CHANJ

Monitoring

RECONYX Mapview Professional Software

Data are collected from our camera locations on a monthly basis, then manually processed by interns to be evaluated and tracked.

Wildlife Fencing & Crossings

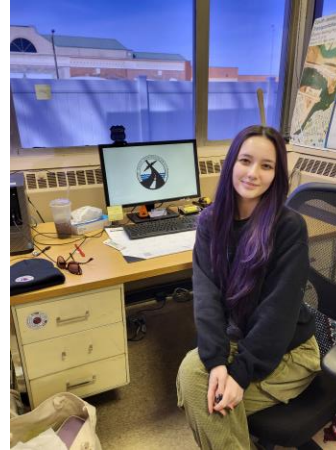

SJTA Maintenance Staff Assistance with Safety Protection

Clearing of weeds from camera field and crossing area. Authority continues to maintain new pathways. Maintenance of **gabion baskets** to ensure proper standard for data collection.

Stockton University

Stockton University and SJTA have developed an **Environmental Internship Program** initiated by Director of Operations, James Sullivan, and Professor Dr. Daniel Moscovici. Students apply for the credited position and assist the authority in managing its environmental program by bringing current research and best practices.
