### **NOTICE OF OPEN PUBLIC COMMENT PERIOD DRINKING WATER STATE REVOLVING FUND INTENDED USE PLAN**

Dear Interested Party:

The Department of Environmental Protection (Department) has prepared the following document for the administration of the Federal Fiscal Year (FFY) 2019/State Fiscal Year (SFY) 2020 Drinking Water State Revolving Fund:

#### **Proposed Amendments to the Final Federal Fiscal Year 2019/ State Fiscal Year 2020 Intended Use Plan**

The Intended Use Plan (IUP) must be developed by the Department, undergo a public participation process and be approved by the US Environmental Protection Agency (USEPA) for the Department to be awarded its capitalization grants used to finance water infrastructure projects.

In March 2019, the Department finalized the Drinking Water (DW) IUP for FFY2019, along with the DW IUP for FFY2018 and the Clean Water (CW) IUP for FFY2018, after a public comment period. The FFY2019 CWSRF IUP was proposed and finalized in a separate document. The Final documents are posted on the Department's web site at <http://www.nj.gov/dep/dwq/cwpl.htm> .

The March 2019 DW IUP included changes to fund projects based on project rank (vs. readiness-to-proceed), to ensure the highest priority (those impacting public health) projects would be funded with the available funds. The Department stated in the March 2019 DW IUP that for those projects that received an authorization to advertise after July 31, 2018, the Department will be determining financing availability and loan terms in priority ranked order in the Spring 2020 based on available funds.

However, uncertainty regarding funding and delays until Spring 2020 have posed challenges to drinking water systems that need these funds to move forward to address priority public health projects including MCL violations and Lead Action Level Exceedances (ALEs). Therefore, the

NJDEP is amending the FFY2019 DW IUP to establish timelines that will allow projects in the fundable range to move forward prior to Spring 2020. In addition, since the demand for drinking water funds for FFY2019 has been much higher than anticipated and exceeds the current amount of available funds, the Department is proposing to add a funding cap of \$25 million per applicant per year for publicly-owned water systems to ensure that the limited funds are distributed among multiple high priority projects. The project cap will not apply to projects over \$25 million that received an Authorization to Advertise for any portion of their project by September 1, 2019.

**A hearing on the Proposed FFY2019 DWSRF IUP will be held at the offices of the NJ Department of Environmental Protection, 401 E. State Street, Trenton, New Jersey, in the 1<sup>st</sup> Floor Public Hearing Room, on Tuesday, October 1, 2019. The hearing will commence at 10:00 a.m. and conclude at 12:30 p.m. or the end of testimony (whichever is sooner).** Presentations may be made orally or in writing; if written testimony is prepared, the oral presentation should be limited to a summary of the text. The period for submitting written comments on the proposal will close on October 8, 2019 (all comments must be received by that date). All comments submitted prior to the close of the comment period will be considered prior to finalizing the revised timelines in the FFY2019 DWSRF IUP.

Written comments on the **DWSRF IUP** should be sent to the following address:

Mail Code 401-04Q  
Patricia L. Gardner, Director  
Division of Water Supply and Geoscience  
PO Box 420  
401 East State Street, 4<sup>th</sup> Floor, West Wing  
Trenton, New Jersey 08625-0420

Or

**watersupply@dep.nj.gov** with “DWSRF Comments” in the subject line

The Proposed Priority System documents are posted on the Department’s web site at <http://www.nj.gov/dep/dwq/cwpl.htm> .

If you have any questions regarding the DWSRF IUP, please contact the following Department staff below:

Linda Doughty	Drinking Water SRF Project List and Policies	609-292-5550
Kristin Tedesco	Drinking Water SRF Project List and Policies	609-292-5550

Sincerely,

Patricia Gardner, Director  
Division of Water Supply and Geoscience

# NEW JERSEY'S ENVIRONMENTAL INFRASTRUCTURE FINANCING PROGRAM

*PROPOSED AMENDMENTS to the FINAL  
Drinking Water State Revolving Fund Intended Use Plan  
for Federal Fiscal Year 2019 (and State Fiscal Year 2020)*

New Jersey Department of Environmental Protection  
Water Resource Management  
Division of Water Supply and Geoscience  
Water System Operations Element

September 2019

***PROPOSED AMENDMENTS TO THE FINAL  
Drinking Water State Revolving Fund Intended Use Plan  
for Federal Fiscal Year 2019 (and State Fiscal Year 2020)***

The Priority System/Intended Use Plan (IUP) document must be developed annually, undergo a public participation process and be approved by the US Environmental Protection Agency for the State to qualify for State Revolving Fund (SRF) capitalization grants to support the New Jersey Environmental Infrastructure Financing Program (“Water Bank”).

In March 2019, the NJ Department of Environmental Protection (NJDEP) finalized the Drinking Water (DW) IUP for federal fiscal year (FFY) 2018 and FFY2019 and the Clean Water (CW) IUP for FFY2018 after a public comment period. The FFY2019/State Fiscal Year (SFY) 2020 CWSRF IUP was proposed and finalized in a separate document. Copies of the final March 2019 IUP can be found on the website at [www.nj.gov/dep/dwq/cwpl.htm](http://www.nj.gov/dep/dwq/cwpl.htm).

The March FFY2019 DW IUP provided information on how drinking water funds, available through the NJDEP and the NJ Infrastructure Bank (I-Bank), would be used to provide financial assistance for drinking water projects and identified State policies governing loan awards.

The March FFY2019 DW IUP included changes to fund projects based on project rank (vs. readiness-to-proceed), to ensure the highest priority (those impacting public health) projects would be funded with the available funds. The NJDEP stated in the March 2019 DW IUP that for those projects that received an authorization to advertise after July 31, 2018, NJDEP will be determining financing availability and loan terms in priority ranked order in the Spring 2020 based on available funds.

However, uncertainty regarding funding and delays until Spring 2020 have posed challenges to drinking water systems that need these funds to move forward to address priority public health projects including MCL violation and Lead Action Level Exceedances (ALEs). Therefore, the NJDEP is amending the FFY2019 DW IUP to establish timelines that will allow projects in the fundable range to move forward prior to Spring 2020.

Furthermore, the Department is proposing to add a funding cap of \$25 million per applicant per year for publicly-owned water system projects that have not received an Authorization to Advertise for a portion of their project on or before September 1, 2019. The Department is proposing the cap to ensure that limited funds are distributed among multiple high priority projects since the demand for drinking water funds for FFY2019 has been much higher than anticipated and exceeds the current amount of available funds. The Department is actively pursuing additional funding sources to address the increasing drinking water infrastructure financial needs and reserves the right to modify or waive the cap requirement should available funding increase. Further details on the revised funding timelines and cap are described below.

*“The New Jersey Water Bank is a partnership to... provide low-cost financing for the design, construction, and implementation of projects that help to protect, maintain and improve water quality.”*

## EXECUTIVE SUMMARY

Protecting and enhancing New Jersey's water quality and water infrastructure is vital to the State's health and economy. While often taken for granted, significant planning and investment is required to sustain and improve New Jersey's aging infrastructure systems. That cost often exceeds the capabilities of local water utilities. New Jersey's Water Bank is a permanent low-cost financing program available for an extensive range of water quality infrastructure projects. The NJ Water Bank administers New Jersey's Clean Water SRF (CWSRF) and Drinking Water SRF (DWSRF) under the federal Clean Water Act and Safe Drinking Water Act, respectively.

Established in 1988, the New Jersey Water Bank is a partnership between the DEP and the New Jersey Infrastructure Bank ("I-Bank") to provide low-cost financing for the design, construction, and implementation of projects that help to protect, maintain and improve water quality. It is a revolving/self-perpetuating loan program, in that SRF loan repayments are committed to finance future projects in perpetuity.

The priorities and policies of the NJ Water Bank are established through this IUP. Projects eligible for financing include a wide variety of wastewater treatment works, stormwater management, drinking water systems, land acquisition, and landfill activities.

The NJ Water Bank will continue to offer very attractive low-cost financing packages, including principal forgiveness (or grant-like funding), interest-free loans, and low interest loans for high priority projects.

Because of the success of the DWSRF program over the last two years, the NJ Water Bank has funded a record number of projects and currently has many more project applications in-house in FFY2018 than in previous years. Therefore, to accommodate the maximum number of these projects, and comply with the federal requirements, the NJDEP proposed amendments to the FFY2018/SFY2019 and FFY2019/SFY2020 IUPs to modify the DWSRF loan rates, the funding priority, and certain project set-asides in September 2018, and proposed additional changes in December 2018, with the required 30-day comment periods. The NJDEP responded to all comments regarding these proposed changes and finalized the DWSRF FFY2018/SFY2019 and FFY2019/SFY2020 IUPs in March 2019 with changes as noted below.

The current amendments to the timing of funding decisions applies to the final FFY2019/SFY2020 DW IUP only. Specifically, these changes will allow:

- All Lead service line replacement projects that are in the fundable range and qualify for principal forgiveness as of the date of the final IUP to proceed to a short-term loan closing after certification by NJDEP. The DEP has set aside \$30 million for principal forgiveness for LSL replacement projects. \$9 million of the \$30 million set aside has been committed to a LSL project that closed on a short term loan in SFY 2019.
- All projects in the fundable range as of January 1, 2020 to proceed on a short-term loan closing on a readiness to proceed basis in advance of Spring 2020 as follows:
  - Projects in the fundable range as of January 1, 2020 that do not receive an Authorization to Award by January 1, 2020 will be offered funding in SFY 2020 provided the project receives an Authorization to Award by March 1, 2020.

- Projects in the fundable range as of January 1, 2020 that fail to receive Authorization to Award by March 1, 2020 will be bypassed for the SFY2020 funding cycle and the fundable range will be extended accordingly. NJDEP will reach out to all applicants having projects in the January 1, 2020 fundable range asking to confirm readiness to proceed in SFY2020 or request to be bypassed to the next SFY. This will allow NJDEP to extend the fundable range by allocating funds from bypassed projects to the next ranked project.

Further details on the revised funding timelines are described on page 11.

The Department is also adding a funding cap of \$25 million per applicant per year for publicly-owned water systems to ensure that the limited funds are distributed among multiple high priority projects. This cap applies to publicly-owned water system applicants with projects receiving an Authorization to Advertise after September 1, 2019. The total project cost for funding may not exceed \$25 million per applicant per year and includes the cost funded at the base rate as well as the cost financed at an enhanced subsidization rate (Nano, affordability, lead line replacement). Projects will be funded in priority ranked order based on available funds. This cap does not apply to any projects that have received an Authorization to Advertise for a portion of their project on or before September 1, 2019, provided the scope of the project is not changed or expanded.

## PROGRAM SUMMARY

The DEP and the I-Bank made several changes to the DWSRF program in FFY2018 and FFY2019 and are continuing to support changes that include:

- 50% funding from the DEP at 0% interest and 50% funding from the Water Bank at the AAA market rate bond for publicly-owned water systems;
- 25% funding from the NJDEP at 0% interest and 75% funding from the Water Bank at the AAA market rate bond for privately-owned water systems;
- Funding in ranked order, not based on readiness-to-proceed as in past years to ensure the highest priority public health projects will be able to be funded in FFY2019 with the funds available;
- Maintains a loan repayment period of 30 years;
- Maintains the population cut-offs for the Nano program of 10,000 customers for principal forgiveness; and
- Continuation of the Asset Management Program for small systems with high-ranking projects.

### Continued Improvements Initiated in 2017:

#### Rolling Applications

Applications will be accepted anytime of the year.  
There are no submission deadlines.

#### Principal Forgiveness Funds

The Department will continue using any carryover principal forgiveness funds from 2017 and 2018 allocating principal forgiveness funds in SFY2019 as follows:

##### **LEAD SERVICE LINE REPLACEMENT PROGRAM**

Funding of lead service line projects will be in ranked order, with those systems exceeding the lead action level receiving the loan rates of 90% principal forgiveness, to replace lead lines in communities serving customers whose median household incomes are less than the county median household income. The loans are capped based on the population served (\$1M, \$5M, \$10M) per applicant/year. Other lead service lines projects will receive the base rate, affordability rate, or Nano financing.

##### **SMALL SYSTEM ASSET MANAGEMENT**

100% principal forgiveness to develop and implement asset management programs for small clean water systems and for small drinking water systems with a high-ranking project (\$100k cap).

##### **NANO**

50% principal forgiveness for small drinking water systems serving ≤ 10,000 residents, in addition to 25% DEP interest-free financing, and 25% I-Bank Market Rate financing.

## PROGRAM GOALS

**Short-term:** Provide funding to needed, construction ready, highly-ranked water quality improvement projects.

**Long-term:**

- Provide capital for water and wastewater infrastructure renewal to protect public health and the environment for multiple generations of New Jersey citizens;
- Continue serving as the Garden State’s premier source of environmental infrastructure financing through self-sustaining, efficient and transparent programs;
- Establish and efficiently manage a permanent source of funding for clean water and drinking water infrastructure projects;
- Provide project financing at a much lower cost than program participants could achieve individually thereby passing substantial savings on to New Jersey taxpayers and rate payers; and
- Increase access to capital markets for those participants that find it difficult or expensive on their own, due to lower credit ratings or a lack of familiarity with debt financing.

**Construction of Storage Tanks at the Jackson Twp. MUA**

## BORROWER ELIGIBILITY

The following project sponsors are eligible to receive drinking water related NJ Water Bank financing provided they satisfy the I-Bank and State of New Jersey creditworthiness standards:

### Drinking Water Borrowers

Public community water systems, both privately and publicly owned, and nonprofit noncommunity water systems (as defined by the National Primary Drinking Water Regulations) are eligible for Water Bank assistance. Public community water systems owned by water commissions, water supply authorities, and water districts are also eligible. Federally owned systems and State-owned systems (State agencies, such as State Police, Parks and Forestry, and Corrections) are not eligible to receive Water Bank assistance.

### Drinking Water Project Eligibility

The main objective of drinking water funding is to protect the public health in conformance with the objectives of the Safe Drinking Water Act. Types of eligible projects include:

- Projects to maintain compliance with existing regulations for contaminants with acute health effects (e.g. Surface Water Treatment Rule, Revised Total Coliform Rule) and existing regulations for contaminants with chronic health effects (e.g. Lead and Copper Rule)
- Full lead service lines replacement by systems with Lead Action Level Exceedance

**Drilling of a Drinking Water Well at the Berkeley Twp. MUA**

- Treatment of unregulated contaminants (contaminants that are currently not regulated under the SDWA rules, including contaminants of emerging concern for which there is no drinking water standard)
- Rehabilitate or develop sources to replace contaminated sources
- Treatment facilities
- Storage facilities
- Transmission and distribution pipes, including lead service line location and replacement, regardless of whether the system has ownership of the pipe.
- Projects that address the exceedance of a recommended upper limit for secondary contaminants.
- Purchase or consolidation (i.e., restructure) of a water system that is unable to maintain compliance for technical, financial, or managerial reasons.
- Emergency Repair Projects to replace, in kind, the failure of an essential portion of a public water system that will disrupt water service to any number of the public water system's customers for a minimum of 24 hours total and/or poses a substantial threat to the public health, safety, and welfare.

**Drinking water service line eligible up to the isolation valve**

### Security Monitoring

Projects designed to improve security at otherwise funding-eligible wastewater and drinking water facilities are eligible for funding, including but not limited to: Fencing

- Lighting
- Motion detectors
- Cameras
- Secure doors
- Alternative auxiliary power sources

### Continued Typical Planning & Design:

Planning & Design Loans cover costs incurred in the planning and design phase of a water infrastructure project. These loans are 0% interest. Eligible costs include engineering fees, surveys, environmental or geological studies, and other costs related to project plan preparation. The loans must be rolled into a Water Bank capital improvement project or repaid in 3 years.

# FFY2019 FUNDING PACKAGES (LONG-TERM LOANS)

Table 1: Long-Term 30 Year Funding Packages Breakdown – Drinking Water

<b>Drinking Water</b>	<b>DEP 0%*</b>	<b>I-Bank Market Rate**</b>	<b>Principal Forgiveness</b>	<b>Funding Cap</b>
Asset Management Plan Development	0%	0%	100%	\$100,000 <sup>1</sup>
Base DWSRF – Public	50%	50%	0%	\$25 million <sup>2</sup> (remainder at I-Bank market rate)
Base DWSRF – Investor-owned	25%	75%	0%	\$10 million (remainder at I-Bank market rate)
Small System (“Nano”) ≤ 10,000 customers	25%	25%	50%	\$1 million (remainder at 50/50 or 25/75)
Affordability (publicly-owned water systems only) <sup>3</sup>	75%	25%	0%	\$10 million (Remainder at base)
Lead Line Replacement <sup>4</sup>	10%	0%	90%	\$ 1, 5 or 10 million (depending on population served per eligible water system; remainder at applicable base rate)
Planning and Design	100%	0%	0%	NA

\*DEP

\*\*Water Bank portion of funding is at AAA market Rate

## Principal Forgiveness Funds

The DEP expects to use the maximum amount available for principal forgiveness utilizing SRF monies subject to federal restrictions. In addition to the SRF, the DEP may increase any amounts identified in the IUP reserved for principal forgiveness and adjust any caps if additional SRF or non-SRF funds (including Natural Resource Damages (NRD) recovered by the State and Corporate Business Tax (CBT)-diesel funds or subsidized financing received for eligible large dollar-value projects in coordination with the Water Infrastructure Finance and Innovation Act (WIFIA) to supplement principal forgiveness or low-cost loan funding. In addition, the DEP may bank any non-SRF financing towards future State Match requirements subject to EPA approval.

## Asset Management for Small Systems

The asset management funding will be available to small drinking water systems in FFY2019, with a high-ranked capital improvement project.

<sup>1</sup> \$100,000 principal forgiveness for a small system (≤10,000) asset management plan development with a resulting capital improvement project that ranks high enough to qualify for funding. Large systems are also eligible for DEP 100% loans (no PF) asset management funding, funded in ranked order.

<sup>2</sup> The total project cost for funding may not exceed \$25M per applicant per year and includes the cost of funded at the base rate as well as the cost financed at an enhanced subsidization rate (Nano, affordability, lead line replacement).

<sup>3</sup> Systems serving municipalities with MHI ≤ 65% State MHI (2010 census).

<sup>4</sup> Water systems that exceed the lead action level are eligible to receive the lead line replacement funding, in project priority order according to ranking assigned by the priority ranking system (see Appendix 1). PF Funding is capped per applicant/year.

DEP expects to make SRF or non-SRF funds available in the form of principal forgiveness through the NJ Water Bank and cap the amount at \$100,000 per applicant. A total of \$1 million in principal forgiveness funds (plus any of the \$1M reserved last year for Asset Management Plan that remains unobligated at the end of SFY18) is available for this purpose in SFY19 and SFY20. A high-ranked capital improvement project must be implemented to be eligible for the asset management program, but the larger systems are eligible for short-term, interest-free loans, with a capital improvement project. The DEP reserves the right to use these funds to hire a contractor to provide technical services to small communities for asset management.

### Replacement of Lead Service Line Set-Aside Program

The existence of lead service lines in some of our aging drinking water infrastructure poses potential risk to public health. This risk can be significantly reduced through the identification and replacement of lead service lines. Lead service line replacement projects will be funded in priority ranked order, with those water systems exceeding the action level receiving priority. Water systems that do not exceed the lead action level but want to replace lead pipes are eligible for Water Bank base programs in ranked order.

### Eligibility for Principal Forgiveness

The DEP has set aside \$30 million for principal forgiveness for LSL replacement projects. Water systems that have exceeded the lead action level that serve communities with a median household income (MHI) less than the median household income for the county in which they are located are eligible for principal forgiveness through NJDEP's lead line replacement program. The MHI is calculated using 2017 Census data, in accordance with data obtained from <https://www.census.gov/quickfacts/NJ>. Loans will be offered as 90% principal forgiveness and 10% funding from the DEP at 0% interest. Project applicants are capped at \$1, 5 or 10 million per water system (PWSID)/per year based on the population served by the water system. Specifically,

- \$10M (\$9M principal forgiveness) for systems serving populations >100,000
- \$5M (\$4.5M principal forgiveness) for systems serving populations >10,000
- \$1M (\$900K principal forgiveness) for systems serving populations ≤10,000

The balance of financing will be provided at the applicable base rate.

Currently, \$9 million of the \$30 million set aside has been committed to a LSL project that closed on a short term loan in SFY 2019.

### Criteria for receiving a Water bank loan for LSL replacement

The following criteria must be met for the project to be eligible for Water bank loans:

- Be able to document the presence of lead pipes and components
- Lead pipes and components are defined as containing at least 90% or more lead by weight.
- Provide documentation through historic records that the lines to be replaced are lead. Acceptable records include information on the age of the houses and high probability of lead lines and components being present, line installation records, etc.
- Partial lead line replacements are not allowable.

### Nano Loan Program

In FY2018, small systems will be funded in ranked order. \$4 million, subject to any state and federal limitations, is available for loans to small water systems serving 10,000 or fewer customers in FFY2018/SFY2019 and \$4 million in FFY2019/SFY2020. These loans are offered at 50% as principal forgiveness, 25% DEP interest-free, and 25% I-Bank market rate. Projects are capped at \$1 million. Additional financing is available at 50% DEP interest-free and 50% I-Bank market rate (publicly-owned) or 25% DEP interest-free and 75% I-Bank market rate (privately-owned) for amounts greater than the \$1 million cap. These projects are selected based on priority ranked order. In addition, the Department intends to prioritize small water systems with projects that have secured federal/non-profit grants to be leveraged with SRF funding.

### Small Water System Engineering Contract Program

Under a \$400,000 contract with the NJDEP and the New Jersey Water Association (NJWA), funded through a DWSRF set-aside, small water systems that serve fewer than 3,300 persons are provided with engineering services needed to close on a Water Bank loan. Under the terms of this contract, NJWA partners the small water systems with engineering firms to complete project milestones, including permitting, submittal of the Environmental Decision Document (EDD) and loan closing. When these projects are ready for financing, they will be ranked, and financed to the extent that the DEP can accommodate their loan requests under the Nano program.

### Community Engineering Corps

DEP is partnering with the Community Engineering Corps to identify water systems that serve fewer than 500 persons and need assistance to come into compliance. \$2 million of SRF funds is being made available for this program. 100% principal forgiveness loans will be available to those systems that are assisted by the Community Engineering Corps, with a cap of \$500,000 per project. The DEP will not charge permit fees to these small systems.

## Financing Options

The NJ Water Bank offers the following low interest financing options for eligible projects.

### Base DWSRF

At the time a project is at or near construction completion, long-term financing will be issued.

The DEP made changes to the DWSRF base program shares for the financing package wherein 50% of the allowable project costs for publicly owned water systems are provided by the DEP interest-free and 25% of the allowable project costs for privately-owned water systems are provided by the DEP interest-free and the remaining allowable project costs financed by the I-Bank. Project applicants for privately owned water systems are capped at \$10 million per project. Project costs over \$10 million can be financed by the I-Bank.

In addition to water system ownership (publicly-owned vs. privately-owned), water system loan rates will be determined based on affordability criteria as described in Appendix 1. The DEP determined that for the purposes of the DWSRF Program, a municipality whose median household income equal to or less than 65% of the State's MHI (New Jersey's MHI was \$68,911 as reported in the 2010 Census) is a Disadvantaged Community. The publicly-owned water systems serving these communities will receive a funding package of 75% DEP/25% I-Bank.

Project sponsors are only eligible for one enhanced subsidization rate (Nano, affordability, or PF for lead service line replacement) per capital project up to the specified project caps. The remainder of project costs are financed at the applicable base rate.

### Project Caps

The Department has added a funding cap of \$25 million (per applicant/per year) for FFY2019 for publicly-owned water systems to ensure that multiple high priority drinking water projects receive funding. This cap applies to any projects that have not received an Authorization to Advertise for a portion of their project on or before September 1, 2019. The total project cost financed, including any portion of the project financed at the base rate and financed at an enhanced subsidization rate (Nano, affordability, lead line replacement) may not exceed \$25 million. This cap does not apply to any projects that have received the Authorization to Advertise for a portion of their project on or before September 1, 2019, provided the scope of the project is not changed or expanded as those projects would otherwise be adversely affected.

The Department is actively pursuing additional funding sources to address the increasing drinking water infrastructure financial needs and reserves the right to modify or waive the cap requirement should efforts be successful.

### Revised Drinking Water Financing Timeline

For the DWSRF FFY2018/SFY19 and the FFY19/SFY20 program, funding decisions will be based on the DWSRF Project Priority List, as determined by the DWSRF Project Ranking methodology in Appendix 1. For those projects that received an authorization to advertise after July 31, 2018, DEP will be determining financing availability and loan terms in priority ranked order based on available funds. As stated in the final March 2019 DW IUP the NJDEP intended to hold off on funding decisions until Spring 2020. However, these delays have presented challenges to the priority projects, listed in Appendix 1, that are imperative to the protection of public health. Therefore, the NJDEP determined that amendments to the March 2019 DW FFY2019 IUP are necessary to move forward with all projects in the fundable range in an expedited timeframe. An outline of the proposed schedule for funding decisions is as follows:

- All lead service line replacement projects that are in the fundable range and qualify for principal forgiveness as of final date of these IUP changes will be allowed to proceed to a short-term loan closing after certification by the NJDEP.
- All projects that are in the fundable range as of January 1, 2020 would be allowed to proceed to a short-term loan closing after certification by the NJDEP on a readiness to proceed basis. Note that the actual number of projects in the fundable range could expand or contract as loan closing bids are received and total low bid allowable project costs are evaluated.
- Projects in the fundable range that do not receive an Authorization to Award by January 1, 2020 will be offered funding in SFY 2020 provided the project receives an Authorization to Award by March 1, 2020. After March 1, 2020, projects in the fundable range that fail to receive Authorization to award will be bypassed for the SFY2020 funding cycle and the fundable range will be extended accordingly.
- NJDEP will reach out to all projects within the fundable range asking to confirm readiness to proceed in SFY2020 or request to be bypassed to the next SFY. This will allow NJDEP to

extend the fundable range by allocating funds from bypassed projects to the next ranked project.

- The NJDEP has included the current project priority list in Appendix 3. Updates to this list will be published in the final revisions to this IUP and again on January 1, 2020 to allow water systems to track their likelihood of funding as the DEP assesses the status of current projects on the list and any new projects that are submitted prior to the January 1, 2020 deadline.

### Planning and Design

The Water Bank is offering 100% interest-free financing for up to three years through the planning and design loan program. Planning and design include projects such as the development of asset management plans. Loans are given with the expectation that such plans will result in an eligible capital improvement project.

### SAIL Program

The Statewide Assistance Infrastructure Loan (SAIL) program is a disaster relief loan program designed for project sponsors that anticipate receiving FEMA or other federal disaster relief grants. The SAIL program's goal is to provide timely and cost-effective funds, in advance of federal reimbursements, to expedite and support the impacted communities' recovery and rebuilding of environmental infrastructure. SAIL finances projects within a declared disaster area to rebuild water systems directly impacted by a declared disaster as well as costs associated with improving the resiliency of Clean Water and Drinking Water systems, regardless of direct disaster impact.

### Short-Term Loans

All projects are encouraged to secure short-term loans at the time of execution of an engineering design contract for the entirety of the project (planning, design, and construction). Funding will be committed upon certification of each operable segment and satisfaction of the program's credit worthiness standards. Such loans are currently at 0% interest for terms of up to 3 full fiscal years.

# Noteworthy Program Features

## Application

All applications are submitted on the H2LOans website ([h2loans.com](http://h2loans.com)). To create an H2LOans account, the project sponsor's authorized official will need to call the Water Bank at 609-219-8601 for security reasons. The authorized official can then designate a project manager (authorized representative) to submit required information. Application deadlines have been removed and rolling applications are being accepted any time of the year.

[H2LOans Tutorial Video](https://www.youtube.com/watch?v=UgDDV_SyqL0) ([https://www.youtube.com/watch?v=UgDDV\\_SyqL0](https://www.youtube.com/watch?v=UgDDV_SyqL0))

## Loan Awards

Loan awards for new projects will be made in FFY2019/SFY2020 in accordance with [N.J.A.C. 7:22-3, 4, and 5 9](#) (<http://www.nj.gov/dep/dwq/722.htm>). The loan term for DWSRF projects will be 30 years but cannot exceed the useful life of the project.

Local government units are required to meet the technical, administrative, and environmental provisions of the rules of DEP and the Water Bank ([N.J.A.C. 7:22-3, 4, 5, 8, 9, and 10](#) <http://www.nj.gov/dep/dwq/722.htm>). Disbursement and loan repayment provisions must be consistent with the rules.

## Pre-award Approvals/Emergency Projects

Eligible projects can qualify to receive pre-award approvals if the requirements of the rules ([N.J.A.C. 7:22-3.32 and 4.32](#) <http://www.nj.gov/dep/dwq/722.htm>) are met and if executed contracts to implement the project have been received by DEP.

## DEP & I-Bank Fee

In accordance with the USEPA Policy on Fees Charged on Assistance Provided Under the SRF Programs, states must disclose information regarding the assessment and use of any fees associated with SRF activities that are passed on to the program participants. In New Jersey, DEP reserves 4% of the annual SRF capitalization grant to cover a portion of the administrative costs of administering the program. In addition, the annual legislation for the SFY2006 Program established a "Department Loan Origination Fund" that is administered by the Water Bank. The DEP now has a stable fixed fee of 2% of the participant's loan amount. No SRF funding is involved in DEP's loan origination fee. DEP's loan origination fee is not included in the principal amount of the CWSRF and DWSRF loan and is separately accounted for.

The Water Bank's loan is issued at the same market interest rate as the Water Bank obtains from the sale of its bonds. Rather than bonding for all the eligible closing costs associated with each financing, the I-Bank charges the borrowers a one-time charge of 0.1% of the principal Water Bank loan amount to partially cover the costs associated with that particular series' bond issuance expenses. These costs include such activities as: bond counsel, financial advisor, rating agencies, printing and publishing of the Notice of Sale, the Preliminary Official Statement, the Official Statement, and other costs related to the Water Bank's bond sale. In addition, the Water Bank charges an annual administrative fee of 0.3% of the Water Bank's bond principal loan amount to cover the balance of the closing cost and the annual operating expenses associated with the operations of the Water Bank and the on-going costs associated with the loan servicer and Trustees. The Water Bank's annual administrative fee is not included in the principal amount of the loan and is held in an account outside of the SRF. The Water Bank is evaluating its existing fee structure and considering a return to an annual administrative fee equal to 0.30% on 50% of a borrower's total loan

amount. Any changes to the Water Bank’s fee annual structure are subject to all applicable approvals and publication in the SFY2019 Financial Plan in May of 2018.

**Sources and Use of Funds**

The Table below represents estimated amounts available from prior program years and anticipated uses for the FFY2019/SFY2020 Drinking Water Environmental Infrastructure Financing Program:

**UPDATED ESTIMATES FOR DRINKING WATER PROGRAM ONLY:**

**SFY2019 Financing Program**

**Anticipated Sources:**

Funds Available from prior years	\$ 48 M
Repayments from prior years' loans	\$ 38 M
FFY2018 DW SRF Grant	\$ 16 M
<u>CW to DW Transfer</u>	<u>\$ 6 M</u>
Subtotal	\$ 108 M
Anticipated I-Bank Share (est. 50%)	\$ 108 M

**Total Program Sources: \$ 216 M**

**Anticipated Uses:**

Projects to be Financed in the SFY2019 Program	\$ 216 M*
--	-----------

**SFY2020 Financing Program**

**Anticipated Sources:**

Funds Available from prior years	\$ 0 M
Repayments from prior years' loans	\$ 38 M
FFY2019 DW SRF Grant	\$ 16 M
<u>CW to DW Transfer</u>	<u>\$ 6 M</u>
Subtotal	\$ 60 M
Anticipated I-Bank Share (est. 50%)	\$ 60 M

**Total Program Sources: \$ 120 M**

\* Current DWSRF obligations and project applications exceed this amount.

**Financial Relationships between the CWSRF and the DWSRF**

The federal Safe Drinking Water Act Amendments of 1996 offer states the flexibility to meet the funding needs for drinking water and wastewater facilities by transferring funds from one SRF program to the other. Annually, an amount up to 33% of the DWSRF Capitalization Grant may be transferred from the CWSRF program to the DWSRF program, or vice versa. The EPA has issued guidance that would allow

utilization of transfer credits and transfer of funds on a net basis (i.e., funds could be moved in both directions), provided that the final transferred amount does not exceed the authorized ceiling.

The SRF program evaluates funds available to determine if adequate monies are available to be used for clean water projects in the current fiscal year. In addition, the type and number of DWSRF projects are reviewed and a determination is made on the need of the funds to be transferred from the CWSRF accounts to the DWSRF accounts or vice-versa.

DEP reserves the right to transfer funds from the CWSRF to the DWSRF (or vice-versa) each fiscal year to the extent allowed by law, including Sandy SRF funds. While all projects that meet the program requirements and are ready to proceed have been able to receive a CWSRF or DWSRF loan in the past, the ability of the programs to finance all qualifying projects in the future is uncertain because of reduced federal funding levels and the increase in the demand for the limited DWSRF funds.

In addition to the potential transfer of funds between the CWSRF and DWSRF, DEP is continuing its policy to cross-collateralize the DWSRF with the CWSRF. This feature results in significant savings to project sponsors and benefits the drinking water project sponsors since there is a large source of revenue available via the CWSRF repayments to cover possible loan defaults. Under the EPA-approved procedures associated with cross-collateralization, a temporary transfer of funds between the two SRFs may occur as if necessary to cover the default of a loan repayment or other financial obligation. DEP and the Water Bank would take steps to collect any obligations resulting from a loan default and reimburse the appropriate drinking water or clean water account.

#### Additional SRF Provisions:

Programmatic requirements are listed below. It is anticipated that these provisions will be maintained in a subsequent federal reauthorization act or federal policy. If substantial changes in the Act necessitate DEP's revision of the FFY2018 document, additional public participation efforts will be conducted.

1. The schedule of state capitalization grant payments, jointly agreed upon by the administrator of the EPA and each state, is based upon the state's IUP.
2. States are required to deposit in the SRF, from state monies, an amount equal to at least 20% of the total amount of all capitalization grants made to the state.
- 3.
4. Monies in the DWSRF may be used to provide loans at or below market interest rate, for terms not greater than 20 years or the useful life, whichever is less. . Repayments must begin no later than one year after completion of the project and must be credited to the SRF (principal and interest). The recipient of a loan must establish a dedicated source of repayments.

Section 1452 of the federal SDWA authorizes the states to provide funding for certain non-project activities, as long as the amounts do not exceed ceilings specified in the statute. The non-project set-asides provide for DWSRF activities that are not construction related and include administration of the DWSRF, technical assistance for small systems, state public water system supervision (PWSS) programs, source water program administration, capacity development, and operator certification. Each state must have a capacity development and operator program, or EPA may withhold up to 20% of the annual capitalization grant.

The DEP issued a workplan for the FFY2018 non-project set-asides on June 15, 2018 which was distributed to community and nonprofit noncommunity water systems and other stakeholders for a 30-day comment period. The DEP did not receive any comments on the FFY2018 non-project set-aside workplan. This final

workplan was submitted as an attachment to the FFY2018 Capitalization Grant. The DEP was awarded the Capitalization Grant in September 2018.

The Table below represents the amounts of the available sources and anticipated uses for certain non-project activities:

<u><i>Funds Available</i></u>	<u><i>FFY 2018</i></u>
Federal Capitalization Grant	\$ 18,957,000.00
State Match	
20%	\$ 3,791,400.00
<b>Projected Expenditures</b>	
Administration (net position)	\$ 979,451.00
Non-project Set-asides	\$ 1,849,961.00
Small System Tech Assistance (2%)	\$ 183,708.00

# APPENDIX 1: DRINKING WATER PROJECT RANKING

## METHODOLOGY

Table 1 of Category A lists the types of projects eligible for DWSRF funding. A project must be assigned points from Category A to be eligible for ranking; points assigned from the remaining categories are in addition to the points received in Category A. Priority points are assigned only if the project scope includes actual repair, rehabilitation, or correction of a problem or improvement clearly related to priority Category A. Projects that include multiple elements, as listed in priority Category A, are separately listed by the elements involved and priority points assigned for each element.

DEP assigns points to each project using the Project Priority System and ranks all eligible projects according to the total number of points each project receives. All projects are subsequently placed on the Project Priority Comprehensive List according to their ranking. Projects with more points are ranked above those with fewer points. The addition of new projects to the Project Priority Comprehensive List, periodic revisions to the Priority System, or the identification of new information regarding a project, may result in changes to an individual project ranking.

The principal elements of the Priority System are: A) Compliance and Public Health Criteria, B) Water Supply Plans/Studies, C) State Designations, D) Affordability, and E) Population. Points are assigned for each of the five priority categories and are discussed in more detail below.

The order of project priority for funding is as follows:

1. Emergency Projects are considered a public health hazard and receive funding over other projects on the Comprehensive Priority List;
2. Surface Water Treatment Rule violations including uncovered finished water reservoirs;
3. MCL and Lead Action Level Exceedances;
4. Unregulated contaminants (contaminants of emerging concerns);
5. Small Systems serving less than 10,000 persons, up to 15 % of DWSRF Funds;
6. Projects that have secured federal/non-profit grants to be leveraged with SRF funding,
7. Other projects currently on the comprehensive list.

The prospective applicant must notify DEP of any changes to project scope or any other circumstance that may affect the calculation of priority points. DEP recalculates, if appropriate, the prospective applicant's ranking utilizing the new information submitted and revises the priority ranking accordingly.

Points are assigned for each of the five priority categories discussed below, as applicable.

### Category A. Compliance with the SDWA and Protection of Public Health

DWSRF funds are utilized to address contamination problems and to ensure compliance with the SDWA requirements. Priority is given to water systems in non-compliance with the surface water treatment requirements and those incurring acute primary maximum contaminant level (MCL) violations, or action level exceedances as defined in the National Primary Drinking Water Regulations and the New Jersey Safe Drinking Water Regulations (N.J.A.C. 7:10). Table 1 describes the project elements that are eligible for DWSRF funds:

TABLE 1. Project Elements Eligible for  
Project Priority Ranking in the Drinking Water State Revolving Fund Program<sup>5</sup>

1.	Systems that utilize surface water that are not in compliance with the surface water treatment requirements or have had any acute violations (either <i>E. coli</i> or nitrates) and have been issued an administrative order or directive by DEP requiring the correction of any noncompliance of its treatment facilities to address an immediate public health threat.	500 Points
2.	Systems that utilize groundwater under the direct influence of surface water, that are not in compliance with the surface water treatment requirements or have had any acute violations (either <i>E. coli</i> or nitrates) and have been issued an administrative order or directive by DEP requiring the correction of any noncompliance of its treatment facilities to address an immediate public health threat.	350 Points
3.	Systems that utilize groundwater that have had any acute violation (either <i>E. coli</i> or nitrates).	300 Points
4.	Systems that have had, or DEP reasonably expects to have, any primary maximum contaminant level (MCL) violations (except acute violations) or exceedance of action levels (Lead and Copper Rule).	250 Points
5.	Systems that have, or DEP reasonably expects to have, exceeded a groundwater quality criterion, guidance, or advisory as deemed applicable by the DEP.	200 points
6.	Systems that were classified as vulnerable, because of a 2007 DEP Interconnection Study.	200 Points
7.	Systems that have been issued a notice of noncompliance by DEP for reasons other than water quality; i.e. inadequate storage, inadequate source, lack of emergency power, etc.	175 Points
8.	Purchase and/or consolidation of a water system to comply with the SDWA for capacity development.	170 Points
9.	Systems that are proposing improvements for drought or other related water supply management initiatives, as identified or designated by the State.	160 Points
10.	Systems that have lost well capacity due to saltwater intrusion and a solution is needed to preserve the aquifer as a viable aquifer.	150 Points

---

<sup>5</sup> A project must be assigned points from Category A to be eligible for Project Priority List ranking; points assigned from Categories B through E supplement the points received in Category A.

11. Extension of water mains, including associated appurtenances and water system facilities, to private wells that have had any maximum contaminant level exceedances or have exceeded lead and copper action levels. 125 Points
12. Existing treatment facilities that need to be rehabilitated, replaced, or repaired to ensure compliance with the SDWA. 100 Points
13. Existing transmission or distribution mains with appurtenances that need to be rehabilitated, replaced, repaired or looped to prevent contamination caused by leaks or breaks in the pipe or improve water pressures to maintain safe levels or to ensure compliance with the SDWA. 75 Points
14. Existing pump stations or finished water storage facilities that need to be rehabilitated or replaced to maintain compliance with the SDWA. 60 Points
15. New finished water storage facilities or pump stations that are needed to maintain pressure in the system and/or prevent contamination. 50 Points
16. Addition or enhancement of security measures at drinking water facilities, including but not limited to fencing, lighting, motion detectors, cameras, secure doors and locks, and auxiliary power sources. 45 Points
17. Green Infrastructure: renewable energy generation such as solar panels, hydroelectric, geothermal or wind turbines or infrastructure built at the water system facilities such as green roofs, porous pavement, bioretention or grey water reuse. 45 Points
18. Systems which have had any exceedance of any secondary drinking water regulations that have received notification issued by DEP that exceedance of a secondary drinking water regulation causes adverse effects on the public welfare, and for which the system has received a directive issued by the DEP requiring correction of the exceedance. 40 Points
19. Installation of new water meters and/or other water conservation devices, including but not limited to retrofit plumbing fixtures. 35 Points
20. Construction of new or rehabilitation of existing interconnections between water systems to improve water pressures to maintain safe levels, promote availability of alternative source of supply, or to ensure compliance with the SDWA. 30 Points
21. Replacement of water meters. 25 Points
22. Redevelop wells, construct new wells, or construct or rehabilitate surface water sources with associated treatment facilities to meet the New Jersey SDWA rules for required pumping capacity. 15 Points
22. Other project elements, not including items 1 through 21 above, that ensure compliance with the SDWA and protect public health, as approved by DEP. 1 Point

### Category B. Water Supply Plans/Studies

Planning water system improvements that advance comprehensive water supply concepts can facilitate cost effective drinking water system rehabilitation. To provide an incentive for appropriate planning, 50 points are given if the project is clearly identified in other appropriate plans (i.e. five-year master plan, five-year capital improvement plan, rate setting study or comprehensive water supply plan for a particular region or watershed) approved by a municipal or State agency (such as DEP, the New Jersey Department of Community Affairs or the New Jersey Board of Public Utilities) within the last five years.

Thirty-five (35) points are given to each project that demonstrates that its water system structurally inspects its finished storage facilities every five years. Also, 25 points are given for a system that has a valve exercise program. Documentation must be provided to receive the above-mentioned points.

Please note that having an Asset Management Plan is now a requirement for project sponsors seeking a DWSRF loan.

### Category C. State Designations

#### 1. State Plan

DEP assigns points to projects in municipalities that the State Planning Commission has approved under the Plan Endorsement or Center Designation Process. Please note that if a local entity has not received designation by the State Planning Commission, projects within that entity would receive zero points for this element.

- a. Projects located predominantly within or designed to provide service to a designated growth area that lies within a municipality that has received Plan Endorsement of its Master Plan from the New Jersey State Planning Commission or is an Urban Center or Urban Complex are eligible for 20 points.
- b. Projects located predominantly within or designed to provide service to a designated growth area that lies within a municipality that are identified in the Master Plan currently recognized as endorsed by the New Jersey State Planning Commission as a designated center other than an Urban Center (Regional Center, Town, Village, Hamlet) are eligible for 15 points.

For a current list of those local governments that have gained Plan Endorsement from the New Jersey State Planning Commission, please check the Office for Planning Advocacy at the Department of State website at <http://www.nj.gov/state/planning/plan.html> and then refer to the current State Plan Policy Map to determine if the project area lies within a designated growth area.

Contact the Office for Planning Advocacy, Department of State, P.O. Box 820, Trenton, N.J. 08625-0820 or call (609) 292-7156 for further information on the State Development and Redevelopment Plan.

#### 2. Transit Village Initiative

The New Jersey Department of Transportation (NJDOT) participated in a multi-agency Smart Growth partnership known as the Transit Village Initiative. The Transit Village Initiative helps to redevelop and revitalize communities around transit facilities to make them an appealing choice for people to live, work and play, thereby reducing reliance on the automobile. The Transit Village Initiative is an excellent model for Smart Growth because it encourages investment in portions of New Jersey where infrastructure and public transit already exist. Aside from Smart Growth community revitalization, two other goals of the Transit Village Initiative are to reduce traffic congestion and improve air quality by increasing transit ridership. Therefore, DEP will provide five additional priority points to any project

sponsored by a Transit Village community or to any project that is constructed within a Transit Village community. For more information about Transit Villages, please see <http://www.nj.gov/transportation/community/village/> and for a list of Transit Villages, please see <http://www.nj.gov/transportation/community/village/faq.shtm>.

3. Brownfield Development Area (BDA)

DEP sponsors a program to promote the re-use of formerly contaminated sites. DEP’s Brownfield Program, spearheaded by the Office of Brownfield Reuse, serves as a vital component of the state's Smart Growth efforts to stem the tide of sprawl and channel new development into cities and towns. Under the innovative Brownfield Development Area (BDA) approach, DEP works with selected communities affected by multiple brownfield sites to design and implement plans for these properties simultaneously, so remediation and reuse can occur in a coordinated fashion. The DWSRF supports this initiative by providing five additional priority points to any project serving a BDA. For more information about Brownfield Development Area Initiative, please see <http://www.nj.gov/dep/srp/brownfields/bda>.

4. Green Project Reserve (GPR)

DEP promotes green infrastructure, water and energy efficiency, and environmental innovation in its water improvement projects. Therefore, DEP provides 15 additional priority points to any project that is a categorically eligible project.

Please note that the points from these four items of Category C can be cumulative. Please note for water systems that service more than one municipality; the municipality that has the highest population served will be counted for this category.

Category D. Affordability

The purpose of the affordability criteria is to determine which project sponsors’ water systems are eligible for additional points under the Affordability Category.

Affordability is the degree of need for financial assistance based upon the New Jersey median household income compared to the municipal median household income (MHI). Affordability is determined by the following formula:

$$(\text{Municipal MHI} / \text{Statewide MHI}) \times 100 = \text{Affordability Factor}$$

Points are assigned as shown in Table 2.

TABLE 2. Point values assigned based on Affordability Factor calculation

1. Affordability factor of 100 or greater	0 Points
2. Affordability factor from 85 through 99	15 Points
3. Affordability factor from 66 through 84	30 Points
4. Affordability factor less than or equal to 65	80 Points

The median household income of the municipality which the water system serves and the statewide median household income will be determined from income data in the most recent United States Census, which is currently the 2010 Census.

DEP determined that for the purposes of the DWSRF Program, a municipality whose median household income is 35 % or more below the State’s MHI is considered a Disadvantaged Community and receives 80 priority points which is proportionately greater than the other affordability factor points. (New Jersey’s MHI is \$68,911 as reported in the 2010 Census.)

A weighted MHI is calculated for a project sponsor whose water system serves more than one municipality, as shown in the example below.

Example:

Municipalities Served	MHI	Populations Served	Fraction of total population served	Weighted municipal MHI
Lancaster	30,000	5,000	0.167	5,000
Mayberry	20,000	10,000	0.333	6,660
Holmeville	25,000	15,000	0.500	12,500
<b>Total</b>		<b>30,000</b>	<b>1.00</b>	<b>24,160</b>

Please note for water systems that service more than 10 municipalities, the 10 municipalities that have the highest populations served will be considered in the above table for the affordability factor.

Category E. Population

As a tiebreaker, projects are assigned points based on the permanent population of the water system service area. For a resort community where the summer and winter populations vary greatly, the permanent population will be calculated by taking the sum of twice the winter population and once the summer population and dividing by three (see below). For water systems that service more than one municipality, a total of all the permanent population served in the multiple service areas is used. Priority points are calculated as the permanent population served by the water system divided by 100,000, expressed as a decimal. In the event that projects remain tied, the project which serves a greater proportionate population in the water system’s area is given higher priority.

Population served for resort communities will be calculated by the following equation:

$$[(2 \times \text{Winter Population}) + \text{Summer Population}] / 3 = \text{Weighted Permanent Population}$$

# APPENDIX 2: SUMMARY OF PUBLIC COMMENTS AND AGENCY RESPONSES FROM THE FINAL DWSRF FFY2018 AND FFY2019 IUP DATED MARCH 2019

## **I. Proposed DWSRF FFY2018 (SFY2019) IUP issued November 13, 2017**

The Department proposed a joint Drinking Water SRF – Clean Water SRF IUP for FFY2018 (SFY2019) on November 13, 2017 (November 2017 Proposed IUP). A Notice of Public Hearing was sent to interested parties, including community water systems, non-profit non-community water systems and engineers. A public hearing was held on December 6, 2017 at the New Jersey Environmental Trust in Lawrenceville, NJ. The 30-day public comment period closed on December 14, 2017. The Department received one written comment on the FFY2018 Proposed DWSRF IUP.

The following person submitted comments on the DWSRF November 2017 Proposed IUP proposed on November 17, 2017: Amendments:

1. Alan S. Dillon, Ewing, NJ

### **COMMENT**

A. Dillon commented that the Drinking Water 2018 Project Priority List included a proposed water main extension project for Sea Village Marina LLC (NJ0108021), which has not existed as a public community water system for the last five years. Mr. Dillon stated that funding consideration of a tax delinquent non-water system entity, with no residents, as eligible for a total of \$1,534,000 is not directly related to the purposes of DWSRF financing. As such, Sea Village Marina should be removed from the 2018 DWSRF proposed projects list.

### **RESPONSE**

The Department acknowledges that Sea Village Marina LLC is no longer classified as a public water system. Therefore, the project is no longer eligible for DWSRF funding and has been removed from the project priority list.

## **II. Proposed Amendments to the FFY2018 (SFY2019) DWSRF Proposed IUP issued September 24, 2018 and**

## **III. Supplemental Amendments to the FFY2018 (SFY2019) Proposed IUP issued December 19, 2018**

Due to concerns regarding the availability of DWSRF funds for loan applications in-house, on September 24, 2018, the Department proposed amendments to the Drinking Water SRF IUP proposal for FFY2018 (SFY2019) and proposed the Drinking Water SRF IUP for FFY2019 (SFY2020) (October 2018 IUP Amendments). Again, a Notice of Public Hearing was sent to interested parties, including community water systems, non-profit non-community water systems and engineers. Proposed changes to the October 2018 IUP Amendments included: funding projects that received authorization to advertise after July 31, 2018 based on project rank (vs. readiness-to-proceed); changes in loan rates for public systems and investor owned systems; revised loan duration from 30 years to 20 years; requirement to have a lead action level exceedance to qualify for principal forgiveness for lead service line replacement; elimination of the asset management funds for small systems; caps on loan amounts; and reduced availability of principal forgiveness (PF) for some small systems. Hearings on the October 2018 IUP Amendments were held on October 12, 2018 at the NJDEP Public Hearing Room, Trenton, NJ and on October 16, 2018 at the North Jersey Transportation Planning Authority, Newark, NJ. Seventeen (17) individuals attended the public hearing in Trenton and four (4) provided comments. Eight (8) individuals attended the public hearing in Newark and three (3) provided comments. The Department also accepted written comments submitted on the October 2018 IUP Amendments until close of business on October 24, 2018. Written comments were

submitted by ten (10) entities, including several that attended and provided testimony during the public hearings.

The following persons submitted comments on the October 2018 IUP Amendments:

1. Christine Ballard, T&M Associates
2. Ras J. Baraka, Mayor, City of Newark
3. Joseph A. Bella, Executive Director, Passaic Valley Water Commission
4. Michael DeLoreto, Gibbons P.C., on behalf of Passaic Valley Water Commission
5. James G. Fearon, Gluckwalrath LLP, on behalf of the Township of Howell
6. Michael Francis, Mayor, Borough of Hopatcong
7. Peggy Gallos, Association of Environmental Authorities (AEA)
8. Eleni Giannikopoulos, Suburban Consulting Engineers
9. Eileen M. Heinzl, Borough Administrator, Borough of Pennington
10. Dan Kennedy, Utility and Transportation Contractors
11. Janice Kovach, Mayor, Township of Clinton, on behalf of the Clinton Water Department
12. Erin Law
13. William R. Mayer, Decotiis, Fitzpatrick, Cole & Giblin, LLP on behalf of the Atlantic City Municipal Utilities Authority (ACMUA)
14. William R. Mayer, Decotiis, Fitzpatrick, Cole & Giblin, LLP on behalf of the Hardyston Township Municipal Utilities Authority (HTMUA)
15. William Pikolycky, Mayor, Borough of Woodbine
16. Donald Shields, Vice President of Engineering, New Jersey American Water

On December 19, 2018, in response to comments received on the October 2018 IUP Amendments, the Department proposed Supplemental Amendments (December 2018 Supplemental IUP Amendments), reestablishing the population cut-offs for the Nano Loan program back to 10,000 for principal forgiveness; reestablishing loan duration up to 30 years; reestablishing \$30M PF for lead service line replacement with yearly project caps per system of \$1M, \$5M, or \$10M based on system size; and reestablishing the Asset Management Program for small systems with high-ranking projects. A public hearing was held on January 9, 2019 at 10:00 AM at the New Jersey Environmental Infrastructure Trust, 3131 Princeton Pike, Building 4, Suite 216, Lawrenceville, NJ. Six (6) individuals attended the public hearing, two (2) provided comments. The Department also received two (2) additional written comments submitted by the January 19, 2019 close of comments date.

The following persons submitted comments on the December 2018 Supplemental IUP Amendments:

1. Dennis W. Doll, President & CEO, Middlesex Water Company
2. Eleni Giannikopoulos, Suburban Consulting Engineers
3. William Pikolycky, Mayor, Borough of Woodbine
4. Donald Shields, Vice President of Engineering, New Jersey American Water

The below summarizes the major public comments received on the October 2018 IUP Amendments and the December 2018 IUP Supplemental Amendments and memorializes the Department's responses.

#### COMMENT

The Borough of Pennington, Borough of Woodbine, HTMUA, and the AEA all commented on the October 2018 IUP Amendments requesting that the Department restore the \$1,000,000 available to small systems for the development of an Asset Management Plan ("AMP") as proposed in the November 2017 Proposed IUP as these funds would help them comply with the requirements of the Water Quality Accountability Act (WQAA). This set-aside, capped at \$100,000 per water system serving 10,000 or fewer residents in the November 2017 Proposed IUP, was originally proposed as available as principal forgiveness if the AMP resulted in a capital project costing more than \$250,000. E. Law commented that \$100,000 is a lot of money for those small systems that need to comply with WQAA, and a small program lasting a few years would allow small water systems to comply with the initial requirements of the WQAA. Furthermore, HTMUA objected to linking AMP funds to subsequent funding projects on a priority basis because a small system

accepting the AMP funds may not be able to satisfy the “resulting capital improvement project” condition required for AMP principal forgiveness.

#### RESPONSE

The October 2018 IUP Amendments eliminated the 100% PF set-aside program for small drinking water systems so that more funds would go towards highly ranked capital projects. However, based on the comments received, the Department has reestablished the Asset Management Program for small drinking water systems with high-ranking projects (e.g. MCL violations, Action Level Exceedances, Contaminants of Emerging Concern, etc.) where the resulting capital improvement project is likely to rank high enough to receive funding. If a water system has a high-ranking project, there is little doubt the water system would be unable to satisfy the condition for subsequent principal forgiveness.

HTMUA is one of the systems that had an approved contract for an AMP prior to July 31, 2018 and received a short-term loan to complete an AMP on September 12, 2018. The AMP will continue to qualify for 100% PF under the terms of the original IUP. However, the Department cannot determine at this time if HTMUA’s Water Tank Refurbishment Project will qualify for funding based on rank order. HTMUA is encouraged to submit the required project documentation in case other higher ranked projects fail to meet the deadline for funding and additional funds become available. HTMUA’s Water Meter Replacement Project has the option to be transferred for Clean Water State Revolving Fund (CWSRF) funding eligibility due to their water conservation properties.

#### COMMENT

AEA commented that the sudden shift from loan rates at 75% zero interest/25% market rate to 50% zero interest/50% market rate did not provide borrowers with enough notice (at least 1-year) to adjust capital plans, budgets and rates. Suburban Consulting Engineers commented that the Department should not change both the interest rate and the length of the loan from 30 years to 20 years.

#### RESPONSE

The November 2017 Proposed IUP provided notice that the Department was considering changes to the program for the FFY19/SFY20 program. The changes were proposed earlier than anticipated in the October 2018 IUP Amendments based on the higher than anticipated demand for drinking water funds in SFY2019 and SFY2020. To ensure the long-term sustainability of the fund, these changes were necessary to finance drinking water projects. However, the Department agrees that the change in both the interest rate and the loan length might jeopardize a water system’s ability to make infrastructure improvements for projects already in the system, so the Department changed the loan period back to 30 years in the December 2018 Supplemental IUP Amendments.

#### COMMENT

The Department received multiple comments from entities that asked for reconsideration of the Nano program and suggested caps for larger projects in order to make more funds available for Nano projects. The Borough of Woodbine and the HTMUA commented in response to the October 2018 IUP Amendments that the Department should grandfather the current Nano program eligibility criteria for applicants who already have projects in the system or reconsider the eligibility criteria and principal forgiveness limits for the Nano-lite program that would allow small systems with slightly over 500 customers to take advantage of the Nano program. The Borough of Hopatcong also noted that reconsideration of these Nano projects is needed to obtain health and safety benefits for small systems. Furthermore, another point noted by Suburban Consulting Engineers is that these smaller public water systems need to convince the governing unit for the town to invest in the drinking water infrastructure by maintaining the attractive loan rates for funding priorities that will encourage other small systems to utilize the available funds. AEA, Suburban Consulting Engineers, and T&M Associates all suggested capping loans for large projects at \$10 to \$20 million, and/or setting aside \$5 to \$10 million for projects of under \$1 million to assist small systems. T&M and Suburban both noted that \$10M is a very significant amount of money to a smaller system that might represent their entire capital improvement plan. AEA also offered an alternate suggestion of returning to the policy of limiting borrowing to public systems.

## RESPONSE

In the December 2018 Supplemental IUP Amendments, in response to the comments on the Nano program, the Department has reestablished the population cut-offs for the small systems program at 10,000 or fewer residents. In addition, \$4M will be used for Nano loan program in SFY2019 and in again SFY2020, and will be offered at 50% PF, 25% zero interest, 25% market rate for qualifying systems capped at \$500,000 PF per project. Using the higher population cutoff will increase the number of small systems eligible for this loan rate. Although the Department provides special loan rates for small systems, the Department's highest priority is funding projects to address MCL violations and Action Level exceedances, no matter the water system size.

The DWSRF has never been restricted to publicly owned water systems. The Safe Drinking Water Act specifies that community water systems, both publicly and privately-owned, and nontransient noncommunity water systems are eligible for DWSRF funding.

## COMMENT

The Borough of Woodbine raised concerns that the delay or loss of DWSRF funds puts other committed United States Department of Agriculture (USDA) grant and loan funds in jeopardy, which make up the balance of the money needed to implement their project. The water system also asked for additional ranking points for water systems in distressed communities like Woodbine. These are the communities that can least afford increased costs through higher user rates and should be afforded additional points to make them more competitive in the ranking system.

## RESPONSE

The Department held a conference call with Woodbine on November 26, 2018 to address the concerns regarding the USDA funding. During the call, Woodbine was encouraged to proceed with sending in the project planning and design documents and obtaining the necessary Department permits. Contract documents were submitted November 29, 2018 and are under review. With the changes to the Nano program referenced above, communities with just over 500 residents like Woodbine will be eligible for funding at the Nano rates, should this project be ranked high enough and should funds be available. Project ranking will still be determined by project priority order. Note that Woodbine received additional points under the current ranking system based on median household income. The Department has included a statement in the December Supplemental IUP Amendments, such that projects that have secured federal/non-profit grants to be leveraged with SRF funding will be given priority for funding, as DWSRF funds are available.

## COMMENT

NJAW noted that they serve approximately one third of the State's population. The modified loan rates in the October IUP Amendments are not being used to lower customer rates but are being used to fund other needed improvement projects. This is financially penalizing their customers by preventing NJAW from using the capital saved from lower interest rates, and thus causing NJAW to find other financing for needed projects. UTCA also commented that it is hard to understand why the State made decisions (against) those entities that invest in their own service area.

NJAW commented that the merits of providing a higher priority to a project for a system that is in violation of a current primary drinking water standard (surface water treatment technique, MCL or ALE) is hard to understand. The change in allocation methodology discriminates against the largest group of customers in the State, when they supply a wider demographic area that also includes low-income and disadvantaged communities. Furthermore, in comments on the December 2018 IUP Supplemental Amendments, NJAW noted that none of the recommendations related to Investor Owned Utilities were considered in revising the IUP. Their main issue was the negative impact on customers served by investor owned utilities by limiting total available funds (\$10 million cap per project) and imposing higher project interest rates (change from 75/25 to 25/75).

In responding to the December 2018 IUP Supplemental Amendments, Middlesex Water Company offered support for NJAW's statements. Specifically, Middlesex Water Company stated that this is yet "another

example of disparate treatment between public and private utilities,” noting that investors do not receive any benefit from government subsidies. Middlesex Water Company viewed changes to the program to offer assistance to poorly managed facilities as a reward for bad behavior at the expense of the broader taxpayer base.

#### RESPONSE

Every year, the Department issues a proposed DWSRF ranking methodology for projects and ranks incoming projects accordingly. This prioritization gives priority to projects that address the most serious risks to human health and are necessary to ensure compliance with the SDWA. In years past, project priority was not an important criterion for determining funding, as there were enough DWSRF funds to fund all project applicants. However, the recent increase in demands on the program, including large private utility projects, based on readiness-to-proceed, depleted the available funds. Projections indicate that inadequate funds would be available to fund high priority projects if the Program continued to finance on a readiness to proceed basis in SFY2019 and SFY2020. Without making changes to the loan rate structure, the Department does not have enough money to fund those projects with the most public health benefit and continue to fund large projects for the investor owned water systems. The change in allocation methodology is not intended to discriminate against the larger utilities but rather focus the limited amount of funds on the projects that best meet the goals of the program and sustain the program in the future.

#### COMMENT

Comments were both in favor and against the changes to the current rolling deadlines. T&M encouraged the Department to draw definitive deadlines, so small to medium water systems can better understand and utilize the process, as rolling applications mean small and medium size communities cannot take advantage of funding because they have requirements to spend money on an annual basis. Suburban Consulting stated that the rolling deadlines are a benefit to the engineers because of the tight timeframe surrounding budget approvals at the local level. UTCA and NJAW both commented that by not using the readiness-to-proceed approach and moving the loan program backwards towards hard deadlines, we are not allowing those water systems to proceed if they have completed the steps to move forward.

#### RESPONSE

As the demand for drinking water funding has increased and the available funds decreased, the Department is no longer in the position to use readiness-to-proceed alone as the key indicator for project funding. With limited funds, the Department is focusing our funding efforts on high ranking projects which address identified health-based issues. The Department will certify projects that are in the fundable range in Spring 2020<sup>6</sup> when additional funds are available. For those projects that received an authorization to advertise or an authorization to award by July 31, 2018, the project will continue to qualify for financing under the terms of the original IUP issued for FFY2018/SFY2019 (November 2017), provided that the water system closes on a short-term loan by June 30, 2019. If the project fails to close on a loan by June 30, 2019, the Department will hold financing until June 30, 2020, however, the project will be subject to the revised loan rates and terms of the amended IUP.

#### COMMENT

Several commenters suggested changes to the points assessed as part of the Department’s ranking system. AEA suggested providing points to projects when they are being done to comply with water quality issues such as emerging contaminants and the WQAA. The NJAW commented that the Department should provide equal priority points to projects that are designed to improve treatment performance that would enhance system reliability to assure adherence to primary drinking water standards. The Clinton Water Department is proactively addressing miles of water mains that are approaching their anticipated useful life and stated that, while not a contaminant, it is arguably an equally serious concern and should be included as a category with an adequate point system to rank such projects with respective importance. The NJAW echoed statement made by Clinton Water Department by stating projects that are designed to

---

<sup>6</sup> The Spring 2020 deadline referenced in the response to comments from the final March 2019 DWIUP is being amended as part of the current revisions dated September 2019.

improve treatment performance that would enhance system reliability to assure adherence to primary Drinking Water Standards compliance are equally important and should receive equal priority points, otherwise the Department will continue to reward mediocre performance of water suppliers that have historically disregarded their responsibility and likely lack Technical, Managerial and/or Financial (TMF) Capacity. Suburban Consulting Engineers stated that the Department should also consider the water audit rating system that would prioritize water main replacement and would warrant a higher ranking than traditional water main replacement.

#### RESPONSE

Revisions to the point system were not one of the proposed changes to the IUP, however the Department assigns the most points to those systems that have exceedances of the MCLs, ALEs and contaminants of emerging concern. With an increasing focus on drinking water issues, such as asset management and emerging contaminants, the Department agrees that a reevaluation of the point system is needed. However, due to the complexity of that task it is anticipated as part of a future IUP.

#### COMMENT

The Department received comments on the proposed amendments that decreased the principal forgiveness available for Lead Service Line (LSL) replacement projects from \$30M to \$5M with a \$1M cap per municipality. The City of Newark commented that this results in inadequate funds set aside for LSL projects and asked that the funding cap be raised to \$6.75M per application for each phase of a LSL replacement project. NJAW commented that there should be no change for LSL replacement projects and the Department should maintain 90% principal forgiveness/10% NJDEP interest-free loans capped at \$1 million per municipality served that has a median household income less than the median household income of the county.

#### RESPONSE

Funding for LSL replacement is a priority both nationwide and for the Department. Therefore, the Department is reestablishing the \$30M in principal forgiveness available for LSL replacement. With only \$30M available, there are still a limited number of projects that can be funded. The need throughout the State, far surpasses the available funds. The Department is maintaining a cap on the project funds with the goal to provide funding for the water systems that have lead ALEs and are most in need. In addition to having an ALE, the water system is only eligible for this funding if the median household income of the service area is less than the median household income of the county where the water system is located. The Department is raising the cap on the loan amount based on the population served by the water system (\$1M, \$5M, \$10M) per applicant per year, which allows water systems such as Newark with existing lead ALEs to obtain additional principal forgiveness to help cover various phases of a project in subsequent years based on availability. It also gives room for other municipalities, such as Trenton and the PVWC, with lead ALEs, to take advantage of the available funds. At this time, NJAW is not currently eligible for LSL funding since they have not incurred an ALE. Should they incur an ALE, the Department will calculate their eligibility based on the LSL eligibility criteria for MHI.

#### COMMENT

With regards to the December 2018 IUP Supplemental Amendments, NJAW and Suburban Consulting Engineers stated that lead service line replacements should not be contingent on exceedance of the lead action level. If a system is proactively addressing lead service line replacements, they should be eligible for the same funding. If not, at a minimum they should be available for the funding available.

#### RESPONSE

As noted in the above response, there are limited amount of funds available for principal forgiveness and so therefore funding must be prioritized for those systems with an exceedance that is currently impacting public health. There are not enough funds to maintain the program at the current rates.

#### COMMENT

The Township of Howell commented that in applying the "grandfathering" rules, a Department authorization for a project under the Clean Water Program issued prior to September 24, 2018 (the date on which the Proposed DWSRF Program Amendments were announced) should be deemed to satisfy the "grandfathering" rule with respect to a companion project under the Drinking Water Program, where they are in effect a combined project substantially related by geographic scope.

#### RESPONSE

Clean Water SRF projects are not impacted by the changes. Only drinking water projects are affected. In the case of the Township of Howell, that means the CWSRF project issued prior to September 24, 2018 is proceeding forward. The DWSRF project has not received an authorization to advertise and it will be subject to the proposed IUP revisions. With limited DWSRF funds, all drinking water projects must be funded in project priority order to address those that have the greatest impact on public health.

#### COMMENT

PVWC stated that using the maximum transfer of CWSRF funds could fund eligible projects that were slated to receive DWSRF dollars.

#### RESPONSE

The Department has already requested and received approval from the United States Environmental Protection Agency to transfer an amount equal to 33 percent of the State's FFY2018 Drinking Water State Revolving Fund Capitalization Grant from the CWSRF to the DWSRF. This is the maximum amount allowed under the Federal rules. Furthermore, the Department is transferring all drinking water projects, such as water meters, that are eligible for the CWSRF program for funding.

#### COMMENT

AEA commented that large projects should be required to seek Water Infrastructure Finance and Innovation Act (WIFIA) funding before coming to the I-Bank.

#### RESPONSE

To date, the Department has not required large systems (or small systems) to use the Water Infrastructure Finance and Innovation Act of 2014 (WIFIA) funds for their projects although this might be considered in the future. WIFIA established the federal credit program administered by EPA for eligible water and wastewater infrastructure projects. Projects eligible for the DWSRF are eligible for funding under WIFIA. WIFA assistance is awarded competitively based on letters of interest received for eligible, creditworthy projects. The WIFIA loan amount is limited to 49% of eligible project costs. State DWSRF funds can be used to provide additional financing as needed.

#### COMMENT

UTCA and E. Law both stressed that there is a need to work with the legislature to obtain more funding for drinking water infrastructure.

#### RESPONSE

The Department recognizes that costs to restore and replace critical infrastructure are expected to be in the billions of dollars over the next several decades. Obtaining this funding will require coordination from various entities, public and private, within municipalities and counties and is complicated by the need to properly prioritize necessary infrastructure improvements, increasing regulatory requirements and other community needs. The Department continues to evaluate ways to help offset the costs of meeting regulatory requirements and the paramount goal of protecting public health.

#### COMMENT

NJAW stated in response to both the October 2018 IUP Amendments and the December 2018 IUP Supplemental Amendments that the Department should allow both private and public entities to demonstrate project level affordability.

## RESPONSE

The State developed affordability criteria that assists in identifying applicants that would have difficulty financing projects without additional subsidization. Under the base program, water systems with a median household income (MHI) less than 65% of the State MHI based on the latest 2010 US Census receive adjusted loan rates. When more than one municipality is served by a water system, the weighted municipal population and MHI is used to determine the weighted MHI and determine affordability; affordability is not determined based on the MHI of a single municipality served. Private investor owned water systems are not eligible for adjusted loan rates based on affordability under the base program. It is unlikely that these water systems would meet the affordability criteria noted above due to their large customer base, which is typically spread across multiple municipalities.

However, the Department does apply an affordability criterion for both privately-owned and publicly-owned water systems under the Department's LSL replacement program due to the potential risk to public health. Water systems that have exceeded the lead action level that serve communities with a median household income (MHI) less than the median household income for the county in which they are located are eligible for principal forgiveness for full lead service line replacement projects. Loans will be offered as 90% principal forgiveness and 10% funding from the DEP at 0% interest. Project applicants are capped at \$1, 5 or 10 million per water system (PWSID)/per year based on the population served by the water system.

The DEP has set aside \$30 million for principal forgiveness for LSL replacement projects. MHI is calculated using 2017 Census data, in accordance with data obtained from <https://www.census.gov/quickfacts/NJ>

## COMMENT

Atlantic City MUA asked the Department to modify the December 2018 Supplemental IUP Amendments to allocate funds for 100 percent Department financing for drinking water projects for publicly owned utility authorities with service contracts with municipalities that are under State supervision in accordance with Section 4(c)(1)(b) of Chapter 85 of the New Jersey 2018 Public Laws.

## RESPONSE

Chapter 85 of the New Jersey 2018 Public Laws provides up to 100 percent of the total allowable loan amount not to exceed a total of \$10 million for drinking water project loans to municipalities that do not satisfy the New Jersey Infrastructure Bank credit policy but are subject to State financial supervision and oversight pursuant to the "Local Government Supervision Act (1947), " P. L. 1947. c. 151 (C. 52:27BB-1 et seq.). The law does not require the Department to provide the full 100% financing from the Department. Therefore, financing for these systems will be in ranked order based on the amendments to the IUP.

## COMMENT

In responding to the December 2018 IUP Supplemental Amendments, Suburban Consulting Engineers stated that midsize systems, as well as other projects in the queue, should receive consideration to honor funding of the project at the proposed rate of 50% interest free financing from the Department and 50% at the I-Bank market rate with the remaining funds that are left in the state fiscal year.

## RESPONSE

As noted in the public notice for the amendments to the IUP, the success of the program has resulting in funding a record number of projects. Funding under the existing loan terms by year of application or by the current project rank would put the long-term viability of the DWSRF fund in jeopardy. The proposed changes are necessary to accommodate the maximum number of projects and ensure the highest priority public health projects will be able to be funded with the limited funds available.

## COMMENT

Howell stated that in a case where a governmental entity is the indirect obligor of at least 50% of the debt service on a loan under the Drinking Water Program, that such loan would be entitled to 0% financing at

the one-half funding level applicable to loans to governmental entities (as opposed to the one-quarter funding level applicable to loans to investor-owned utilities).

#### RESPONSE

The proposed changes are intended to balance the interests of investor owned and municipally owned water systems. A governmental entity is the indirect obligor of almost all private or investor-owned utilities that serve those municipalities. The DWSRF provides financing directly to the water system and not to the municipality. Based upon this and the large number of government entities in the State, offering 0% financing or a more favorable Base DWSRF financing package is not sustainable long term for these water systems.

#### COMMENT

PVWC made several comments on the proposed IUP. First, stating that the funding cap per project for Disadvantaged Communities be eliminated. Second, that the fifteen highest ranked DWSRF projects receive greater access to zero-interest loans for their projects, with at least 75 percent of the entire project's cost eligible for the zero-interest loan program. Finally, that the loan terms are provided to the Project based upon the IUP in effect at the time the application was submitted, rather than at the time of the loan closure.

#### RESPONSE

As stated above, the NJ Water Bank has funded a record number of projects and currently has many more project applications in-house in FFY2018 than in previous years. Funding under the existing loan terms by year of application or by the current project rank would put the long-term viability of the DWSRF fund in jeopardy. The proposed changes are necessary to accommodate the maximum number of projects and ensure the highest priority public health projects will be able to be funded with the limited funds available.

*Transcripts of the hearings on the October 2018 IUP Amendments are available from the transcription services (Guy J. Renzi & Associates of Trenton, NJ) to any interested person or organization upon request. Transcripts of the hearing on the December 2018 IUP Supplemental Amendments are available from the transcription services (Rosenberg & Associates, Inc. of Florham Park, NJ) to any interested person or organization upon request. In addition, copies of the transcripts may be reviewed at the NJDEP's offices at 401 East State Street in Trenton, New Jersey.*

# APPENDIX 3

## STATE OF NEW JERSEY PROPOSED AMMENDMENTS TO THE FINAL FEDERAL FISCAL YEAR 2019 PROJECT PRIORITY LIST (DW)

Rank	Project Sponsor	Project Number	Project Name	Population	Building Cost	Support Cost	Total Project Cost	Cat A	Cat B	Cat C.a	Cat C.b	Cat C.c	Cat C.d	Cat D	Cat E	Total Points
1	Newark City	<a href="#">0714001-012</a>	Construction of a cover for the Cedar Grove Reservoir	285,000	\$50,000,000	\$12,730,000	\$62,730,000	500	50	20	0	0	0	80	2.85	652.85
