Jersey Department of Environmental Protection is dedicated to protecting New Jersey's environment and public health. The agency prioritizes addressing climate change, protecting New Jersey's water, revitalizing its communities and managing and promoting its natural and historic resources.
