

Contaminated Site Remediation & Redevelopment

From NJ Department of Environmental Protection
To NJDEP@public.govdelivery.com
Date & Time 7/31/2024 1:47 PM
Subject EJMAP Update

On July 29, 2024, the New Jersey Department of Environmental Protection refreshed EJMAP with new stressor data made publicly available since its release on January 31, 2024. Any permit application, except any authorization or approval necessary to perform a remediation, as defined pursuant to section 23 of P.L.1993, c.139 (C.58:10B-1), submitted on or after July 31, 2024 must use the new stressor data layer for analysis. The tool will default to that revised layer. Previous stressor layers remain as archived layers within the tool with its own button for those permit applications received within previous date ranges. A summary addendum explaining which stressors were updated and other changes are posted on the Office of Environmental Justice (OEJ) website: <https://dep.nj.gov/ej/>. Information on which data sets were used is included within an update to the EJMAP Technical Guidance, also available on the OEJ website.

The New Jersey Department of Environmental Protection is dedicated to protecting New Jersey's environment and public health. The agency prioritizes addressing climate change, protecting New Jersey's water, revitalizing its communities and managing and promoting its natural and historic resources.
