## ***MCL Recommendation for 1,2,3-Trichloropropane***

- Public comments on draft Subcommittee reports are identical to those submitted in response to the Request for Public Input in September 2015.
- No revisions to the draft Subcommittee reports were needed, since these comments were considered in development of the drafts.
- Subcommittee report recommendations are:
  - *Health Effects Subcommittee*: Health-based MCL - **0.0005 µg/L (0.5 ng/L)**
  - *Testing Subcommittee*: Practical Quantitation Level - **0.03 µg/L (30 ng/L)**
  - *Treatment Subcommittee*: **“...can be reliably and feasibly removed by carefully designed GAC treatment below the recommended PQL of 30 ng/L.”**
- The DWQI will therefore vote on an MCL recommendation of **0.03 µg/L (30 ng/L)** for 1,2,3-trichloropropane.
