

Change Log for LSRP Supplemental Certification for
Initial Soil Remedial Action Permit (RAP) Application

List of significant changes from Version 1.0 (1/31/24) to Version 1.1 (2/9/24)

Header:

- Changed “The pending Soil RAP Application has been deemed administratively complete by the Bureau of Case Assignment and Initial Notice (BCAIN).” to:

“The pending Soil RAP Application has no outstanding administrative issues; this can be verified in the DataMiner report (Pending Permit Progress Report by Program Interest ID) if the End Administrative Review task has a complete date.”

- Changed “six (6)” to “five (5)” statements.
- Removed No Alternative Remediation Standard (ARS) was developed or used for the area(s) of concern associated with the Soil RAP Application, or an ARS was developed with Department pre-approval (please attach the pre-approval letter).

Section B:

- Added an ARS sub-section.
- Added a check box for “No non-historic fill material present” under the “Delineation for non-historic fill material – check one” sub-section.
- Changed “applicable” to “promulgated numeric” SRS under the “Delineation for non-historic fill material – check one” sub-section.
- Added a check box for “Historic fill material is not being addressed for the area(s) of concern associated with this Soil RAP Application” under the “Historic Fill material – check one” sub-section.
- Added a check box for “Historic fill is the only area of concern being addressed with this Soil RAP Application” under the “MGW Exposure Pathway – check at least one” sub-section.
