

Holiday Sustainability Tips

Green up your holidays with these simple sustainability tips.

In your home

Use LED holiday lights for decorating.
Lower your thermostat and put on a holiday sweater.

Gift giving

Consider home improvement gifts that save energy and water like LED lights, programmable thermostats or low-flow faucets.

Give experience gifts or the gift of your time instead of material items.

Holiday Travel

Check the air pressure in your tires before heading to holiday celebrations to ensure maximum fuel efficiency.

Christmas Trees

If you will be purchasing a live Christmas tree, consider one that can be planted in your yard after the holidays.
