Camden County Municipal Utilities Authority Clean Water Project

Executive Summary

To qualify for annual State Revolving Fund (SRF) capitalization grants from US Environmental Protection Agency (USEPA), the New Jersey Water Bank (NJWB), a partnership between the New Jersey Department of Environmental Protection (DEP or the Department) and the New Jersey Infrastructure Bank (I-Bank), must develop the Clean Water Intended Use Plan (IUP) document. The IUP provides information on how funds available through the Water Bank will be used to provide financial assistance for clean water projects and identifies State policies governing funding awards. Each Federal Fiscal Year (FFY) and corresponding State Fiscal Year (SFY) the Department develops the Clean Water IUP to reflect policy and program changes, available funds, and current funding packages. For FFY 2024 and SFY 2025, a Summary of Available Funding Packages is provided in the following table:

Summary of Funding Package

Clean Water Funding Packages	PF Share	PF Cap per Applicant	Projected PF Available	DEP Share (Loan w/ PF)	I-Bank Share
CSO LTCP ARPA Projects ¹	80%	No Cap	\$50M	90%	10%
CSO Abatement	50%	\$5M	\$20M ⁵	75%	25%
CSO Abatement/ Affordability Criteria	100% ³	\$7M-\$8M ⁴	\$30M ⁵	75% Min	25% Max
Water Quality Restoration	50%	\$2.5M	\$10M	75%	25%
Affordability Criteria	100% ³	\$2M - \$3M ⁴	\$40M	75% Min	25% Max
Energy and Water Efficiency Projects	50%	\$2M	\$18M	75%	25%
Overflow and Stormwater Grant (OSG) CW SRF PF Loans ²	20%	\$0.4M	\$2M	20%	-
Stormwater Resilience	80%	No Cap	\$20M	90% Min	10% Max
Emerging Contaminants	100% ³	\$10M	\$18 M	75% Min	25% Max
Base CWSRF	-	-	-	50%	50%
Enhanced Base CWSRF	-	-	-	75%	25%
Brownfield Redevelopment (Conduit/PPP)	-	-	-	25%	75%

1. When CSO LTCP ARPA principal forgiveness funds are exhausted, applicants may access financing available under other applicable CWSRF principal forgiveness and funding categories
2. OSG CW SRF PF Loans will be awarded to CWSRF projects that receive an Overflow and Stormwater Grant (OSG). The OSG will cover 80% of the project costs (project costs capped at \$2 million) and the OSG CW SRF PF Loan will cover 20% of the project costs. Disadvantaged Communities are eligible to receive OSG grant funding for up to 100% of eligible project costs. Costs in excess of \$2 million may be eligible for funding and PF under the CSO Abatement or CSO Abatement/Affordability Criteria categories.
3. The first \$7-\$8 million of CSO Abatement/Affordability projects, the first \$2-\$3 million of Affordability Criteria projects, and the first \$10 million of Emerging Contaminants project will receive 100% principal forgiveness to the extent principal forgiveness funds are available.
4. PF Caps for Affordability and CSO Abatement Affordability are tiered by Affordability Score.
5. \$5M set aside for CSO Green Infrastructure Projects

Highlights for SFY 2025!

Enhanced Assistance for Disadvantaged Communities (DACs)

Applicants meeting the Affordability Criteria are eligible to participate in the Technical Assistance Program for Clean Water. The program has developed additional resources for Disadvantaged Communities participating in this program:

- Participating sponsors are now eligible to receive up to \$2 million in grants for planning and design for eligible clean water capital improvement projects.
- Participating sponsors will also be guaranteed at least \$2 million in PF or the best available funding package for their capital improvement project at the time of loan certification.

The NJWB has also developed tiered Affordability funding packages for SFY25 to provide additional financial assistance to the most disadvantaged communities and has created an Enhanced Base CWSRF funding package for applicants who do not meet the Affordability Criteria but are below the state average MHI. New funding packages are as follows:

- Tier AC2 CSO Affordability and Affordability Packages maintain generous principal forgiveness for sponsors with an Affordability Score of 66 to 80 and sponsors with Affordability Scores of 81 or above that meet the Environmental Justice Economic Overburdened Community Criteria.
- Tier AC1 CSO Affordability and Affordability Packages provide additional principal forgiveness caps for sponsors with an Affordability Score of 65 or below.
- Sponsors with Affordability Scores of 100 and under are eligible for the Enhanced Base CWSRF Package which consists of loan funding equivalent to 75% DEP loan and 25% I-Bank's AAA Market Rate financing.

Note: Affordability Scores calculated in accordance with the Affordability Scoring Methodology (see Appendix 2) are rounded down to the closest integral.

Over SFY25, the Department will continue to engage stakeholders to work on the Affordability Criteria and implementation of changes in scoring. The Department expects to update data used for Affordability Criteria Scores in SFY26 using 2020 Census data. The updated scores will become available during the engagement process for the Affordability Criteria (AC). Current AC scores can be found on the WIIP website at (dep.nj.gov/resources).

45-Year Loan Terms for CSO Projects

New Jersey finds itself at a significant juncture, where the implementation of huge environmental infrastructure improvement projects, particularly for Combined Sewer Overflow abatement projects (CSOs), coincides with ever-increasing project construction and materials costs and delays. This confluence creates a serious affordability problem particularly for the disadvantaged and marginalized communities in the State that are most often impacted by the need for these projects. The Water Bank is addressing the issue of affordability with financing program innovations which include a low-cost, short-term construction loan program, utilization of the WIFIA Loan Program, prioritized ranking, lower loan rates for CSO projects, and the dedication of federal ARPA funds to increase principal forgiveness opportunities for CSO projects within communities that meet the Department's Affordability Criteria. EPA has approved extended term financing to CSO projects for up to 45 years and projects financed with proceeds of a WIFIA loan with a term up to 35 years. Offering extended term financing for these projects addresses affordability concerns by reducing each repayment amount.

Climate Change & Resilience

New Jersey is already experiencing many of the impacts of climate change such as increasing temperatures, rising sea levels, and more frequent and intense storms. The Department is working to prioritize and fund climate change resilience through the New Jersey Water Bank with new funding incentives and incorporation of resilience into the project planning and design process.

- Projects implementing climate resilience measures will receive an additional 100 priority points if the resilience components represent a significant amount of the overall project activities. Resilience measures for wastewater, and stormwater infrastructure projects must apply the best available and most geographically relevant climate information, projections, and standards.
- To further the goal of reducing greenhouse gas emissions, the Department will set aside \$18 million in principal forgiveness for borrowers implementing projects that address water or energy efficiency (capped at \$2 million per applicant) as defined in [USEPA's Green Project Reserve Guidance](#). Projects that implement green infrastructure, water, or energy efficiency improvements (including projects that are designed to reduce greenhouse gas emissions) will receive an additional 50 priority points if the green components represent a significant amount of the overall project activities.
- For SFY25, the Department is authorized to dedicate \$20 million in principal forgiveness to finance priority stormwater management capital improvement projects, aimed at improving infrastructure and enhancing community resilience. A significant focus of these projects is the utilization of green infrastructure technology and nature-based solutions, particularly in overburdened communities. The primary objectives are to mitigate localized flooding and enhance the ecological health of waterways, goals that have gained urgency due to delays caused by the public health emergency. There are over 20 projects currently on the Project Priority List, estimated at over \$200 million, which meet the eligibility criteria.
- The Department has published "[Building Resilient Water Infrastructure, Climate Change Resilience Guidance for New Jersey's Clean Water & Drinking Water State Revolving Funds](#)" on the WIIP website. This document establishes climate impact standards to assess resilience of project alternatives and include details required elements for new projects seeking State funding through the Water Bank, beginning SFY 2024. The guidance is informed by data in the following reports and documents:
 - [2020 New Jersey Scientific Report on Climate Change](#)
 - [Sea Level Rise Guidance for New Jersey](#)
 - [State of New Jersey Climate Change Resilience Strategy](#)

Updated Program Application Guidance and Resources

The NJWB has begun transforming its public facing content, including its website, guidance, and IUPs to be more user friendly and include all up to date information about the program. [The Water Infrastructure Investment Plan website](#) now includes information about the NJWB's application and review process and BIL financing, including the [Spending Dashboard](#), which shows a breakdown of funding sources and investments administered for Fiscal Year 2023 onwards. The NJWB has also developed comprehensive [SRF Applicant Guidance](#) to assist applicants with program navigation with a step-by-step Program Pathway that explains the process of financing from conception to review to long-term loan closing. The Department will continue to update and modernize its [guidance and forms](#) on its WIIP website.

Build America Buy America (BABA)

Congress passed BABA in 2021 concurrently with the Bipartisan Infrastructure Law (BIL). For SRF recipients, BABA expands existing American Iron and Steel (AIS) domestic preference requirements to include construction materials and manufactured products. The Department recognizes this is a new and complex provision, and we will work closely with project sponsors and the USEPA to provide appropriate guidance, technical assistance, and training. In SFY 2024, the NJWB sponsored a USEPA BABA webinar, which can be found on the [Water Infrastructure Investment Plan \(WIIP\) website](#). The NJWB expects to continue similar technical assistance efforts for BABA.

USEPA BABA Guidance (<https://www.epa.gov/cwsrf/build-america-buy-america-baba>)

Program Description

Program Goals

Short-term:

- Provide funding to needed, construction ready, highly ranked water quality improvement projects.
- Incorporate resilience guidance using the best available and most geographically relevant climate information, projections, and standards in evaluating the technical, environmental, and financial feasibility of proposed projects.
- Provide CWSRF financial incentives and technical assistance to disadvantaged communities with the goal of meeting the Justice40, government-wide initiative to facilitate the delivery of 40 percent of overall benefits of relevant federal investments to disadvantaged communities.

Long-term:

- Provide capital for clean water infrastructure renewal to protect public health and the environment for multiple generations of New Jersey citizens;
- Continue serving as the Garden State's premier source of environmental infrastructure financing through self-sustaining, efficient, and transparent programs;
- Establish and efficiently manage a permanent source of funding for clean water infrastructure projects;
- Provide project financing at a much lower cost than program participants could achieve individually thereby passing substantial savings on to New Jersey taxpayers and rate payers; and
- Increase access to capital markets for those participants that find it difficult or expensive on their own, due to lower credit ratings or a lack of familiarity with debt financing.

Short-Term and Long-Term Loans

All projects are encouraged to secure short-term loans at the time of execution of an engineering design contract for the entirety of the project (planning, design, and construction). Funding will be committed upon certification of each operable segment and satisfaction of the NJWB's credit worthiness standards. Such loans are currently available for terms of up to 5 full fiscal years. At the time a project is at or near construction completion, long-term financing will be issued. For short-term loans issued upon certification of engineering contracts, long-term financing terms are established consistent with the IUP operative at the time of certification of the construction contract. For short-term loans issued at the time of certification of construction contracts, long-term financing terms are established consistent with the IUP operative at the time of short-term loan closing. For applicants financing the cost of construction through non-Water Bank sources or self-funding, long-term financing terms are established consistent with the IUP operative at the time of the long-term loan closing.

Loan Issues Upon	Applicable Financing Term Year
Certification of engineering contract	Date of certification of construction contract*
Certification of construction contract	Date of construction loan closing

*If a project has multiple operable segments, various financing year terms may apply to a single project loan which are set at the time of each contract certification. An operable segment is a project component that is capable of independent operation and testing.

Application

All applications are submitted on the H2LOans website (<https://www.h2loans.com/home>). For security reasons, the project sponsor's authorized official will need to call the I-Bank at 609-219-8601 to create an H2LOans account. The authorized official can then designate a project manager (authorized representative) to submit required information. Rolling applications are accepted any time of the year.

Loan Awards

Loan awards for new projects will be made in SFY25 in accordance with N.J.A.C. 7:22-3, 4, 5, and 9 (<https://dep.nj.gov/dwq/all-division-rules-and-regulations/assistance>). The loan term will generally be 30 years and in some project circumstances, the Water Bank may consider loan terms of up to 45 years for combined sewer overflow (CSO) projects. In either case, the loan term cannot exceed the useful life of the project.

Local government units are required to meet the technical, administrative, and environmental provisions of the rules of the Department and the I-Bank (N.J.A.C. 7:22-3, 4, 5, 8, 9, and 10 (<https://dep.nj.gov/dwq/all-division-rules-and-regulations/assistance>)). Disbursement and loan repayment provisions must be consistent with the rules.

DEP & I-Bank Fee

In accordance with the USEPA Policy on Fees Charged on Assistance Provided Under the SRF Programs, states must disclose information regarding the assessment and use of any fees associated with SRF activities that are passed on to the program participants. In New Jersey, the Department reserves the greater of an amount equal to 4% of all grant awards to the fund received by a state CWSRF from 1988 through the current fiscal year less any CWSRF amounts that have been used in previous years to cover administrative expenses or 1/5th percent of the current valuation of the fund, to cover a portion of the administrative costs of the program. In addition, the annual legislation for the SFY 2006 Program established a "Department Loan Origination Fund" that is administered by the I-Bank. The Department now has a stable fixed fee of 2% of the project costs. No SRF funding is involved in the Department's loan origination fee. The Department's loan origination fee is not included in the principal amount of the CWSRF loan and is accounted for separately.

The I-Bank's loan is issued at the same market interest rate as the I-Bank obtains from the sale of its bonds. Rather than bonding for the eligible closing costs associated with each financing, the I-Bank charged the borrowers a one-time charge of 0.1% of the principal I-Bank loan amount to partially cover the costs associated with that particular series' bond issuance expenses. These costs include such activities as: bond counsel, financial advisor, rating agencies, printing and publishing of the Notice of Sale, the Preliminary Official Statement, the Official Statement, and other costs related to the I-Bank's bond sale. In addition, the I-Bank will charge long-term SFY 2025 Borrowers an administrative fee of up to 0.17% per annum on the total original loan amount. This fee will be uniformly applied annually to all Borrowers receiving loans in the SFY 2025 Financing Program for the duration of each loan. Administrative fees of .15% of the total original loan amount collected from Borrowers of all financing program years may be utilized to fund the I-Bank's activities as enumerated in the SFY 2025 operating budget, or provide loans, credit collateral, or match funds for the Program as appropriate or needed. The balance of the administrative fees collected (up to .02% of total original loan amount) shall be set aside and dedicated to assist communities that meet the environmental justice economic overburdened community or Affordability Criteria with early technical assistance to develop and support the success of capital projects. The I-Bank's annual administrative fee is not included in the principal amount of the loan and is held in an account outside of the SRF. Changes to the I-Bank's fee annual structure is subject to all applicable approvals and publication in the SFY 2025 Financial Plan in May of 2024.

Use of Water Infrastructure Finance and Innovation Act (WIFIA) Funds

The I-Bank intends to use WIFIA loan funds in lieu of a portion of the funds the I-Bank would otherwise secure through

the issuance of tax-exempt bonds. Use of WIFIA loan funds offers several potential advantages over tax-exempt bonds, including lower interest rates, call options, and structuring flexibility. All borrowers in the pool of projects financed with WIFIA loan funds would still receive a long-term loan package with a blended interest rate no greater than if the I-Bank used its AAA market rate bonds for its portion of project financing as described in the applicable IUP.

Interest Subsidy Loans

In addition to the WIFIA funds discussed above, the I-Bank may also leverage a portion of funds appropriated to the Department to create additional SRF savings for the Department by blending the appropriated funds into loan packages for the I-Bank's portion of project financing. All borrowers receiving these appropriated funds in their loan packages would still receive a long-term loan package with a blended interest rate no greater than if the I-Bank used its AAA market rate bonds for its portion of project financing as described in the applicable IUP.

Source and Use of Funds

SFY24 Financing Program		SFY25 Financing Program	
Anticipated Sources:		Anticipated Sources:	
Funds Available from prior years	\$761M	Funds Available from prior years*	\$458M

		ARPA Allocation	\$11M
Total Program Sources:	\$1,299M	Total Program Sources:	\$980M
Anticipated Uses:		Anticipated Uses:	
Projected Projects Financed in SFY24	\$836M	Projects to be Financed in SFY25	\$919M
FFY23 CWSRF Grant Administrative	\$5M	FFY24 CWSRF Grant Administrative	\$6M
Total Program Uses:	\$841M	Total Program Uses:	\$925M
Remaining Non-Obligated Funds: *	\$458M	Remaining Non-Obligated Funds:	\$55M

*While the Program shows remaining non-obligated funds for use in the following year, the Program must clarify that funds are reserved for “soft commitments” which cannot be shown on this table due to the EPA’s reporting policy. Soft commitments are funds for projects that have not yet closed on a loan but have at least received Authorization to Advertise or are operable segments of a project that has at least received Authorization to Advertise. This approach supports long-term project completion by ensuring funds are available for projects which have completed planning and design activities and allows borrowers to wait until completion of construction to begin repaying the loan. This also provides ample support for disadvantaged communities (DACs), recognizing that these communities often face longer timelines to mobilize resources and advance through the Program.

The CWSRF soft commitments, currently totaling approximately \$721 million, are considered by the Department to be the equivalent status of obligated funds, meaning the total Program commitments for SFY24, including projects financed and soft commitments, is \$1,557 million. In SFY25, the projected loan closings include the closing of loans for soft commitments and currently non-obligated projects. The needs in the State continue to outweigh the availability of funds. New Jersey is committed to maximizing federal funding utilization and prioritizing DACs through strategic financing policies and technical assistance programs to ensure the state's infrastructure needs are addressed, providing favorable financing packages for projects ready to advance, and securing resources for high-priority and DAC-related projects.

American Rescue Plan Act (ARPA) Funds

New Jersey’s SFY 2023 budget allocated \$300 million of ARPA funds to the Department to make transformative investments in critical water infrastructure upgrades. The Department will use approximately \$250 million of this allocation to make principal forgiveness loans to applicants sponsoring eligible Combined Sewer Overflow (CSO) projects listed on CSO Long Term Control Plans (LTCP) submitted to the Department. The Department is reserving 40% of the CSO LTCP ARPA principal forgiveness funds to project sponsors that meet the CWSRF Affordability criteria.

Approximately \$45 million of the ARPA allocation will be used to make principal forgiveness loans to applicants sponsoring DWSRF projects that address climate change concerns and to ensure long-term drinking water resilience in New Jersey or projects for the installation of treatment to address multiple Maximum Contaminant Level (MCL) violations at one system as described in the [SFY 2025 Drinking Water State Revolving Fund Intended Use Plan](#). The remaining funds of approximately \$5 million are set aside for: (1) Projects that address contaminants in private residential wells; (2) Public Water System assessment, planning and design efforts which are likely to lead to the implementation of Drinking Water SRF eligible capital improvement projects; and (3) Water and Wastewater System 360-Degree Assessments that are expected to result in the identification and implementation of eligible Clean Water and Drinking Water State Revolving Fund capital improvement projects.

The Department expects to obligate approximately \$230 million of the ARPA funds to clean water projects in SFY 2023 and SFY 2024, leaving a carryover of \$20 million for award in SFY 2025. The ARPA funds must be obligated to projects through funding agreements executed before December 31, 2024, and all funds must be disbursed to project sponsors by December 31, 2026. Therefore, these funds will be obligated to eligible CSO LTCP projects on a readiness to proceed basis. If there is insufficient demand from eligible CSO LTCP ARPA sponsors that meet the Affordability Criteria in SFY25, unobligated funds may be awarded to CSO LTCP ARPA project sponsors that do not meet the CWSRF Affordability criteria. If ARPA funds are not obligated to projects through funding agreements by December 31, 2024, the Department may use the remaining ARPA funds to finance portions of other PF loan funding packages described in this Intended Use Plan to utilize the entire amount of Clean Water ARPA allocation.

For SFY25, the Department is authorized to dedicate \$11 million of ARPA funds to finance priority stormwater management capital improvement projects, aimed at improving infrastructure and enhancing community resilience. A significant focus of these projects is the utilization of green infrastructure technology and nature-based solutions, particularly in overburdened communities. The primary objectives are to mitigate localized flooding and enhance the ecological health of waterways. These ARPA funds must also be obligated to projects through funding agreements

executed before December 31, 2024, and all funds must be disbursed to project sponsors by December 31, 2026

Bipartisan Infrastructure Law (BIL) Funds

On November 15, 2021, President Joe Biden signed the Infrastructure Investment and Jobs Act (IIJA), or the Bipartisan Infrastructure Law (BIL), which the Department estimates could provide nearly \$1 billion in funding over the law's five-year appropriation to New Jersey's Clean Water and Drinking Water SRFs. For SFY 2025, New Jersey's SRFs expect a total allocation of \$240 million, which includes \$102 million for the Clean Water SRF and \$138 million for the Drinking Water SRF. The SFY 2025/FFY 2024 Clean Water SRF BIL funds will be awarded in two separate capitalization grants, one estimated at \$93 million to be used for any eligible clean water project (CW BIL GEN) and the other estimated at \$9 million to be used for projects that address emerging contaminants (CW BIL EC).

Borrower Eligibility

Owners of publicly owned treatment works (towns, boroughs, municipal utilities authorities, counties, regional water authorities, other local government units) with projects that help protect, maintain, or improve water quality are eligible for participation in the Water Bank. Private entities are eligible through public conduit borrowers. Project sponsor eligibility has also been expanded to private colleges and universities that are interested in sponsoring nonpoint source pollution projects. Project sponsors must satisfy the I-Bank and State of New Jersey creditworthiness standards to receive funding.

Project Eligibility

Wastewater

Most projects associated with sewage collection, treatment, or disposal are eligible for financing, including correction of inflow/infiltration problems, sludge management and CSOs. Eligible projects include:

- Secondary and advanced wastewater treatment
- Well Sealing, Water Meters (publicly sponsored)
- Sludge handling facilities
- Infiltration and inflow (I/I) correction
- Interceptors, pumping stations and force mains
- Sewer system rehabilitation
- New collection systems
- Correction of CSOs
- Solutions for malfunctioning septic systems
- Wastewater reuse and conservation projects
- Renewable energy such as wind and solar, co-digestion, generation of biogas, and combined heat and power (CHP) systems
- Energy conservation projects such as energy efficient equipment and components
- Emergency Repair Projects that have been reported to the NJDEP Hotline to replace, in kind, the failure of an essential portion of a wastewater system and poses a substantial threat to the public health, safety, and welfare. A record of NJDEP Hotline contact is required to maintain project eligibility.
- Climate Resilience for Treatment Works
 - Relocation/elevation of certain assets or entire facility above current/projected flood stage
 - Installation of flood attenuation, diversion, or retention infrastructure within or beyond the footprint of a treatment works that protects the treatment works including floodwater channels/culverts, green infrastructure, and natural systems capable of mitigating a storm surge (e.g., barrier beach

- and dune systems, tidal wetlands, and living shorelines)
- Saltwater resistant equipment/components
- Backup generators and fuel transport and storage tanks
- Portable pumps
- Physical hardening of electrical systems/equipment
- Dry floodproofing of structures
- Elevated walls/caps for treatment tanks
- Installation of redundant equipment/components
- Overflow tanks/tunnels

For information regarding potential applicable permitting, see:

NJPDES Additional Information (https://dep.nj.gov/dwq/permitting_information/)

NJDEP Treatment Works Approval Program (<https://dep.nj.gov/dwq/treatment-works/>)

NJDEP Land Use Program (<https://dep.nj.gov/wlm/>)

Stormwater

Eligible projects include construction, expansion, or replacement of stormwater management systems, including the following:

- Non-point Source Pollution/Stormwater management
- Construction of regional basins
- Major stormwater system rehabilitation
- Replacement of existing storm drains
- Rehabilitation of tide gates
- Extension of outfall points
- Runoff control (stream bank stabilization/restoration)
- Stream/lake embankment restoration
- Salt dome construction

For additional information, see: NJDEP

Stormwater Links (<https://dep.nj.gov/njpdes-stormwater/>)

Borough of Carteret Stormwater Resiliency Project

Green Infrastructure

Green projects are clean water projects that incorporate green infrastructure and water or energy efficiency improvements* (those that reduce greenhouse gas emissions, for example). Green infrastructure includes such practices as replacing existing pavement with porous pavement, utilizing bioretention, renewable energy, constructing green roofs, creating rain gardens, and other practices that restore natural hydrology and treat stormwater runoff through infiltration into the subsoil, treatment by vegetation or soil, or stored for reuse.

* Water Bank eligibility for energy efficiency improvements is limited to the pro rata share of capital costs that provide power to a publicly owned treatment works.

For additional information, see:

Green Infrastructure in New Jersey
(www.nj.gov/dep/gi/index.html)

NJDEP Sustainability and Green Energy Guidance
([Applicants Guide 2.26.23.docx](#))

*Hoboken City Clean Water Project, Southwest
Park & Underground Retention
System*

Brownfields

The cleanup of abandoned and contaminated industrial sites is eligible for financing if a local or county government assumes the repayment obligation for the loan. The Water Bank will finance the removal of contaminated soil, site-capping, and the installation of stormwater controls.

Returning Brownfield sites to productive use protects and improves water quality and preserves open space. Every acre of Brownfield redevelopment spares 4.5 acres of pristine land from development. Brownfield redevelopment also boosts local tax revenue, creates jobs, revitalizes New Jersey's cities and towns, and improves the quality of life for area residents. The Water Bank provides loans to municipalities, counties, and public authorities to support a wide range of cleanup and remediation activities necessary to restore the Brownfield site for re-use.

For additional information, see: NJDEP Site Remediation Links (www.nj.gov/dep/srp/)

Landfills

Construction activities at landfills that have a water quality benefit are eligible for Water Bank financing. Examples include:

- Capping systems
- Liners
- Leachate collection systems
- Treatment systems
- Sewer connections
- Barge shelters
- Containment booms
- Litter fences
- Gas collection and treatment systems
- Monitoring wells
- Reclamation or reduction activities

*Camden County Phoenix Park
replaces former landfill*

Land Preservation

The Water Bank provides financing for the preservation of open space and farmland given the water quality benefit achieved through such acquisitions. The NJWB funds preservation of properties to protect stream headwaters and corridors, wetlands, and aquifer recharge areas. Financing for land is compatible with the Green Acres Program, the Garden State Preservation Trust, and Open Space programs financed by local and county Open Space taxes.

Although lands purchased through the Water Bank for preservation as part of Open Space cannot be developed, they may be used for passive recreational activities, such as hiking, fishing, and horseback riding. Placement of conservation easements on funded parcels is a requirement, which assures that the water quality benefits are preserved in perpetuity. The Water Bank will coordinate with the Green Acres Program, when appropriate, to maximize a community's limited open space funds for land acquisition. Through this partnership, municipalities can receive additional resources to facilitate the purchase of larger and/or more expensive parcels.

For additional information, see:

NJDEP Green Acres Program (www.nj.gov/dep/greenacres/)

Equipment Purchase

Equipment that provides a water quality benefit can be financed under the Water Bank, including but not limited to:

- Street sweepers
- Generators
- Sewer flushing and cleaning equipment
- Dump trucks
- Crawler loaders
- Skimmer boats
- Aquatic weed harvesters
- Energy efficient equipment such as lighting, HVAC, process equipment, and electronics systems

Security Monitoring

Projects designed to improve security at otherwise funding-eligible clean water facilities are eligible, including but not limited to:

- Fencing
- Lighting
- Motion detectors
- Cameras
- Secure doors
- Alternative auxiliary power sources
- Cybersecurity

*Toms River Municipal Utilities Authority
Equipment Purchase*

Miscellaneous Allowable Costs

Miscellaneous allowable costs associated with above referenced eligible stand-alone projects include:

- Pavement restoration
- Utility relocation
- Site grading
- Purchasing land to utilize for stormwater management

Milltown Borough Electrical Substation Relocation

Planning and Emergency

Long-Term Control Plans

Owners and operators of combined sewer systems are issued NJPDES Combined Sewer Overflow Permits and, as part of their permit responsibility, must develop and implement Long-Term Control Plans. The Long-Term Control Plan (LTCP) is a system wide evaluation of the sewage infrastructure, and the hydraulic relationship between the sewers, precipitation, treatment capacity and overflows. As part of the LTCP, the permittee must evaluate alternatives that will reduce or eliminate the discharges and develop a plan and implementation schedule to do so. LTCPs are created to identify the most cost-effective manner to regulate CSOs to meet water quality standards. The permittee must establish a public participation process that actively involves the affected public throughout the process. The LTCP is submitted to the Department for review and comment and, ultimately, incorporation into the final NJPDES CSO Permit.

NJDEP Combined Sewer Overflow (<https://dep.nj.gov/dwq/combined-sewer-overflow/>)

Planning & Design Loans

The NJWB also offers short-term loans to cover the costs associated with planning and design of a water infrastructure project. Eligible costs include engineering fees, surveys, environmental or geological studies, and other costs related to project plan preparation. The loans must be rolled into a Water Bank capital improvement project or repaid in 2 years from loan award. Long-term financing terms are established consistent with the Intended Use Plan operative at the time of certification of the construction contract. See the [Short- and Long-Term Loan section](#) above.

Asset Management Plans

Projects to develop and implement asset management plans (AMP) are eligible for financing. The AMP loans must be rolled into a Water Bank capital improvement project or repaid in 2 years from loan award. Long-term financing terms are established consistent with the Intended Use Plan operative at the time of certification of the construction contract(s). See the [Short- and Long-Term Loan section](#) above.

NJDEP Asset Management Program (www.nj.gov/dep/assetmanagement/)

NJDEP Asset Management Guidance and Best Practice (www.nj.gov/dep/watersupply/pdf/guidance-amp.pdf)

SAIL

The Statewide Assistance Infrastructure Loan (SAIL) program is a disaster relief loan program designed for project sponsors that anticipate receiving FEMA or other federal disaster relief grants. The SAIL program's goal is to provide timely and cost-effective funds, in advance of federal reimbursements, to expedite and support the impacted communities' recovery and rebuilding of environmental infrastructure. SAIL finances projects within a declared disaster area to rebuild water systems directly impacted by a declared disaster as well as costs associated with improving the resiliency of Clean Water and Drinking Water systems.

Technical Assistance & Principal Forgiveness (PF) for Disadvantaged Communities (DACs)

New Jersey's groundbreaking Environmental Justice Law, N.J.S.A. 13:1D-157, (Law) enacted in 2020, requires the Department to evaluate the contributions of certain facilities to existing environmental and public health stressors in overburdened communities when reviewing certain permit applications. The law also directs the Department to publish a list of [Overburdened Communities \(OBCs\)](#) and provide notice to the 338 municipalities in which those communities are located.

The NJ Water Bank has developed Affordability Criteria that aligns the Clean Water Affordability Criteria with the Drinking Water Disadvantaged Community (DAC) criteria and the Environmental Justice Law's **economic criteria** for overburdened communities. Borrowers that meet the new Clean Water Affordability Criteria are considered DACs. See Appendix 2 for the Affordability map. For projects sponsored by DACs, the CWSRF is setting aside additional PF ([see Funding Package section](#)) and offering Technical Assistance services to help eligible communities better understand available funding, particularly principal forgiveness, assess water infrastructure needs, engage their communities, and navigate the NJWB application process more efficiently. Clean Water DAC Technical Assistance services will assist with every step of the financing process, from needs and fiscal assessments to providing principal forgiveness loans for the final capital improvement project.

An online [Technical Assistance Request Form](#) is currently available on our Water Infrastructure Investment Plan (WIIP) webpage. Available technical assistance for clean water includes:

- Asset Management Plan Development
- Technical, Managerial, and Financial Capacity Evaluation
- Capital Improvement Plan Development
- Clean Water Infrastructure Project Development
- State Revolving Fund Loan Application Submittal Assistance
- Preliminary Technical Assistance (needs and fiscal assessments and public outreach)
- Early education and public engagement services

DACs are eligible for **FREE** technical assistance and **\$4 million or more** in grants and Principal Forgiveness (PF)!

Free Technical Assistance

Up to \$2M in Planning and Design Grants

\$2M or More in PF for Capital Improvement Project

DACs participating in the Technical Assistance program are eligible to receive up to \$2 million in grants for planning and design activities. The NJWB intends to use up to \$60 million in SFY22 to SFY25 water infrastructure state appropriations for Clean Water and Drinking Water P&D grants. Sponsors receiving only PF or grants do not need to meet creditworthiness requirements or pay the DEP loan origination fee.

As further incentive for DACs to take advantage of Technical Assistance, the NJWB also intends to use up to \$60 million in SFY22 to SFY25 water infrastructure state appropriations for guaranteed PF and funds for capital improvement projects sponsored by applicants participating in the Technical Assistance program. These funds will be awarded to Clean Water and Drinking Water projects on a readiness to proceed basis. This will ensure that funding will be available for DACs' projects upon completion of the planning and design process. At the time of the project's construction certification award, the sponsor will be eligible to receive up to \$2 million in PF or the best available funding package for the current fiscal year's IUP.

Funding packages

Principal Forgiveness Funds

The Department expects to use the maximum amount available for principal forgiveness (PF), or grant like funding, utilizing SRF monies subject to federal restrictions. The Department plans to utilize approximately \$13 million projected to be available under the FFY 2024 CWSRF Base grant (CW Base FFY24). In addition to the FFY 2024 CW Base grant, the Department will receive authority to award approximately \$55 million in additional PF made available by the Bipartisan Infrastructure Law (BIL). The BIL will provide PF of approximately \$46 million for eligible clean water projects under the FFY 2024 CWSRF General Supplemental grant (CW BIL GEN) and approximately \$9 million in funds and PF authority for projects that address emerging contaminants under the FFY 2024 CWSRF Emerging Contaminants grant (CW BIL EC). The Department will supplement the Federal grant awards for principal forgiveness with approximately \$109 million of CWSRF PF carried over at the end of SFY 2024 as PF in SFY 2025 for categories set forth in this IUP. Funds and PF authority available from the grant awards will be blended with carryover PF authority from prior grants (CW Base Prior, CW BIL GEN Prior and CW BIL EC Prior), CWSRF repayments and state match funds, and other sources of CWSRF funds to provide funding to eligible projects.

Approximately \$20 million of ARPA funds allocated to the Department in SFY 2023 will be carried over to provide PF loans to applicants sponsoring capital improvement projects listed on Combined Sewer Overflow (CSO) Long Term Control Plans (LTCPs) submitted to the Department. These funds will be supplemented with an additional \$30 million from PF sources detailed above to provide a total of \$50 million to help meet demand for projects anticipating Authorization to Award before the ARPA obligation deadline of December 31, 2024.

As of SFY25, an additional \$11 million in ARPA funds will be allocated as PF for the new Stormwater Resilience funding package as a part of the Ready for Resilience Program. These funds will be supplemented with an additional \$9 million from PF sources detailed above to provide a total of \$20 million to help meet demand for projects anticipating Authorization to Award before the ARPA obligation deadline of December 31, 2024. To learn more about ARPA, see the [Source and Use of Funds section](#).

The Department may increase any amounts identified in the IUP reserved for PF and adjust any caps if additional SRF or non-SRF funds (including Natural Resource Damages (NRD) funds recovered by the State, Corporate Business Tax (CBT) diesel funds, and ARPA funds) are allocated to the NJWB to supplement principal forgiveness or low-cost loan funding. In addition, the Department may bank any non-SRF financing towards future State Match requirements subject to EPA approval.

SFY 2025 Clean Water principal forgiveness funds will be reserved as follows:

ARPA Funds (non-SRF), CW Base FFY24, Carryover, and CW BIL

- \$50 million for CSO Long Term Control Plan Projects
- \$10 million for Water Quality Restoration Projects
- \$20 million for CSO Abatement Projects
- \$40 million for Eligible CW Projects sponsored by borrowers meeting the Clean Water Affordability Criteria (Affordability)
- \$30 million for CSO Abatement Projects sponsored by borrowers meeting the Clean Water Affordability Criteria (CSO Abatement/Affordability)
- \$20 million for Stormwater Resilience Projects
- \$18 million for Water and Energy Efficiency Projects
- \$18 million for projects that address Emerging Contaminants
- \$2 million to projects awarded Overflow and Stormwater Grants (OSG)

SFY25 Funding Packages and PF Opportunities

Base CWSRF

The Base CWSRF funding package for SFY25 consists of financing at the equivalent of 50% interest-free DEP and 50% I-Bank's AAA Market Interest Rate loan funding for allowable project cost.

DEP Loan Share (No Interest)	I-Bank Loan Share (AAA Market Rate)
50%	50%

Enhanced Base CWSRF

The Department is offering base loans with a higher percentage of DEP loan share to applicants who do not meet the Affordability Criteria but have an Affordability Score of 100 or less. The Enhanced Base CWSRF consists of loan financing at the equivalent of 75% interest-free DEP and 25% I-Bank's AAA Market Interest Rate loan funding for allowable project costs for applicants with Affordability Scores between 100 and 81.

Funding Package for Projects with an Affordability Score between 81 and 100

DEP Loan Share (No Interest)	I-Bank Loan Share (AAA Market Rate)
75%	25%

Sewer Overflow and Stormwater Reuse Grant (OSG) Program CWSRF Loans

New Jersey expects a total of approximately \$9.1 million carried over from SFY24 and new funding from the USEPA under the Sewer Overflow and Stormwater Reuse Grants Program (OSG) in SFY25. NJWB expects an EPA allocation of \$3 million for a total of \$12 million available for use in SFY25. This program is intended to address infrastructure needs for combined sewer overflows (CSO), sanitary sewer overflows (SSO), and stormwater management. The Federal share of the cost of activities carried out using OSG money shall be not less than 80% of the cost and at least 20% of a state's allocation must be used for green infrastructure, water and energy efficiency improvements, and other environmentally innovative activities. States are to prioritize the award of subawards to eligible subrecipients that are financially distressed communities; implementing a long-term control plan for CSOs or SSOs; or requesting funds for a project included on the CWSRF Intended Use Plan. The CWSRF intends to use OSG funds for a limited number of eligible projects. Eligible projects exist under the following two general categories:

- 1) Combined sewer overflow correction, and
- 2) Stormwater and subsurface drainage water.

In all cases, municipalities or municipal entities are eligible for assistance. Only capital improvement projects are eligible. This includes infrastructure planning, design, construction, and equipment purchases. Operations and maintenance activities are not eligible for funding. A project that receives grant money is subject to the same requirements as a project that receives money from the CWSRF. OSG Grant funds will be awarded based on rank and readiness to proceed.

The term "financially distressed community" means a community that meets Affordability Criteria established by the State in which the community is located.

Project sponsors that receive a Sewer Overflow and Stormwater Reuse Grant for up to 80% of eligible project costs are eligible to receive a principal forgiveness loan for the remaining 20% of costs. Disadvantaged communities are eligible to receive OSG grant funding for up to 100% of eligible project costs. The Department’s loan origination fee is waived for the principal forgiveness portion of OSG loans. Total project costs are capped at \$2 million. Approximately \$2 million will be reserved for OSG CWSRF principal forgiveness. The balance of the project would have to be separately funded and would be eligible for SRF funds at the rates offered for the applicable project type as indicated in this IUP.

Funding Package for OSG Grant up to \$2M in Project Costs

Example: A \$1M project that qualifies for an OSG grant would receive the following package:

<i>Project Cost</i>	<i>Grant</i>	<i>Principal Forgiveness</i>	<i>DEP Loan Share (Interest Free)</i>	<i>I-Bank Loan Share (AAA Market Rate)</i>
First \$1M (OSG)	\$0.8M	\$0.2M	\$0M	\$0M
Total (\$1M)	\$0.8M	\$0.2M	\$0M	\$0M

Prioritization of Sewer Overflow and Stormwater Reuse Grants Program (OSG) Projects

Projects will be prioritized to eligible subrecipients that are financially distressed communities; implementing a long-term control plan for CSOs and requesting funds for a project included on the CWSRF Intended Use Plan. Projects will be further prioritized based on whether it serves an overburdened community identified on the NJDEP Office of Environmental Justice interactive mapping tool, the quantity of flow anticipated to be removed from a system or flood prone area, and the use of green technology consistent with the design and performance standards under [N.J.A.C. 7:8 \(Green Infrastructure in New Jersey\)](#). Additional points will be awarded for documented localized flooding based on storm intensity and for applicants implementing local hiring requirements in the contract documents.

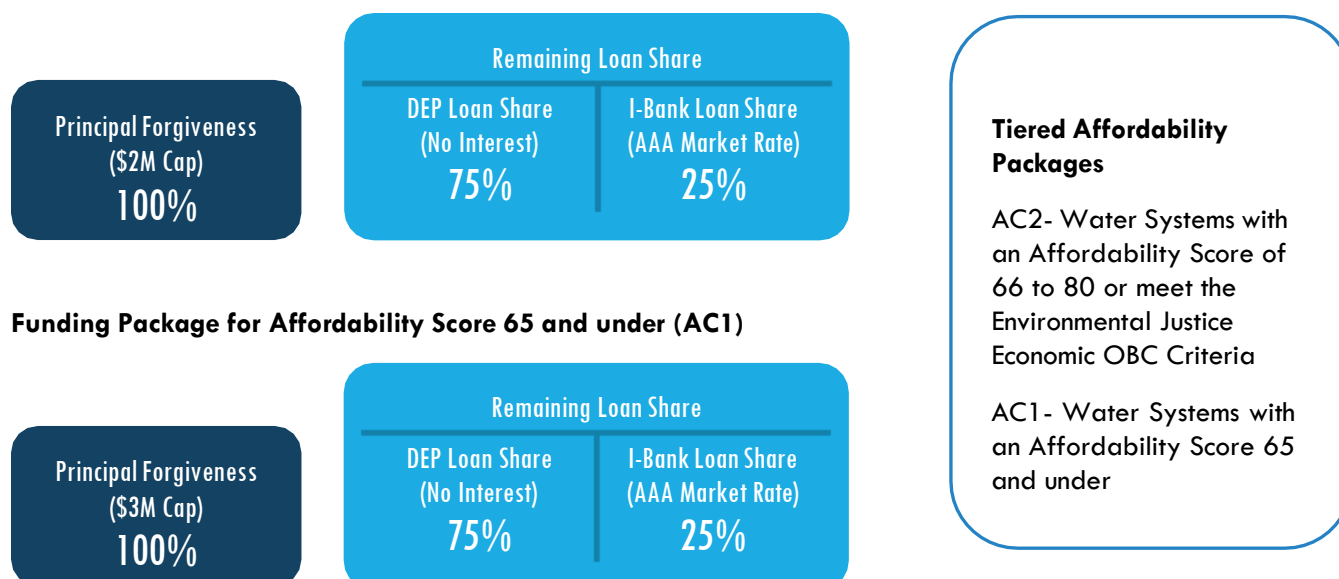

OSG Ranking Category	OSG Ranking Points
CWSRF Project Priority Points	CWSRF Points
Project Identified in Long Term Control Plan	100
Project Located in a Financially Distressed Community	50
Project Serves an Environmental Justice Overburdened Community	50
Flow Removed from Flood Prone Area per MG removed	10
Use of Green Technology	50
Documented Localized Flooding after 2-year Rain Event	50
Documented Localized Flooding after 5-year Rain Event	25
Implement Local Hiring requirements in Contract Documents	10

Affordability Criteria

The Department is reserving funds and providing principal forgiveness loans for any eligible clean water project sponsored by applicants that meet the clean water Affordability Criteria (AC). Funding packages are tiered based on the project Affordability Score. This tiered principal forgiveness is intended to provide the most disadvantaged communities with additional funding to move these projects through the NJWB. The Department's loan origination fee is waived for the principal forgiveness portion of Affordability loans. A total of \$40 million in principal forgiveness will be available for Affordability projects in SFY25.

The Department is offering tiered principal forgiveness packages for projects meeting the Affordability Criteria. For projects with an Affordability Score of 66 to 80 (**AC2**), financing consists of 100% principal forgiveness (PF capped at \$2 million) and the equivalent of 75% interest free DEP loan and 25% I-Bank's AAA Market Interest Rate loan funding for remaining project costs. For projects with an Affordability Score of 65 and under (**AC1**), financing consists of 100% principal forgiveness (PF capped at \$3 million) and the equivalent of 75% interest free DEP loan and 25% I-Bank's AAA Market Interest Rate loan funding for remaining project costs. Principal forgiveness funds will be allocated to Affordability projects on a readiness to proceed basis.

Funding Package for Affordability Score of 66 to 80 (AC2)

Funding Package for Affordability Score 65 and under (AC1)

Example: A \$25M project qualifying under the Affordability category with an Affordability Score of 70 would receive the following package:

Project Cost	Principle Forgiveness	DEP Loan Share (Interest Free)	I-Bank Loan Share (AAA Market Rate)
First \$2M (AC2)	\$2M	\$0M	\$0M
Next \$23M (AC2)	\$0M	\$17.25M	\$5.75M
Total (\$25M)	\$2M	\$17.25M	\$5.75M

Combined Sewer Overflows (CSOs)

CSO Long Term Control Plan Projects (American Rescue Plan Act (ARPA) Funds)

The Department is expected to carry over approximately \$20 million in ARPA funds for allocation in SFY25 and supplement with an additional \$30 million for a total of \$50 million in principal forgiveness to help offset the substantial costs communities face to implement Combined Sewer Overflow (CSO) Long Term Control Plans (LTCP). The Department is reserving funds and providing principal forgiveness loans for projects identified on a CSO LTCP submitted to the Department. The Department will use ARPA funds to finance the remaining funds with 80% principal forgiveness (no PF cap) and the equivalent of 10% interest free DEP loan and 10% I-Bank's AAA Market Interest Rate loan funding. Principal forgiveness funds will be allocated to CSO LTCP projects on a readiness to proceed basis.

Funding Package for CSO LTCP ARPA with No Cap

Principal Forgiveness (No Cap) 80%	DEP Loan Share (No Interest) 10%	I-Bank Loan Share (AAA Market Rate) 10%
---	---	--

CSO LTCP ARPA projects must have implementation schedules that meet the deadlines for ARPA fund obligation (December 31, 2024) and disbursement (December 31, 2026). Project schedules must show the ability to award all contracts and close on a short-term funding agreement before December 31, 2024, and complete construction before December 31, 2026. When CSO LTCP ARPA principal forgiveness funds are exhausted, applicants will be able to access financing available under other applicable CWSRF principal forgiveness and funding categories. The Department reserved 40% of the initial allocation of CSO LTCP ARPA principal forgiveness funds to project sponsors that meet the CWSRF Affordability criteria. If there is insufficient demand from eligible CSO LTCP ARPA sponsors that meet the Affordability Criteria in SFY25, unallocated funds may be awarded to CSO LTCP ARPA project sponsors that do not meet the CWSRF Affordability criteria.

CSO Abatement

The Department is reserving funds and providing principal forgiveness loans for CSO abatement (CSO) projects utilizing grey and/or green practices (such as green roofs, rain gardens, porous pavement, and other activities that maintain and restore natural hydrology by treating stormwater runoff through infiltration into the subsoil, treatment by vegetation or soil, or stored for reuse). Principal forgiveness funds will be allocated to CSO Abatement projects on a readiness to proceed basis. A total of \$20 million in principal forgiveness will be available for CSO Abatement projects in SFY25 of which \$5M will be reserved exclusively for green infrastructure. If there is insufficient demand from eligible green infrastructure projects, in SFY25, unallocated funds may be used for CSO abatement projects that do not employ green infrastructure. Project sponsors are eligible to receive principal forgiveness for up to 50% of allowable costs (capped at \$5 million) and the equivalent of 75% interest free DEP loan and 25% I-Bank's AAA Market Interest Rate loan funding for remaining allowable project costs. Any principal forgiveness for CSO Abatement cannot be stacked with the CSO Abatement/Affordability principal forgiveness.

Funding Package for CSO Abatement with PF up to \$10M

Principal Forgiveness (\$5M Cap) 50%	DEP Loan Share (No Interest) 25%	I-Bank Loan Share (AAA Market Rate) 25%
---	---	--

For projects receiving principal forgiveness, project costs over \$10 million will consist of financing with the equivalent of 75% interest free DEP loan and 25% I-Bank's AAA Market Interest Rate loan funding. When the PF funds allocated to CSO Abatement projects in SFY25 are no longer available, the CWSRF funding package for CSO Abatement projects will consist of loan funding with the equivalent of 75% interest free DEP loan and 25% I-Bank's AAA Market Interest Rate loan funding for remaining allowable costs.

Funding Package for CSO Abatement w/ PF over \$10M and w/o PF funds

DEP Loan Share (No Interest) 75%	I-Bank Loan Share (AAA Market Rate) 25%
--	---

Example: A \$15M CSO Abatement Project would receive the following package:

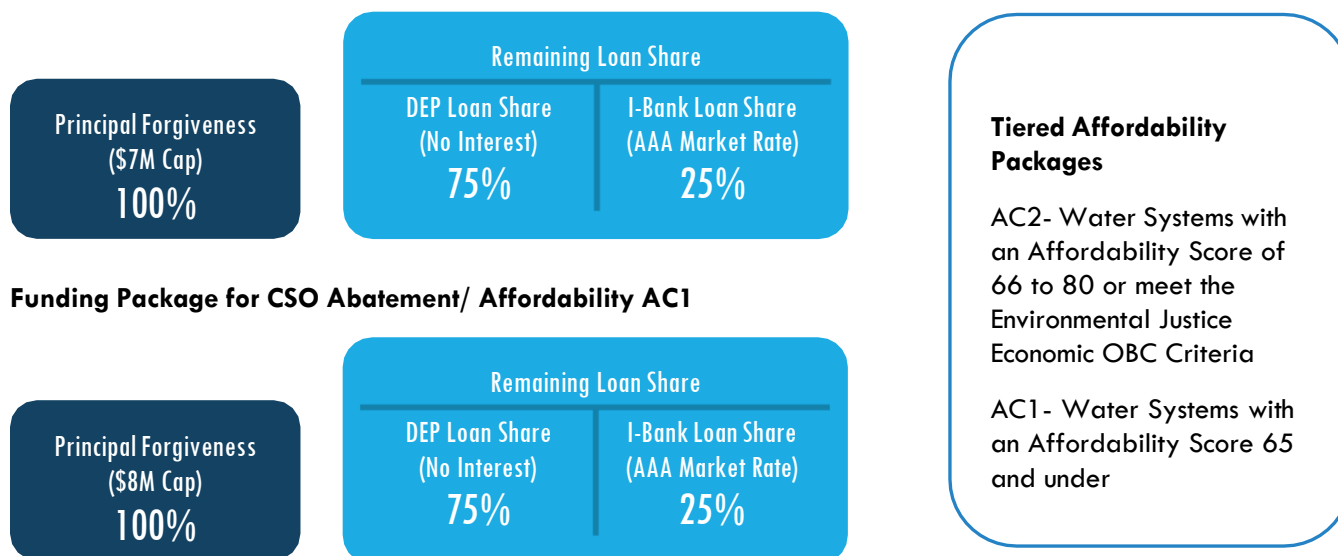

<i>Project Cost</i>	<i>Principle Forgiveness</i>	<i>DEP Loan Share (Interest Free)</i>	<i>I-Bank Loan Share (AAA Market Rate)</i>
First \$10M (CSO)	\$5M	\$2.5M	\$2.5M
Next 5M (CSO)	\$0M	\$3.75M	\$1.25M
Total (\$15M)	\$5M	\$6.25M	\$3.75M

CSO Abatement/ Affordability

The Department is reserving additional funds and providing additional principal forgiveness loans exclusively for CSO abatement projects in communities that meet the CWSRF Affordability Criteria. A total of \$30 million in principal forgiveness will be available for CSO Abatement/Affordability projects in SFY25 of which \$5M will be reserved exclusively for Green Infrastructure. If there is insufficient demand from eligible green infrastructure projects in SFY25, unallocated funds may be used for grey infrastructure.

CSO Affordability packages will be tiered depending on the project sponsor's Affordability Score. For sponsors with an Affordability Score of 66 to 80 (**AC2**), financing consists of 100% principal forgiveness (PF capped at \$7 million) and the equivalent of 75% interest free DEP loan and 25% I-Bank's AAA Market Interest Rate loan funding for remaining project costs. For sponsors with an Affordability Score under 65 (**AC1**), financing consists of 100% principal forgiveness (PF capped at \$8 million) and the equivalent of 75% interest free DEP loan and 25% I-Bank's AAA Market Interest Rate loan funding for remaining project costs. The Department's loan origination fee is waived for the principal forgiveness portion of CSO/Affordability loans. Principal forgiveness funds will be allocated to CSO Abatement/Affordability (CSO/A) projects on a readiness to proceed basis.

Funding Package for CSO Abatement/ Affordability AC2

Funding Package for CSO Abatement/ Affordability AC1

When the PF funds allocated to CSO Abatement/Affordability projects in SFY25 are no longer available, the CWSRF funding package for CSO Abatement/Affordability projects will consist of loan funding with the equivalent of 75% interest free DEP loan and 25% I-Bank's AAA Market Interest Rate loan funding for allowable costs. Qualifying project sponsors may also elect to take advantage of the Affordability principal forgiveness package or CSO Abatement package if funding is available in those categories.

Funding Package for CSO Abatement/Affordability with no PF

Example: A \$12M CSO Abatement/Affordability project with an Affordability Score of 75 would receive the following package:

<i>Project Cost</i>	<i>Principle Forgiveness</i>	<i>DEP Loan Share (Interest Free)</i>	<i>I-Bank Loan Share (AAA Market Rate)</i>
First \$7M (CSO/AC2)	\$7M	\$0M	\$0M
Next 7M (CSO/AC2)	\$0M	\$3.75M	\$1.25M
Total (\$12M)	\$7M	\$3.75M	\$1.25M

Water Quality Restoration

The Department is reserving funds and providing principal forgiveness loans for capital improvement projects, including equipment purchases, that will eliminate, prevent, or reduce documented occurrences of water quality advisories, beach closings and shellfish bed downgrades due to the presence of harmful algal blooms (HABs). Priority for principal forgiveness funds will be given to eligible projects that address HABs (HAB Projects) and principal forgiveness funds will be allocated to HAB projects on a readiness to proceed basis. If there is insufficient demand from eligible HAB projects in SFY25, unallocated principal forgiveness funds may be used for projects that address shellfish bed downgrades, beach closings and advisories due to the presence of pathogens.

Projects would eliminate such potential sources as failing on-site wastewater systems or cross-connections between storm sewers and sanitary sewers. Eligible projects also include the expansion or replacement of stormwater management systems as well as the purchase of skimmer boats, aquatic weed harvesters and equipment to maintain stormwater management facilities. Project sponsors are eligible to receive principal forgiveness for up to 50% of allowable costs (capped at \$2.5 million) and the equivalent of 25% interest free DEP loan and 25% I-Bank's AAA Market Interest Rate loan funding for the first \$5 million of allowable costs.

Funding Package for Water Quality Restoration with PF up to \$5M

Principal Forgiveness (<i>\$2.5M Cap</i>)	DEP Loan Share (No Interest)	I-Bank Loan Share (AAA Market Rate)
50%	25%	25%

Allowable project costs over \$5 million will receive loan funding with the equivalent of 75% interest free DEP loan and 25% I-Bank's AAA Market Interest Rate. A total of \$10 million in principal forgiveness funds will be available for Water Quality Restoration projects in SFY25. When the PF funds allocated to Water Quality Restoration projects in SFY25 are no longer available, the CWSRF funding package for Water Quality Restoration projects will consist of loan funding with the equivalent of 75% interest free DEP loan and 25% I-Bank's AAA Market Interest Rate loan funding

Funding Package for Water Quality Restoration w/ PF over \$5M and w/o PF

DEP Loan Share (No Interest)	I-Bank Loan Share (AAA Market Rate)
75%	25%

Example: A \$15M Water Quality Restoration Project would receive the following package:

<i>Project Cost</i>	<i>Principle Forgiveness</i>	<i>DEP Loan Share (Interest Free)</i>	<i>I-Bank Loan Share (AAA Market Rate)</i>
First \$5M (WQR)	\$2.5M	\$1.25M	\$1.25M
Next 10M (WQR)	\$0M	\$7.5M	\$2.5M
Total (\$15M)	\$2.5M	\$8.75M	\$3.75M

Emerging Contaminants

Emerging contaminants refer to substances and microorganisms, including manufactured or naturally occurring physical, chemical, biological, radiological, or nuclear materials, which are known or anticipated in the environment, that may pose newly identified or re-emerging risks to human health, aquatic life, or the environment. These substances, microorganisms, or materials can include many different types of natural or manufactured chemicals and substances – such as those in some compounds of personal care products, pharmaceuticals, industrial chemicals, pesticides, and microplastics. A description of emerging contaminants for the purposes of CWSRF financing can be found in Appendix B to [USEPA's March 8, 2023, Memorandum regarding the Implementation of the Clean Water and Drinking Water State Revolving Fund Provisions of the Bipartisan Infrastructure Law](#).

The Department is reserving funds and providing principal forgiveness loans for clean water projects that primarily address emerging contaminants (EC). There is a \$10 million cap of principal forgiveness for EC projects per applicant in SFY25. Principal forgiveness funds will be allocated to projects that address emerging contaminants on a readiness to proceed basis. Project sponsors are eligible to receive principal forgiveness for up to 100% of the first \$10 million of allowable costs and the equivalent of 75% interest free DEP loan and 25% I-Bank's AAA Market Interest Rate loan funding for remaining allowable costs. The Department's loan origination fee is waived for the principal forgiveness portion of Emerging Contaminants loans.

Funding Package for Emerging Contaminants with PF

A total of \$18 million in principal forgiveness will be available for Emerging Contaminants projects in SFY25. When the PF funds allocated to Emerging Contaminant projects in SFY25 are no longer available, the CWSRF funding package for Emerging Contaminant projects will consist of the equivalent of 75% interest free DEP loan and 25% I-Bank's AAA Market Interest Rate loan funding for allowable costs.

Funding Package for Emerging Contaminants without PF

Example: A \$15M project qualifying under the Emerging Contaminants category would receive the following package:

Project Cost	Principle Forgiveness	DEP Loan Share (Interest Free)	I-Bank Loan Share (AAA Market Rate)
First \$10M (EC)	\$10M	\$0M	\$0M
Next \$5M (EC)	\$0M	\$3.75M	\$1.25M
Total (\$15M)	\$10M	\$3.75M	\$1.25M

State Recovery and Reuse of SRF Funds Applied to PFAS Contamination

The State of New Jersey (State) does not intend by issuing to any Recipient authorized financial assistance through the Drinking Water State Revolving Fund or the Clean Water State Revolving Fund (together “SRF”) to abrogate, resolve or relieve the responsibility or liability of any third-party that caused or contributed to the contamination impacting the State’s drinking water, groundwater, surface waters or natural environment in any manner, including without limitation, through the sale, distribution, supply, or direct discharge of any per-and polyfluoroalkyl substances (“PFAS”), including PFAS in aqueous film-forming foam (“AFFF”) or other PFAS-containing materials (collectively “PFAS contamination”).

New Jersey intends to recoup and recover authorized financial assistance that the State issues to any borrower for the purposes of investigation, treatment, or replacement of water or water systems impacted by PFAS contamination from culpable third parties that caused or contributed to such PFAS contamination. New Jersey intends to reuse and reapply recouped SRF funds to other water systems, sites and eligible recipients in the State that have been impacted by PFAS contamination or that are otherwise eligible for SRF financial assistance. New Jersey thus reserves its direct claims and causes of action to recover any financial assistance provided to recipients from those persons that caused or contributed to such PFAS contamination.

Likewise, payment of any SRF authorized financial assistance by the New Jersey will be subject to the State’s right to acquire by subrogation the rights, claims and causes of action of the Recipient to recover those SRF funds paid to Recipient, with interest, administrative costs, and attorneys’ fees and costs incurred by the State by reason of such claim, from those persons that caused or contributed to such PFAS Contamination, and Recipients will be required to reasonably cooperate with the State in any such action.

Energy and Water Efficiency

The Department is reserving funds and providing principal forgiveness loans for clean water projects that address water and energy efficiency goals and meet the eligibility requirements for water and energy efficiency as defined in [USEPA’s Green Project Reserve Guidance](#). Principal forgiveness funds will be allocated to Energy and Water Efficiency (EWE) projects on a readiness to proceed basis. There is a \$2 million cap of principal forgiveness for Energy and Water Efficiency projects per applicant in SFY25. Project sponsors are eligible to receive principal forgiveness for up to 50% of allowable costs and the equivalent of 25% interest free DEP loan and 25% I-Bank’s AAA Market Interest Rate loan funding for the first \$4 million of allowable costs.

Funding Package for Energy and Water Efficiency with PF up to \$4M

Allowable project costs over \$4 million will receive loan funding at the equivalent of 75% interest free DEP loan and 25% I-Bank’s AAA Market Interest Rate. A total of \$18 million in principal forgiveness will be available for Energy and Water Efficiency projects in SFY25. When the PF funds allocated to Energy and Water Efficiency projects in SFY25 are no longer available, the CWSRF funding package for Energy and Water Efficiency projects will consist of loan funding with the equivalent of 75% interest free DEP loan and 25% I-Bank’s AAA Market Interest Rate for allowable costs.

Funding Package for Energy and Water Efficiency w/ PF over \$4M and w/o PF

DEP Loan Share (No Interest)

75%

I-Bank Loan Share (AAA Market Rate)

25%

Example: A \$15M project qualifying under the Energy and Water Efficiency category would receive the following package:

<i>Project Cost</i>	<i>Principle Forgiveness</i>	<i>DEP Loan Share (Interest Free)</i>	<i>I-Bank Loan Share (AAA Market Rate)</i>
First \$4M (EWE)	\$2M	\$1M	\$1M
Next \$11M (EWE)	\$0M	\$8.25M	\$2.75M
Total (\$15M)	\$2M	\$9.25M	\$3.75M

Stormwater Resilience (ARPA)

For SFY24, the Department is reserving funds and providing principal forgiveness for priority stormwater management to improve stormwater infrastructure and enhance community resilience. A significant focus of these projects is the utilization of green infrastructure technology and nature-based solutions, particularly in overburdened communities. The primary objectives are to mitigate localized flooding and enhance the ecological health of waterways, goals that have gained urgency due to delays caused by the public health emergency. The allocation of funds will be based on a combination of the projects' priority ranking and their readiness to proceed basis.

There is no cap of principal forgiveness per applicant for Affordability projects in SFY25. Project sponsors are eligible to receive principal forgiveness for up to 80% of allowable projects costs and loan funding at the equivalent of 10% interest free DEP loan and 10% I-Bank's AAA Market Interest Rate.

Funding Package for Stormwater Resilience with PF

Principal Forgiveness

(No Cap)

80%

DEP Loan Share

(No Interest)

10%

I-Bank Loan Share

(AAA Market Rate)

10%

A total of \$20 million in principal forgiveness funds will be available for Stormwater Resilience projects in SFY25. When the PF funds allocated to Stormwater Resilience projects in SFY25 are no longer available, the CWSRF funding package will consist of loan funding with the equivalent of 80% interest free DEP loan and 20% I-Bank's AAA Market Interest Rate loan funding.

Funding Package for Stormwater Resilience without PF

DEP Loan Share (No Interest)
80%

I-Bank Loan Share (AAA Market Rate)
20%

Brownfield Redevelopment (Conduit/Public Private Partnership)

Brownfield redevelopment by private entities is eligible for a funding package that will consist of loan funding with a blended interest rate of 75% of the I-Bank AAA Market Interest Rate for allowable project costs. Private entities must have a public conduit that will sponsor the project. The funds will be allocated on a readiness to proceed basis.

DEP Loan Share (No Interest)
25%

I-Bank Loan Share (AAA Market Rate)
75%

Landfill Construction with a Water Quality Benefit

Construction projects at landfills that have a water quality benefit are eligible for the Base CWSRF financing package (50% of the I-Bank AAA Market Interest Rate). The funds will be allocated on a readiness to proceed basis.

DEP Loan Share (No Interest)
50%

I-Bank Loan Share (AAA Market Rate)
50%

Sandy Relief

Sandy Relief funds remain available for clean water facilities that were damaged by Superstorm Sandy and are constructing repairs or resiliency to prevent future damage to a treatment facility or water system from a similar event. Resiliency projects include elevating critical infrastructure, flood walls, backup power sources and more. Sandy Relief funds were made available in a one-time installment and offered while funds remain. It is expected that all remaining Sandy Relief funding will be allocated to the Linden Roselle Sewerage Authority's S340299-08 project. This project also qualifies for a Community Development Block Grants (CDBG) Loan which will be offered to qualifying projects in low to moderate income communities as a 100% DEP loan with principal forgiveness for the borrower of up to 25% of the total loan amount. For Sandy-related loans that accept US HUD Community Development Block Grant ("CDBG") funds, the Department may waive all or a portion of its 2% Loan Origination Fee to offset the cost of complying with HUD's additional requirements. If all the Sandy Relief funds are awarded in SFY25, new submittals will be eligible under the Base SRF loan structure.

Principal Forgiveness
Up to 25%

DEP Loan Share (No Interest)
75%

Pinelands Infrastructure Trust Financing Program

The NJWB expects to make loans to eligible clean water projects identified in the Pinelands Infrastructure Trust Fund Infrastructure Master Plan in SFY25. These loans will help local governments and utility authorities defray the costs associated with supporting the population and economic growth targeted to Pinelands Regional Growth Areas. Approximately \$15.9 million will be available from the Pinelands Infrastructure Fund for qualifying clean water, drinking water and transportation projects. Project financing will generally consist of 50% loan, 40% grant, and 10% local match. **In cases where a hardship has been identified, the local match may be waived, and the award will be allocated as 50% loan and 50% grant.** The Department is planning to capture any eligible clean water projects and utilize State Bond funds from the Pinelands Program as credit towards the State Match requirement or future State Match requirements.

Sponsors under state supervision

The Department may make a loan for 100% of the allowable project costs to: (a) municipalities that do not satisfy the New Jersey Infrastructure Bank credit policy but are subject to State financial supervision and oversight pursuant to the “Local Government Supervision Act (1947),” P.L.1947, c.151 (C.52:27BB-1 et seq.), or (b) municipal, county, or regional sewerage authorities, or utilities authorities, that do not satisfy the New Jersey Infrastructure Bank credit policy but where the municipal participant through its service agreement with the authority or utility is under State financial supervision and oversight pursuant to the “Local Government Supervision Act (1947),” P.L.1947, c.151 (C.52:27BB-1 et seq.), and the repayment obligation of the authority or utility is secured by the full faith and credit of the participating municipality pursuant to the service agreement.

Supplementary Information

Financial Relationships between the CWSRF and DWSRF

The federal Safe Drinking Water Act Amendments of 1996 offer states the flexibility to meet the funding needs for drinking water and wastewater facilities by transferring funds from one SRF program to the other. Annually, an amount up to 33% of the Drinking Water SRF Capitalization Grant may be transferred from the CWSRF program to the DWSRF program, or vice versa. The USEPA has issued guidance that would allow utilization of transfer credits and transfer of funds on a net basis (i.e., funds could be moved in both directions), provided that the final transferred amount does not exceed the authorized ceiling. Additionally, The Water Infrastructure Funding Transfer Act (WIFTA) allowed the State to transfer up to 5% of the cumulative clean water revolving fund, or approximately \$113M to the drinking water revolving fund to provide additional subsidy to eligible recipients for projects that abate exposure to lead in drinking water. New Jersey completed the \$113M maximum transfer amount allowed under WIFTA authority from the CWSRF to the DWSRF in SFY 2021.

The SRF program evaluates funds available to determine if adequate monies are available to be used for clean water projects in the current fiscal year. In addition, the type and number of DWSRF projects are reviewed and a determination is made on the need of the funds to be transferred from the CWSRF accounts to the DWSRF accounts or vice-versa. The Department reserves the right to transfer funds from the CWSRF to the DWSRF (or vice-versa) each fiscal year to the extent allowed by law, including Sandy SRF funds, and SRF funds awarded under the Bipartisan Infrastructure Law.

While all projects that meet the NJWB requirements and are ready to proceed have been able to receive a CWSRF loan in the past, the ability of the NJWB to continue to finance all qualifying projects in the future is uncertain because of a steady increase in program demand over the last several years. As such, if the Department determines that there is a shortage of available funds, the Department will utilize the remaining funds for high priority projects in accordance with the existing ranking methodology.

In addition to the potential transfer of funds between the CWSRF and DWSRF, the Department is continuing its policy to cross-collateralize the DWSRF with the CWSRF. This feature results in significant savings to project sponsors. This benefits the drinking water project sponsors since there is a large source of revenue available via the CWSRF repayments to cover possible loan defaults. Under the EPA-approved procedures associated with cross-collateralization, a temporary transfer of funds between the two SRFs may occur, if necessary, to cover the default of a loan repayment or other financial obligation. The Department and the I-Bank would take steps to collect any obligations resulting from a loan default and reimburse the appropriate drinking water or clean water account.

Additional SRF Provisions

Programmatic requirements are listed below. It is anticipated that these provisions will be maintained in a subsequent federal reauthorization act or federal policy. If substantial changes in the Act necessitate the Department's revision of the FFY 2024 document, additional public participation efforts will be conducted.

1. The schedule of state capitalization grant payments, jointly agreed upon by the administrator of the EPA and each state, is based upon the state's IUP.
2. States are required to deposit in the SRF, from state monies, an amount equal to at least 20% of the total amount of the FFY 2024 base capitalization grant made to the state. States are required to deposit in the SRF, from state monies, an amount equal to at least 20% of the total amount of the FFY 2024 BIL CWSRF General Supplemental capitalization grant made to the state. State match is not required for the FFY 2024 BIL CWSRF Emerging Contaminants capitalization grant.

3. Monies in the SRF may be used to provide loans at or below market interest rate, for terms not greater than 30 (or 35 or 45 (extended term, see below)) years or the useful life, whichever is less. Repayments must begin no later than one year after completion of the project and must be credited to the SRF (principal and interest). The recipient of a loan must establish a dedicated source of repayments.
4. Extended term financing will only be available for either (i) CSO projects for up to 45 years or (ii) projects included in a federal loan program such as WIFIA for up to 35 years. CSO projects include CSO conveyance, CSO storage basins, green or grey infrastructure that reduces the quantity of storm water runoff into the CSO system, sanitary sewer pipes associated with separating storm and wastewater sewers, etc.
5. The Department may, based on the availability of funds, establish a de minimis reserve (up to \$5 million) utilizing CWSRF funds to support CSO and/or stormwater management activities associated with a co-funded transportation project financed through the I-Bank.
6. The Department also administers the Pinelands Infrastructure Trust Financing Program, and the Department is planning to capture any eligible clean water projects and utilize State Bond funds from the Pinelands Program as credit towards the State Match requirement or future State Match requirements.
7. The NJWB is investigating opportunities to create a linked deposit program to finance individual septic system (on-site disposal system) repairs, rehabilitation, or replacement. This program is in its early stages of development.
8. States have the flexibility to use up to an amount equal to 2% of their annual CWSRF capitalization grants for the purpose of hiring staff, nonprofit organizations, or regional, interstate, or municipal entities to assist rural, small, and tribal publicly owned treatment works. The form of that assistance is flexible and could include, but is not limited to, community outreach, technical evaluation of wastewater solutions, preparation of applications, preliminary engineering reports, and financial documents necessary for receiving SRF assistance. This provision applies to the base program, the BIL CWSRF General Supplemental fund, and the BIL CWSRF Emerging Contaminants fund. States must include in the IUP the amount of the technical assistance funds they plan to use and a description of the activities they plan to fund. In the Annual Report and the SRF Reporting System, states must provide a detailed accounting of the use of the funds. The NJWB does not intend to use the technical assistance funds allowed under the FFY 2024 capitalization grants but reserves the right to utilize the unused funds at a later date.
9. The maximum annual amount of CWSRF money (not including any fees collected) that may be used to cover the reasonable costs of administering the fund is the greatest of the following: an amount equal to 4% of all grant awards to the fund received by a state CWSRF from 1988 through the current fiscal year less any CWSRF amounts that have been used in previous years to cover administrative expenses; \$400,000; or 1/5th percent of the current valuation of the fund. Per the CWA, states make this calculation once per year, taking into account all federal capitalization grants received that year. The NJWB intends to take \$5,293,680, the expected maximum amount available in SFY25 ($0.04 \times (\$93,000,000 \text{ (BIL SUP Cap Grant)} + \$8,689,000 \text{ (BIL EC Cap Grant)} + \$30,653,000 \text{ (Base Cap Grant)})$).

Appendix 1: Clean Water Priority System Ranking Methodology

Project Priority List — General Information

Clean water projects must be listed on the Project Priority List in order to be considered eligible for financial assistance under the CWSRF. The Priority List identifies the estimated total eligible building costs under the appropriate project category. Except for certain project types, the figure under the "Total Eligible Project Cost" includes the estimated total eligible building costs, the related costs for construction services (i.e., administrative, legal, engineering, inspection, one-year start-up services, etc.), the actual or estimated planning and/or design costs, 3% for the recipient's administrative costs, and a 5% contingency cost. The figure under the "Total State Amount" column represents 100% of the estimated total eligible project costs.

The Department has established a rolling application process and will update and post the Priority List up to four times during a fiscal year. The Department expects to notify potential borrowers and other interested parties upon each posting of an amendment to the Priority List on the DEP and I-Bank websites.

The Department began awarding ranking points in two new categories in SFY 2023 (Climate Resilience Measures and Environmental Justice Economic Overburdened Community Criteria). Project applications submitted after June 30, 2022, will be evaluated and, if eligible, awarded points in these new categories. Project sponsors that submitted applications prior to July 1, 2022, may submit documentation for consideration of ranking point awards in the new categories as well. Project scores for the new categories and updated rankings will be reflected in the next amendment to the Priority List.

Ranking Methodology

The Department assigns points to each project using the Project Priority System and ranks all eligible projects according to the total number of points each project receives. All projects are subsequently placed on the Project Priority Comprehensive List according to their ranking. Projects with more points are ranked above those with fewer points. The addition of new projects to the Project Priority Comprehensive List, periodic revisions to the Priority System, or the identification of new information regarding a project, may result in changes to an individual project ranking. Updated rankings based on changes to the priority ranking system will be reflected in the next amendment to the Priority List.

The principal elements of the Priority System are: A) Sustainable Community Planning Activities, B) Project Discharge Category, C) Water Use/Water Quality, D) Smart Growth Approvals, E) Environmental Justice Economic Overburdened Community Criteria, F) Population, and G) Established Local Employment Program. Points are assigned for each of the 7 priority categories, as applicable, and are discussed in more detail below.

The prospective applicant must notify the Department of any changes to project scope or any other circumstance that may affect the calculation of priority points. The Department recalculates, if appropriate, the prospective applicant's ranking utilizing the new information submitted and revises the priority ranking accordingly.

The ranking system gives highest priority to projects that address discharges of raw, diluted, or inadequately treated sewage to the state's waters during wet weather, including projects to abate CSOs and projects to address sanitary sewer systems that overflow. CSO abatement projects are expensive and are usually located in financially distressed urban areas, making cost a serious concern. Discharges from combined sewer systems and sanitary sewer overflows can impair water uses.

The Department's Priority List provides a strategic foundation for structural changes and includes objectives to implement projects that will help to protect, maintain, and improve water quality in and around the Barnegat Bay, while also determining the best long-term approach for restoring the ecological health of Barnegat Bay. To support

these efforts to improve the water quality of the Bay, the project ranking methodology for the SFY 2025 Financing Program provides an additional 300 priority points to nonpoint source and stormwater runoff control projects that are intended to benefit the Barnegat Bay. The additional 300 points will be assigned to wastewater reuse projects that are intended to offset the loss of freshwater flows caused by the regionalization of sewage treatment plants and the use of ocean outfalls.

A. Sustainable Community Planning Activities

The purpose of the provisions in this section is to encourage and facilitate implementation of environmentally sustainable practices at the local government level. Prudent environmental planning that incorporates sustainability measures is necessary to achieve cost-effective and environmentally sound water quality improvement within the watershed. Additional priority points will be awarded to projects located in or benefiting municipalities that have implemented programs and actions that go beyond compliance with existing regulatory requirements and incorporate the planning strategies discussed below.

Watershed-Based Implementation Plans: Watershed-Based Implementation Plans address impairment(s) found on Sublists 4 or 5 of the New Jersey Integrated Water Quality Monitoring and Assessment Report. Prudent watershed planning is necessary to achieve cost-effective and environmentally sound water quality improvement within the watershed. To provide an incentive for project sponsors to complete watershed-based plans that promote the implementation of point and nonpoint source pollution control projects that are consistent with Department goals, projects located in or benefiting municipalities that demonstrate implementation of watershed-based plans will be given an additional 50 priority points.

Implementation of Regional Stormwater Management Plans: Regional stormwater management plans are voluntary local analyses that provide targeted protection to a specific area based on local issues and conditions. Regional stormwater management plans are adopted into Water Quality Management Plans and may include specific implementation projects that address existing impacts of stormwater runoff. Projects located in or benefiting municipalities with adopted regional stormwater management plans will be provided an additional 50 priority points.

Sustainable Community Planning: Sustainable communities develop and adopt master plans and ordinances that improve the overall quality of life for citizens of today as well as future generations by planning within natural resource capacity constraints and providing for a healthy economy, environment, and society. Projects located in or benefiting municipalities where sustainable community strategies have been developed and master plans and/or ordinances adopted will be awarded an additional 100 priority points. These strategies/ordinances must include, but are not limited to, the following:

- A plan to reduce water consumption and increase water efficiency and re-use.
- Policies that require consideration of green design in municipal construction projects and redevelopment projects, such as green roofs, green streets, tree filters, rain gardens, rain barrels, porous pavements, etc. (Green design principles include green building practices that increase energy and water efficiency; use renewable energy; use environmentally friendly building materials that are made with recycled materials, are durable, sustainability harvested or produced locally; improve indoor air quality; and makes appropriate site selection and minimizes site disturbance to reduce environmental impacts.)

B. Project Discharge Category Points

All projects receive ranking points based on the project discharge category. In case of multiple purpose proposals, projects qualify for the discharge category that represents the major scope of the project. If a project has aspects that can be described by more than one category, the project may be broken into separate projects. Tables IA and IB show the project discharge categories and their corresponding ranking points.

**Table 1A: Ranking Points Related to Project Discharge Category
for Wastewater Treatment Facilities**

Project Discharge Category	Description	Points
Combined Sewer Overflow (CSO) & Sanitary Sewer Overflow (SSO)	Combined sewer system (CSS) rehabilitation/repair, the construction of treatment and/or storage facilities within CSS, at discharge locations or at STPs that reduce or eliminate CSOs, or the separation of combined sewer systems by the consolidation and elimination or sealing of CSO discharge points. Projects that implement corrective measures to fix overloaded conveyance systems that experience chronic overflows.	600
Sewage Treatment Plant (STP) Improvements	STP improvements include upgrades or other improvements to a treatment process or the elimination of an existing STP and the connection to an alternative treatment facility to meet applicable treatment levels and the purchase and installation of security and energy efficiency measures at the STP.	500
Sanitary Sewer System Rehabilitation	Wide variety of corrective measures to sanitary sewer collection and conveyance systems that do not experience chronic overflows, such as the rehabilitation, repair, or replacement of sanitary sewers, pump stations, interceptors, or the purchase of equipment to properly maintain the sanitary sewer system.	450
Sludge Treatment/Disposal Facilities	Projects involving the construction of facilities to manage sludge from STPs or from potable water treatment activities, such as the installation of dewatering equipment, the implementation of land application or composting activities or improvements or repairs to sludge incinerators.	350
Wastewater Reuse	The construction of facilities that promote the reclamation of water for beneficial reuse such as the use of treated effluent for agricultural or other purposes and/or construction of conveyance and distribution systems to allow for reuse activities.	300
Septic System Repair/Replacement	Projects that involve repairs, improvements, and/or replacement of individual or small community, on-site septic systems.	275
New Systems	The expansion of a STP's treatment capacity, and the construction of new facilities to provide collection, conveyance, or treatment of sanitary sewage.	250

Table 1B: Ranking Points Related to Project Categories for Stormwater and Nonpoint Source Pollution Management Facilities

Project Category	Description	Points
Stormwater Management and other NPS activities	The construction or rehabilitation of stormwater basins, sewer systems or storm drains, the extension of outfall pipes, green roofs, blue roofs, green streets, tree filters, rain gardens, rain barrels, porous pavement, or the purchase of maintenance equipment (such as street sweepers, aquatic weed harvesters and skimmer boats). Projects that stabilize streambanks, restore lakes or address runoff from salt storage facilities and the implementation of measures to address pollution concerns from agricultural cropland activities and manure runoff management and feedlot operations.	225
Landfill Closure, Open Space Land Acquisition and Conservation and Well Sealing	The implementation of measures to prevent and control pollutants from entering groundwater at non-operating landfill sites that are publicly owned and at abandoned well locations. Open space land acquisition and conservation projects that help to protect or maintain water quality.	150
Landfill Construction and Remedial Action Activities	The construction of facilities to collect, convey and/or treat leachate and runoff from publicly owned landfill cells or from publicly owned contaminated sites.	75
Projects sponsored by Conduit Borrowers/ Private Activity	Environmental infrastructure projects where a developer, LLC, partnership, or other private party is involved in the project; landfill closure measures and remedial action activities where the project site is privately owned. If a local government unit that sponsors a project on behalf of a private entity commits to providing a general obligation pledge (including its unlimited taxing power) or municipal guarantee as security for the Department and I-Bank loans, the project is considered exempt from the conduit financing classification and corresponding funding limitations.	50

In addition to the points awarded in Table 1A and 1B, points will be awarded to projects that meet the following criteria:

- Projects that implement green infrastructure, water, or energy efficiency improvements (including projects that are designed to reduce greenhouse gas emissions) will receive an additional 50 priority points if the green components represent a significant amount of the overall project activities.
- Projects implementing climate resilience measures will receive an additional 100 priority points if the resilience components represent a significant amount of the overall project activities. Resilience measures for wastewater, and stormwater infrastructure projects must apply the best available and most geographically relevant climate information, projections, and standards.

C. Water Use/Water Quality Points

Points are awarded based on the designated water uses of the receiving water as well as the existing water quality conditions in comparison to the ambient water quality standards. The assignment of points for “public nuisance” is given to on-site system projects where failures have been identified. Table II below shows the breakdown of the ranking points for water use; in general, the highest values are given for projects that discharge to water bodies with potable, recreational, and fishing uses.

Table II. Ranking Points Related to Water Use (Existing and Potential)		
Water Use		Basis/Description
Public Potable Water Supply		Wastewater treatment plant discharges likely to have adverse impacts on an existing downstream potable surface water supply intake. Projects are evaluated based on relative distance between STP discharge and public potable water intake locations.
Recreation (“Primary Contact”)		Waters with bathing areas monitored routinely as public beaches as well as the Delaware River upstream of Trenton (north of East Bridge Street at the Lower Trenton Bridge).
Fishing:	Shellfish	State water bodies that are designated as shellfish growing waters by N.J.A.C. 7:12.
	Trout	State freshwater bodies designated for trout production or maintenance by the NJ Water Quality Standards (N.J.A.C. 7:9B).
	Non-trout	State freshwater classifications not designated trout production or maintenance by N.J.A.C. 7:9B (see Trout description above), including all Delaware River freshwater zones above mile-point 85 as defined by the Delaware River Basin Commission.
Public Nuisance		Indirect water use impacts: applies to areas with identified on-site wastewater treatment system failures.
Agriculture		Surface water for agricultural use, such as irrigation and farm ponds, based on Department diversion permit (permits required for >70 gal/min diversion).
Industry		Surface water known to be used for industrial use such as cooling.

Table III shows the points for not meeting or marginally meeting certain water quality parameters. The points reflect the impact the parameters have on meeting the state’s goal to protect and enhance surface water resources, quality criteria, and designated water uses. The magnitude of the contribution that municipal sewerage facilities have on each of the conditions is reflected in the points awarded under these categories.

Nutrients reflect the presence of phosphorus/phosphates and nitrates/nitrites in a water body. Excessive nutrient levels in freshwater streams and lakes may result a decrease in water quality and an increase in treatment costs. Points are given for nutrients only if the surface waters involved significantly impact existing potable water reservoirs, surface water impoundments or lakes, public bathing areas, or shellfish growing waters. Since there are no nutrient standards for coastal and estuarine waters, no points were assigned for discharges to those water bodies.

Points for toxics address the relative magnitude of ammonia, metals, pesticides, and organic chemicals in the water body. Toxics were given lower points since in most cases the significant contributions of toxic substances come from

industrial sources that are better controlled through pretreatment and are only incidentally abated by municipal treatment facilities. In the case of the toxicity of ammonia, municipal facilities are usually the main source, but the most significant impact is associated with streams designated for trout production/maintenance, which already receive a high number of points under the water use category.

Table III. Ranking Points Related to Water Quality				
Water Quality		Points for Water Quality that		
		Meet	Marginally Meet	Do Not Meet
		The Water Quality Standard*		
Parameter	Dissolved Oxygen	0	50	100
	Fecal Coliform	0	50	100
Parameter	Nutrients	0	25	50
Category	Toxics	0	25	50

*The Surface Water Quality Standard for the applicable parameter or category.

D. Smart Growth Approvals

The Department seeks to coordinate and enhance the efforts to encourage smart growth through the implementation of the State Development and Redevelopment Plan. The Department assigns ranking points to eligible clean water projects consistent with an approved Water Quality Management Plan that serves municipalities that have been approved under the Center Designation or Plan Endorsement Process.

For a project serving more than one municipality, the points were included for ranking purposes if the designated center or the endorsed plan is a significant component of the overall project. For further information regarding the State Development and Redevelopment Plan, contact the Office of Planning Advocacy in the New Jersey Department of State at (609) 292-7156.

Table IV. Ranking Points Related to State Planning Commission Approvals	
Community Type	Points
Urban Centers and Complexes	50
Regional Centers	25
Existing Designated Towns	15
Existing Villages	10
Hamlets	5

Projects located in or benefiting areas designated as Brownfield Development Areas, Transfer of Development Rights receiving areas or Transit Villages receive 10 points, so that these projects will rank higher than similar projects that are not located in, or provide benefit to, these smart growth areas.

E. Environmental Justice Economic Overburdened Community Criteria

Projects are assigned 80 Environmental Justice Economic Overburdened Community Criteria points if at least 35%

of the households served by the project, on a municipal basis, qualify as low-income households (at or below twice the poverty threshold in accordance with the most recent United States Census as determined by the United States Census Bureau). A weighted economic OBC criteria is calculated for a project sponsor whose water system serves more than one municipality as shown in the example below. Population served is based on the permanent population of the service area. Consideration will be given for projects with a qualifying service area population within a municipality that does not meet the 35% threshold.

Example:

Municipalities Served	% low-income households	Populations Served	Fraction of total population served	Weighted % of low-income households
Lancaster	30%	5,000	0.167	5.01%
Mayberry	40%	10,000	0.333	13.32%
Hometown	35%	15,000	0.500	17.50%%
Total		30,000	1.00	35.83%

Please note for applicants that service more than 10 municipalities, the 10 municipalities that have the highest populations served will be considered in the above table for the affordability factor.

F. Population Points

Projects are assigned points based on the population of the area served by the project. One point is given for every 1 million people living year-round in the project area. Thus, if projects have the same number of ranking points after having received all eligible points, population points become the tiebreaker, with higher priority given to the project serving the larger population.

G. Established Local Employment Program

Projects are assigned one point to applicants that have an established program to employ at the project facility, or at related offices or facilities, persons who reside in the municipality in which the project is located, the service area of the project, or in surrounding municipalities that meet the criteria for State aid pursuant to P.L.1978, c.14 (C.52:27D-178 et seq.)”.

Appendix 2: Clean Water Affordability Criteria

Affordability Scoring Methodology

Section 603(i)(2) of WRRDA requires States to develop Affordability Criteria that will assist in identifying applicants that would have difficulty financing projects without additional subsidization. The law requires that states establish Affordability Criteria by September 30, 2015, after providing notice and an opportunity for public comment, which is being accomplished through this new feature of NJ's CW Intended Use Plan.

The list of municipalities meeting the Affordability Criteria and other resources related to Affordability will be posted to the Water Infrastructure Investment Plan (WIIP) website at:

<https://dep.nj.gov/wiip/nwb-process/how-to-apply/resources-and-guidance>

In New Jersey, those applicants that meet either of the following two criteria are considered to have satisfied the State's **CWSRF Affordability Criteria**:

1. **Project Affordability Score** of 80 or less; or
2. The project is eligible to receive 80 **Environmental Justice Economic Overburdened Community Criteria**

CWSRF ranking points.

Project Affordability Score = Project Median Household Income (MHI) Factor – Project Unemployment (UE) Factor – Project Population Trend (PT) Factor

Project MHI Factor = $100 \times (\text{Project MHI} / \text{State MHI})$ (Rounded down to the nearest integer)

Project UE Factor = 1 if Project Unemployment Rate > State Unemployment Rate

Project UE Factor = 0 if Project Unemployment Rate < or = State Unemployment Rate

Project PT Factor = 1 if Project Population Trend < State Population Trend

Project PT Factor = 0 if Project Population Trend > or = State Population Trend

Project Unemployment Rate is equal to the weighted unemployment rate of the project service area using service area populations and county unemployment data. Calculation is similar to weighted MHI example below.

Project Population Trend is equal to the weighted population trend for the project service area using service area populations and municipal population trend data. Calculation is similar to weighted MHI example below.

Consideration will be given for projects with a qualifying service area population within a municipality that does not meet the CWSRF Affordability Criteria.

All project Affordability Scores will be rounded down to the closest integral.

Data Sources:

MHI Percent - Municipal median reported household income (MHI) as a percent of the statewide MHI. The income reported is from the U.S. Census Bureau's 2017-2021 5-year ACS. Values are expressed in 2021 dollars. Values over 100 indicate that the municipality has a MHI greater than the state as a whole. Conversely, values under 100 show that the MHI in the municipality is lower than in the state. The statewide MHI used was \$89,703.

Municipal Unemployment - 2021 annual average municipal unemployment rate as provided by the New Jersey Department of Labor (https://www.nj.gov/labor/labormarketinformation/assets/PDFs/employ/uirate/mun_ann2010-2022.xlsx). These values are compared to the statewide annual average unemployment rate. The statewide annual average used for 2021 was 3.7%.

Population Change - The average annual rate of change in total population from 2010 to 2020, also provided by NJDCA in the [Municipal Revitalization Index](#). These values are compared to the statewide population change during that same period. The statewide rate of change used in this analysis was 5.7%.

A weighted MHI is calculated for a project sponsor whose clean water system serves more than one municipality, as shown in the example below. Population served is based on the permanent population of the water system service area.

Example:

Municipalities Served	MHI	Populations Served	Fraction of total population served	Weighted municipal MHI
Lancaster	30,000	5,000	0.167	5,000
Mayberry	20,000	10,000	0.333	6,660
Hometown	25,000	15,000	0.500	12,500
Total		30,000	1.00	24,160

Please note for applicants that service more than 10 municipalities, the 10 municipalities that have the highest populations served will be considered in the above table for the affordability factor.

A weighted unemployment rate for use in the UE Factor is calculated for a project sponsor whose clean water system serves more than one municipality/county, as shown in the example below. Population served is based on the permanent population of the water system service area.

Example:

Municipalities Served	County Unemployment Rate	Populations Served	Fraction of total population served	Weighted Municipal Unemployment Rate
Lancaster, County A	4.0%	5,000	0.167	0.668%
Mayberry, County A	4.0%	10,000	0.333	1.332%
Hometown, County B	6.5%	15,000	0.500	3.250%
Total		30,000	1.00	5.25% (Project Unemployment Rate)

Please note for applicants that service more than 10 municipalities, the 10 municipalities that have the highest populations served will be considered in the above table for the affordability factor.

A weighted population trend for use in the Population Trend Factor is calculated for a project sponsor whose clean water system serves more than one municipality/county, as shown in the example below. Population served is based on the permanent population of the water system service area.

Example:

Municipalities Served	Municipal Population Trend	Populations Served	Fraction of total population served	Weighted Municipal Population Trend
Lancaster	2.0%	5,000	0.167	0.334%
Mayberry	2.0%	10,000	0.333	0.660%
Hometown	-1.0. %	15,000	0.500	-0.500%
Total		30,000	1.00	0.494% (Project Population Trend)

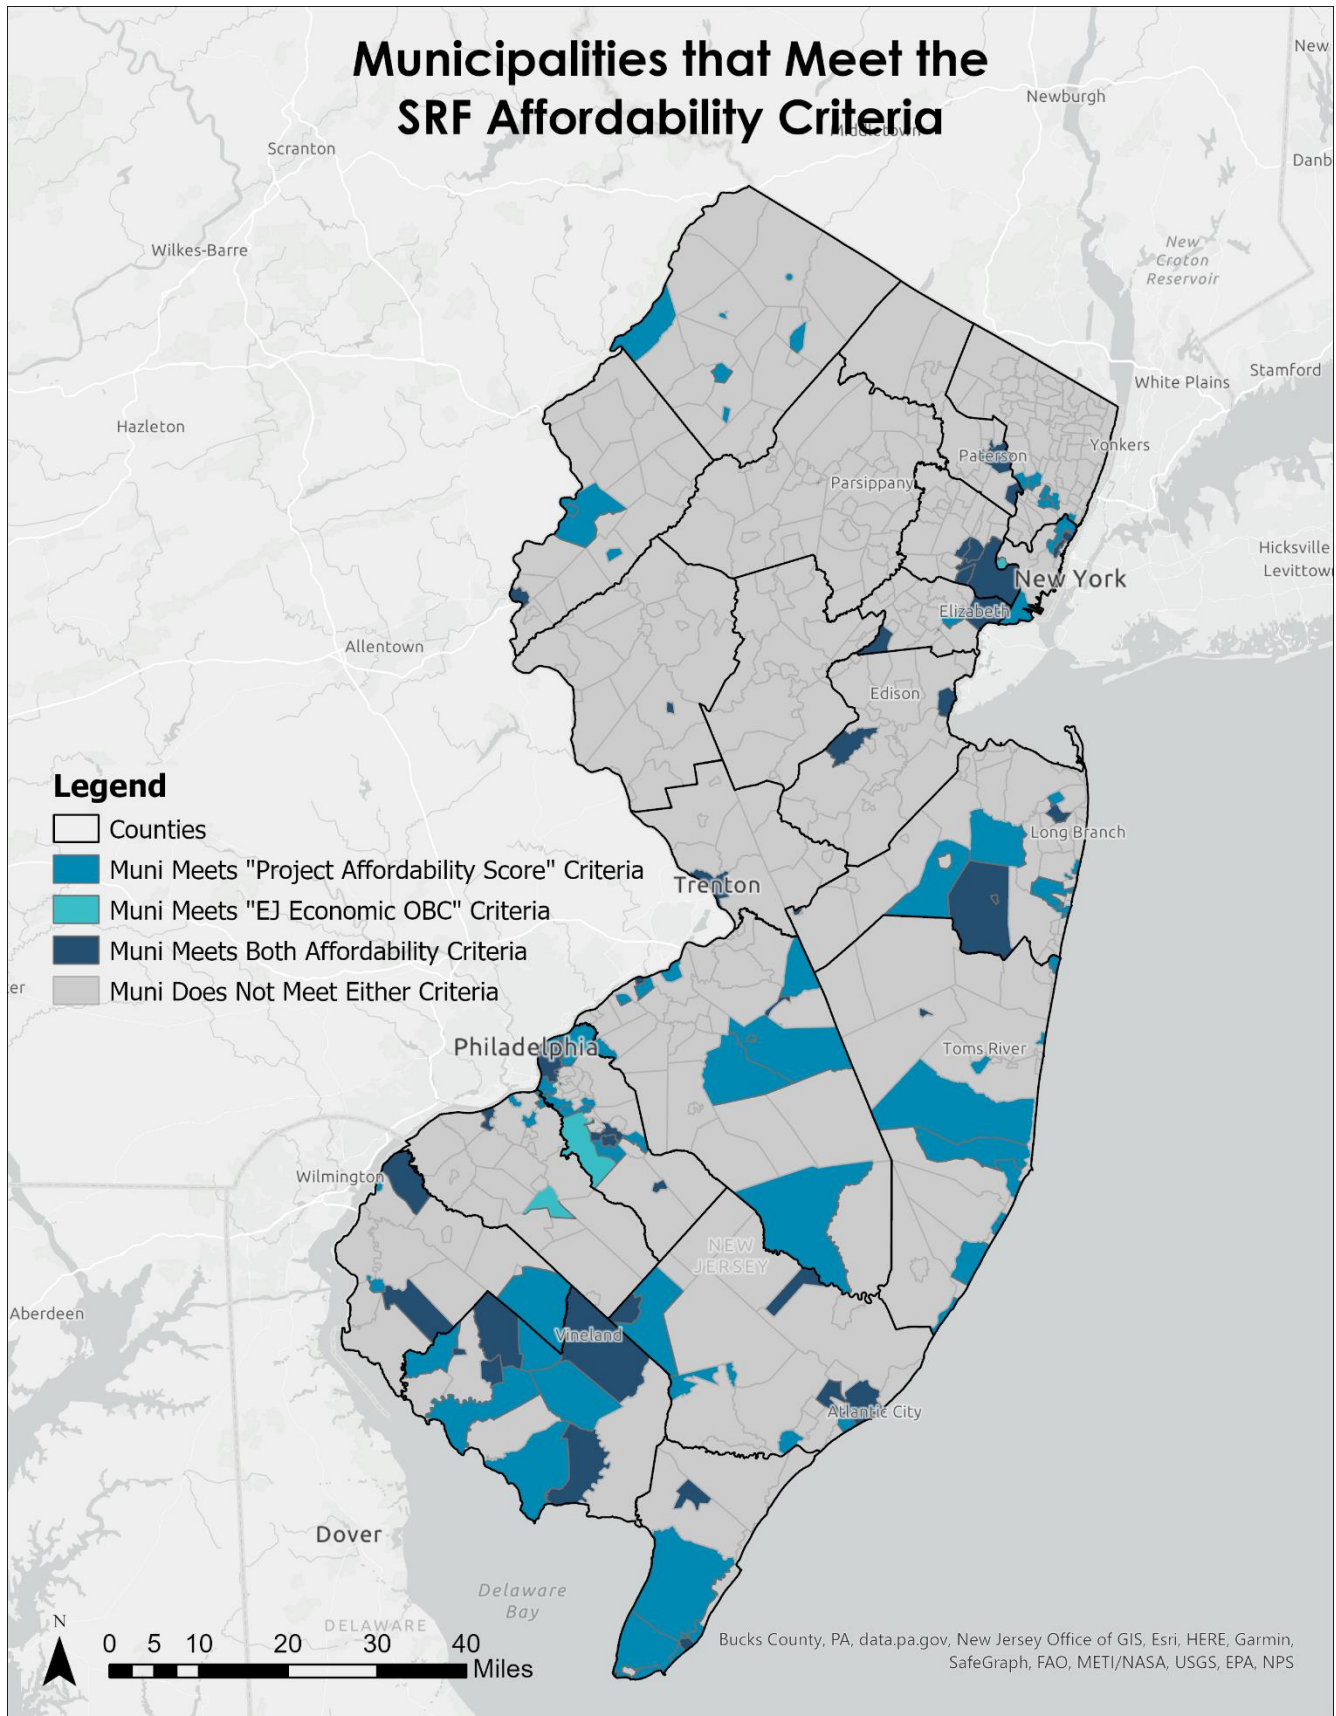

Please note for applicants that service more than 10 municipalities, the 10 municipalities that have the highest populations served will be considered in the above table for the affordability factor.

Tiered Affordability Packages

In an effort to equitably distribute financial assistance and support the most disadvantaged communities in New Jersey, the NJ Water Bank (NJWB) has implemented a tiered system for Affordability Scores. The tiered structure ensures that communities facing the highest economic challenges receive the most beneficial financial assistance. The NJWB has developed tiered Affordability funding packages to provide additional financial assistance to the most disadvantaged communities. The tiers are as follows:

- **Tier AC2 (Affordability Scores 66 to 80 and sponsors with Affordability Scores of 81 or above that meet the Environmental Justice Economic Overburdened Community Criteria):** This tier includes 72 municipalities that face certain economic challenges but are relatively more stable compared to those in Tier AC1. Projects in these communities continue to receive the same generous principal forgiveness that has been provided in previous years. This ensures ongoing support for these communities in their efforts to improve water infrastructure and public health.
- **Tier AC1 (Affordability Scores 65 or below):** Representing the most economically challenged segment, this tier comprises approximately 55 municipalities. These communities are approximately 10% of the most disadvantaged in New Jersey and are prioritized for enhanced financial assistance. The support for Tier AC1 surpasses that of Tier AC2, offering better financing packages, including significantly increased principal forgiveness. This heightened level of support is particularly focused on critical projects such as those addressing emerging contaminants, lead service line replacement, and other high-priority initiatives.

Municipalities that Meet the SRF Affordability Criteria

Appendix 3: Clean Water Project List (Combined - CWSRF Base, CWSRF General Supplemental, CWSRF Emerging Contaminants)

All projects on the list are eligible to receive CWSRF Base and CWSRF General Supplemental grant funds.

Projects designated (BIL EC) are eligible to receive CWSRF Emerging Contaminants grant funds and principal forgiveness.

Appendix 3 - Proposed Clean Water Project Priority List for Federal Fiscal Year 2024 (and State Fiscal Year 2025)

Genrerated on November 29, 2023

** All projects on the list are eligible to receive CWSRF Base and CWSRF General Supplemental grant funds.*
*** Projects designated (BIL EC) are eligible to receive CWSRF Emerging Contaminants grant funds and principal forgiveness.*

**STATE OF NEW JERSEY
PROPOSED FEDERAL FISCAL YEAR 2024 (SFY 2025) CLEAN WATER PROJECT PRIORITY LIST**
