

Affordability Criteria Proposed Changes for SFY26

The Department is proposing changes to the Affordability Criteria as a part of the SFY26 Drinking Water and Clean Water Intended Use Plans. The changes include updating the source data and changing the Affordability Criteria threshold for eligible projects. A stakeholder session will be held December 20, 2024, to discuss the amendments. The comment period for the Affordability Criteria will end on December 27, 2024, and the Proposed Intended Use Plans will be subject to an additional public hearing and comment period in January after consideration from stakeholder comments. Current SFY25 and updated SFY26 AC scores are available for municipalities and water systems in the tables attached to this document.

Data Sources

The Department's policy is to update the Affordability Criteria source data every 3 years to increase predictability for eligibility. The existing source data used for the Affordability Criteria is from 2019. The Department is proposing to update the source data used for Affordability Criteria Scores in SFY26 using 2022 data. The data is also proposed to utilize annual average municipal unemployment data, rather than county data for more accurate determinations. Data source changes include:

2019 Data SFY23-SFY25		2022 Data SFY26 Update
U.S. Census Bureau's ACS 2014-2019 5-year estimates (2020 dollars)	>	U.S. Census Bureau's ACS 2017-2022 5-year estimate (2022 dollars)
NJDOL Annual Average County Unemployment Rate (2019)	>	NJDOL Annual Average Municipal Unemployment Rate (2022)
MRI Average Annual Rate of Population Change (2009- 2019)	>	MRI Average Annual Rate of Population Change (2012- 2022)

AC Threshold

part of the SFY26 Affordability Criteria update, the Program is proposing to adjust the AC score threshold to be the lowest scoring 25% of all municipalities, maintaining the number of eligible communities to 141 each year, subject to any fluctuation in number of total municipalities (the current number of eligible communities is 130). This will increase the AC threshold from 80 to 86.19 for SFY26 until the next data source update. The quartile is calculated after municipality project scores have been calculated and is then applied to both PWSID systems for drinking water projects and for clean water projects sponsored by wastewater systems serving more than one municipality. The AC Tier 1 threshold has also been adjusted to 10% of the lowest municipal scores or 69.11 for SFY26. AC Tier 2 scores are between 69.11 and 86.19. Project scores will no longer be rounded down to the nearest integer.

Projects may have their SFY25 AC score and tier grandfathered under the following conditions:

- Project sponsors which have submitted Step 2 of the H2loans Application, Submittal of the Project Report, by the beginning of SFY26 will have those projects grandfathered at their current AC score and tier.
- Sponsors participating in the Technical Assistance Program by the beginning of SFY 26 will have their previous AC scores and tier grandfathered for projects related to the TA scope of work if there are any non-beneficial changes to eligibility.

SFY26 Affordability Criteria Update

SFY 26 AC Threshold = 86.19 MHI = Median Household Income
 Based on the lowest quartile of municipal data. OBC = Overburdened Community
 AC = Affordability Criteria

State MHI	State Unemp (NJDOJ 2022)	State Pop Trend

¹ Federal and State water systems have been removed, as they are not eligible for DWSRF.

² The project Median Household Income (MHI) for each PWSID system has been calculated by adjusting the MHI of each municipality according to the proportion of the total system population that it served and summing the weighted MHI's of all municipalities for each PWSID. For smaller water systems, where the service areas do not encompass entire municipalities, the MHI may be assessed using finer geographies, such as blocks or census tracts, to more accurately determine eligibility for the affordability criteria.
