

# GREENING YOUR CAMPUS

Take note of how you can achieve sustainability on your campus.

## GREEN SPACES

Sprucing up the campus environment to include native plant meadows and community gardens can have a positive mental health impact, invites native pollinators and can engage students.

BONNER STUDENTS CARING FOR TCNJ'S COMMUNITY GARDEN

## GREEN BUILDING

Buildings on campus can be built or retrofitted with resource efficient appliances and designed to save on utilities such as water, gas and electricity.

MAC MAHON HALL,  
SAINT PETER'S UNIVERSITY,  
JERSEY CITY - LEED SILVER

## ACCESSIBLE RECREATION

Spaces on campus can be made to provide engagement for students. Spaces can be made to be either educational outdoor or indoor exhibits or health-focused installations made to be used by campus-goers.

TCNJ'S PUBLIC OUTDOOR GYM

## WASTE MANAGEMENT

Taking efforts to improve recycling rates through education, adding accepted materials, or increasing availability of waste sorting bins can help encourage material reuse and limit the amount sent to landfill.
