

## Contaminated Site Remediation & Redevelopment

**From** NJ Department of Environmental Protection  
**To** NJDEP@public.govdelivery.com  
**Date & Time** 8/21/2024 12:32 PM  
**Subject** Updated Technical Guidance for the Attainment of Remediation Standards and Site-Specific Criteria now available!

Contaminated Site Remediation & Redevelopment (CSRR) is pleased to announce that the Technical Guidance for the Attainment of Remediation Standards and Site-Specific Criteria has been revised from Version 2.0 to Version 3.0. This guidance was developed to aid the investigator with demonstrating compliance with the applicable remediation standards when conducting a remedial action pursuant to N.J.A.C. 7.26E. Significant revisions include new sections on addressing historic fill and the development of functional areas in conjunction with an alternate remediation standard, a consistent approach to addressing non-detect values in data sets where compliance averaging is applied, and a new appendix that describes the data deliverables to accompany reports where compliance averaging is selected as a remedial action. For a list of changes, please see the corresponding change log.

The updated technical guidance document and change log can be found on the CSRR Guidance Library: <https://dep.nj.gov/srp/guidance/>. The previous version of this technical guidance can be found on the CSRR Guidance Library Archive: <https://dep.nj.gov/srp/guidance/guidance-archive/>.

Training on the updates to the Technical Guidance for the Attainment of Remediation Standards and Site-Specific Criteria will be provided on September 17, 2024.
