**NOTICE OF OPEN PUBLIC COMMENT PERIOD**

**Clean Water State Revolving Fund  
and Drinking Water State Revolving Fund  
Intended Use Plans**

Dear Interested Party:

The Department of Environmental Protection (Department) has prepared the following documents for the administration of the Clean Water State Revolving Fund and Drinking Water State Revolving Fund:

<b>Clean Water State Revolving Fund (CWSRF) Program</b>
Proposed Federal Fiscal Year 2021/ State Fiscal Year 2022 Intended Use Plan
<b>Drinking Water State Revolving Fund (DWSRF) Program</b>
Proposed Federal Fiscal Year 2021/ State Fiscal Year 2022 Intended Use Plan and AMENDED Drinking Water State Revolving Fund Intended Use Plan for Federal Fiscal Year 2020 (and State Fiscal Year 2021)

<b>CWSRF Program and DWSRF Program</b>
Amendments to the Final Clean Water and Drinking Water Intended Use Plans for Federal Fiscal Years 2017, 2018, 2019, 2020 and State Fiscal Years 2018, 2019, 2020, 2021 - Use of Water Infrastructure Finance and Innovation Act Funds

The Intended Use Plans must be developed by the Department, undergo a public participation process and be approved by the US Environmental Protection Agency (USEPA) for the Department to be awarded its capitalization grant used to finance water infrastructure projects.

The Federal Fiscal Year (FFY) 2021 CWSRF and DWSRF capitalization grants are targeted to be awarded to the Department in September 2021 or sooner, for use in the State Fiscal Year (SFY) 2022 Financing Program (July 1, 2021 to June 30, 2022).

The Water Bank anticipates using Water Infrastructure Finance and Innovation Act Funds (WIFIA) funds for a portion of the I-Bank share of long term loans for both the CWSRF and DWSRF. The funds are expected to be available to the I-Bank at a lower interest rate than market rate bonds, thereby freeing up a portion of the DEP share normally allocated to projects. Therefore, long term funding packages will no longer be represented in terms of a “DEP Interest Free Share” and an “I-Bank Market Rate Share” but instead as a blended interest rate consisting of a percentage of I-Bank’s AAA Market Interest Rate. For example, a long term funding package that formerly consisted of a 75% DEP Interest-Free Share and a 25% I-Bank Market-Rate Share will now be described as a “Blended Interest Rate of 25% of I-Bank’s AAA Market Interest Rate”.

### **Clean Water State Revolving Fund (CWSRF) Program**

The FFY 2020 CWSRF IUP was proposed in December 2019 and a public hearing was held on January 7, 2020. The Department’s CWSRF FFY 2020 IUP was finalized in April 2020 with no changes and has been approved by USEPA.

In a continuing effort to ensure the Water Bank’s long-term viability, the SFY 2022 Clean Water IUP will maintain changes originally made in SFY 2020 to the blended interest rate for long term loans for nearly every project category eligible for clean water funds. New for SFY 2022, the blended interest rate for Landfill Construction projects will be increased from 50% to 75% of I-Bank’s AAA Market Interest Rate. In addition, the eligibility of energy conservation, renewable energy and co-generation projects will be limited to the pro rata share of capital costs that provide power to a publicly owned treatment works. The Program will continue to offer competitive loan rates and these changes will enable the Program to continue to fund high priority clean water projects on a readiness to proceed basis.

The proposed Financing Packages (Blended Interest Rates) for SFY 2022 are identified below:

<u>Project Category</u>	<u>Financing Package – Blended Interest Rate</u>
CSO Abatement and Water Quality Restoration Projects	25% of I-Bank’s AAA Market Interest Rate (for the first \$10M in allowable costs; costs above \$10M to be financed at 50% of I-Bank’s AAA Market Interest Rate )
All Other Water Quality Projects	50% of I-Bank’s AAA Market Interest Rate
Private Conduit Projects and Landfill Construction Projects	75% of I-Bank’s AAA Market Interest Rate

The Department plans to utilize any unallocated principal forgiveness funds carried over at the end of SFY 2021 as principal forgiveness in SFY 2022 for categories set forth in this IUP (including CSO Sewershed – Grey and Green Infrastructure, Coastal Water Quality Restoration, and Water Quality Restoration). Principal forgiveness funds for Small System Asset Management Plans are expected to be exhausted in SFY 2021 and will not be available in SFY 2022. The Department will supplement the above principal forgiveness funds with approximately \$25M projected to be available under the FFY 2021 CWSRF grant from USEPA. In SFY 2022, \$15M of the new principal forgiveness funds will be used for CSO Sewershed – Grey and Green Infrastructure projects and \$10M will be allocated to Water Quality Restoration projects.

In setting aside approximately \$10M in new principal forgiveness funds for Water Quality Restoration projects throughout the state, the Department continues a commitment to support projects that will eliminate, prevent or reduce documented occurrences of shellfish bed downgrades, beach closings and advisories due to the presence of harmful algal blooms (HABs). If there is insufficient demand from eligible HAB projects in SFY 2022, unallocated funds may be used for projects that address shellfish bed downgrades, beach closing and advisories due to the presence of pathogens.

### **Drinking Water State Revolving Fund (DWSRF) Program**

On December 20, 2019, the Department proposed the DWSRF IUP for FFY 2020/SFY 2021 and a public hearing held on January 7, 2020. In response to comments received, the Department proposed amendments in February 2020 on the project and principal forgiveness caps for projects that address lead exposure in drinking water that are being funded with the approximately \$113M transferred as a result of the Water Infrastructure Funding Transfer Act (S. 1689). The Department’s DWSRF FFY 2020 IUP was finalized in April 2020 and has been approved by USEPA.

In SFY 2022, the NJ Water Bank will continue to offer very attractive low-cost financing packages, including principal forgiveness (or grant-like funding), interest-free loans, and low interest loans for high priority drinking water projects. For SFY 2022, the DEP is maintaining base loans rates outlined in the SFY 2021 IUP, which included a funding cap of \$25 million per applicant per year for both publicly and privately-owned systems to ensure that limited funds are distributed among multiple high priority projects.

The DEP plans to utilize any allocated principal forgiveness funds carried over at the end of SFY 2021 as principal forgiveness in SFY 2022 for categories set forth in this IUP. Principal forgiveness funds for Small System Asset Management Plans are expected to be exhausted in SFY 2021 and will not be available in SFY 2022. If any principal forgiveness funds remain for carryover in SFY 2022 they will be added to allocated principal forgiveness for Nano projects.

In SFY 2021, the Water Infrastructure Funding Transfer Act “WIFTA” (S. 1689) allowed for a one-time transfer of approximately \$113M of CWSRF funds to the DWSRF to provide principal forgiveness for high-priority projects designed to address lead exposure in drinking water. It did not allocate any new money to the SRF loan program but the transfer from CWSRF to DWSRF provides helpful short-term flexibility. The SFY 2022 IUP will utilize principal forgiveness resulting from WIFTA that was carried over from SFY 2021 for lead remediation projects in communities with a median household income (MHI) less than the MHI for the State. For water systems with a population greater than 1,000, the Water Bank will offer up to 50% of total allowable project costs up to \$1M, \$5M, or \$10M per applicant/year in principal forgiveness (\$2M, \$5M, or \$20M in total project costs) based on the number of known lead service lines (<1,000, 1,000 to 5,000; or >5000). Any remaining project costs may be funded by the I-Bank at Market Rate as capacity allows.

DEP is amending the SFY 2021 IUP and carrying forward those changes in SFY 2022 to help small water systems with populations of 1,000 or less. Many of these small systems face challenges in their ability to achieve and maintain compliance with federal and State rules. This includes the lack of expertise to operate and maintain systems, lack of financial resources, and aging infrastructure. To address this, DEP is offering 100% principal forgiveness loans up to \$1M in total project costs for lead remedial projects (including corrosion control or lead service line replacement) to systems in communities with a MHI less than the MHI for the State through principal forgiveness funds transferred as a result of WIFTA. Further, the DEP is modifying loan packages for small systems with a population of 1,000 or less that receive assistance through the DEP’s Engineering Contract. Those systems will be offered 100% principal forgiveness loans capped at \$750,000 to address these compliance issues.

The DEP is actively pursuing additional funding sources to address the increasing drinking water infrastructure financial needs. The SFY 2021 State budget included a \$60 million appropriation for water infrastructure projects, of which \$10M is allocated to water projects funded in the CWSRF and will be used as Clean Water match. The remaining \$50M will be used to fund additional drinking water projects, split to allocate \$25M to DEP and \$25M to I-Bank that can be leveraged to fund approximately \$113M in projects.

**Amendments to the Final Clean Water and Drinking Water Intended Use Plans for Federal Fiscal Years 2017, 2018, 2019, 2020 and State Fiscal Years 2018, 2019, 2020, 2021 - Use of Water Infrastructure Finance and Innovation Act Funds**

Amendments to the Final Clean Water And Drinking Water Intended Use Plans for FFYs 2017, 2018, 2019 and 2020 were proposed on October 22, 2020 to address the Water Bank's use of Water Infrastructure Finance and Innovation Act Funds in lieu of a portion of the funds the I-Bank would otherwise secure through the issuance of tax-exempt bonds. These amendments have been subject to the required 30-day public comment period and no comments were received. The amendments are now finalized with no changes to the proposed document.

**A hearing on the Proposed FFY 2021 CWSRF and DWSRF IUPs will be conducted on Thursday January 7, 2021. The hearing will commence at 10:00 a.m. and conclude at noon or the end of testimony (whichever is sooner). Due to concerns around COVID-19, this meeting will be held remotely, using Microsoft Teams. If you would like to attend, please contact [watersupply@dep.nj.gov](mailto:watersupply@dep.nj.gov), and include "January 2021 IUP Hearing Invitation" in the subject line. Please include your name, phone number, and affiliation in the body of the email. You will then be contacted by a DEP staff person who will provide you a link, and a call-in number for the meeting.**

Presentations may be made orally or in writing; if written testimony is prepared, the oral presentation should be limited to a summary of the text. The period for submitting written comments on the proposal will close on January 14, 2021 (all comments must be received by that date). All comments submitted prior to the close of the comment period will be considered in the preparation of the final CWSRF and DWSRF IUPs.

Written comments on the **CWSRF IUP** should be sent to the following address:

# NEW JERSEY'S WATER BANK FINANCING PROGRAM

## *PROPOSED*

*Drinking Water State Revolving Fund Intended Use Plan  
for Federal Fiscal Year 2021 (and State Fiscal Year 2022)  
and*

## *AMENDED*

*Drinking Water State Revolving Fund Intended Use Plan  
for Federal Fiscal Year 2020 (and State Fiscal Year 2021)*

New Jersey Department of Environmental Protection  
Water Resource Management  
Division of Water Supply and Geoscience  
Water System Operations Element

December 2020

## EXECUTIVE SUMMARY

Protecting and enhancing New Jersey's water quality and water infrastructure is vital to the State's health and economy. While often taken for granted, significant planning and investment is required to sustain and improve New Jersey's aging infrastructure systems. That cost often exceeds the capabilities of local water utilities.

Established in 1988, the New Jersey Water Bank is a partnership between the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank ("I-Bank") to provide low-cost financing for the design, construction, and implementation of projects that help to protect, maintain and improve water quality. The NJ Water Bank administers New Jersey's Clean Water State Revolving Fund (CWSRF) and Drinking Water State Revolving Fund (DWSRF) under the federal Clean Water Act and Safe Drinking Water Act, respectively. The State Revolving Fund (SRF) is a revolving/self-perpetuating loan program, in that SRF loan repayments are committed to finance future projects in perpetuity.

The priorities and policies of the NJ Water Bank are established in the Intended Use Plans (IUPs). The Priority System/IUP document must be developed annually, undergo a public participation process and be approved by the US Environmental Protection Agency for the State to qualify for SRF capitalization grants to support the NJ Water Bank. This Federal Fiscal Year (FFY) 2021/State Fiscal Year (SFY) 2022 (FFY2021 IUP) and FFY 2020/SFY 2021 DWSRF IUP (FFY2020 IUP) provide information on how drinking water funds, available through the DEP and the I-Bank, will be used to provide financial assistance for drinking water projects and identifies State policies governing loan awards. Projects eligible for financing include a wide variety of drinking water treatment, including projects to address lead exposure in drinking water, violations of the maximum contaminant levels, unregulated contaminants, acute health effects (e.g. Surface Water Treatment Rule requirements). The FFY2021/SFY2021 CWSRF IUP was proposed and finalized in a separate document that is available on the website at [www.nj.gov/dep/dwq/cwpl.htm](http://www.nj.gov/dep/dwq/cwpl.htm).

The NJ Water Bank has funded a record number of projects over the last few years. The current demand for drinking water funds continues to be high and exceeds the current amount of available funds even with the increased availability of drinking water funds through the increased availability of DWSRF transferred to DWSRF and increased State appropriations. The FFY2021 IUP will fund projects based on both a project rank and readiness-to-proceed basis to ensure the highest priority projects (those impacting public health) will be funded with the available funds.

In FFY2021, the NJ Water Bank will continue to offer very attractive low-cost financing packages, including principal forgiveness (or grant-like funding), interest-free loans, and low interest loans for high priority projects. For FFY2021, the DEP is maintaining base loans rates outlined in the FFY2020 IUP, which included a funding cap of \$25 million per applicant per year for both publicly and privately-owned systems to ensure that limited funds are distributed among multiple high priority projects.

The DEP plans to utilize any allocated principal forgiveness funds carried over at the end of FFY2020 as principal forgiveness in FFY2021 for categories set forth in this IUP. Principal forgiveness funds for Small System Asset Management Plans are expected to be exhausted in FFY2020 and will not be available in FFY2021. If any principal forgiveness funds remain for Small System Asset Management Plans for carryover in FFY2021 they will be added to allocated principal forgiveness for Nano projects.

In FFY2020, the Water Transfer Funding Act "WIFTA" (S. 1689) allowed for a one-time transfer of approximately \$113M of additional CWSRF funds to the DWSRF to provide principal forgiveness for high-priority projects designed to address lead exposure in drinking water. It did not allocate any new money to the SRF loan program but the transfer from CWSRF to DWSRF provides helpful short-term flexibility. The

FFY2021 IUP will utilize principal forgiveness resulting from WIFTA that was carried over from FFY2020 for lead remediation projects in communities with a median household income (MHI) less than the MHI for the State. For water systems with a population greater than 1,000, the Water Bank will offer up to 50% of total allowable project costs up to \$1M, \$5M, or \$10M per applicant/year in principal forgiveness (\$2M, \$5M, or \$20M in total project costs) based on the number of known lead service lines (<1,000, 1,000 to 5,000; or >5000). Any remaining project costs may be funded by the I-Bank at Market Rate as capacity allows.

DEP is amending the FFY2020 IUP and carrying forward those changes in FFY2021 to help small water systems with populations of 1,000 or less. Many of these small systems face challenges in their ability to achieve and maintain compliance with federal and State rules. These challenges include the lack of expertise to operate and maintain systems, lack of financial resources, and aging infrastructure. Accordingly, DEP is offering 100% principal forgiveness loans up to \$1M in total project costs for lead remediation projects (including corrosion control or lead service line replacement) to systems in communities with a MHI less than the MHI for the State through principal forgiveness funds transferred as a result of WIFTA. Further, the DEP is modifying loan packages for small systems with a population of 1,000 or less that receive assistance through the DEP’s Engineering Contract. Those systems will be offered 100% principal forgiveness loans capped at \$750,000 to address these compliance issues.

The DEP is actively pursuing additional funding sources to address the increasing drinking water infrastructure financial needs. On October 22, 2020, the DEP published proposed amendments to the Final Federal Fiscal Year (“FFY”) 2017, 2018, 2019, 2020/SFY 2018, 2019, 2020, 2021 CWSRF & DWSRF IUPs as a result of the Water Infrastructure Finance and Innovation Act of 2014 (WIFIA). The Water Bank anticipates using WIFIA funds for a portion of the I-Bank share of long-term loans. The funds are expected to be available to the I-Bank at a lower interest rate than market rate bonds, thereby freeing up a portion of the DEP share normally allocated to projects. Further, the SFY2021 State budget included a \$60 million appropriation for the Clean Water and Drinking Water programs, of which \$10M is allocated for Clean Water match. The remaining \$50M will be used to fund additional drinking water projects, split to allocate \$25M to DEP and \$25M to I-Bank that can be leveraged to fund approximately \$113M in projects.

The proposed DWSRF FFY2021 IUP and amended FFY2020 IUP are described in further detail below.

*“The New Jersey Water Bank is a partnership to provide low-cost financing for the design, construction, and implementation of projects that help to protect, maintain and improve water quality.”*

# PROGRAM SUMMARY

## WHAT'S NEW IN FFY2021!

The DWSRF program for FFY2021 includes the following:

- As a result of the manner in which funds from Water Infrastructure Finance and Innovation Act of 2014 (WIFIA) will be used, long term funding packages are no longer represented in terms of a “DEP Interest Free Share” and an “I-Bank Market Rate Share” but instead as a blended interest rate consisting of a percentage of I-Bank’s AAA Market Interest Rate. For example, a long-term funding package that previously was described as consisting of a 75% DEP Interest-Free Share and a 25% I-Bank Market-Rate Share is now described as a “Blended Interest Rate of 25% of I-Bank’s AAA Market Interest Rate”.
- Base Program Financing capped at \$25 million (per applicant/per year)
  - Blended Interest Rate of 50% of I-Bank’s AAA Market Interest Rate for publicly owned water systems;
  - Blended Interest Rate of 75% of I-Bank’s AAA Market Interest Rate for privately-owned water systems. In addition to the per applicant cap above, privately-owned water systems are capped at \$10M per project;
- Funding on a readiness-to-proceed basis for those projects in the fundable range based on project ranking. By factoring in a “readiness-to-proceed” criteria, available funds will not be unutilized waiting on a project that is highly ranked but not ready for funds. This ensures that available funds will be utilized on the high priority public health projects with the funds available;

### Rolling Applications

Applications will be accepted any time of the year. There are no submission deadlines.

### Principal Forgiveness Funds

The DEP will continue using any carryover principal forgiveness funds that will be allocated as follows:

<b>LEAD SERVICE LINE REPLACEMENT</b> Funding of lead service line projects will be in ranked order, with those systems receiving the loan interest rates of 50% principal forgiveness, 50% I-Bank Market Rate financing to replace lead lines in communities serving customers whose median household incomes are less than the State median household income. The principal forgiveness is capped at \$1M, \$5M, \$10M per applicant/year (\$2M, \$10M, or \$20M in total project costs) based on the number of known lead service lines (<1,000; 1,000 to 5,000; or >5000). All other systems will receive the base rate, affordability rate, or Nano financing.	<b>SMALL SYSTEM LEAD REMEDIATION</b> Small systems serving $\leq 1,000$ will a loan of 100% principal forgiveness in communities serving customers whose MHI is less than the State MHI. Principal forgiveness will be capped at \$1M per water system/ per year.
	<b>SMALL SYSTEM ENGINEERING CONTRACT</b> Small systems serving $\leq 1,000$ will receive a loan consisting of 100% principal forgiveness for those offered assistance under the DEP’s Engineering Contract. Principal forgiveness will be capped at \$750,000 per water system/ per year.
	<b>NANO</b> Principal forgiveness loan for 50% of project costs for small drinking water systems serving $\leq 10,000$ residents, remaining costs receive loan financing with a Blended Interest Rate of 50% of I-Bank’s AAA Market Interest Rate. Capped at \$1M per water system/per year.

## PROGRAM GOALS

**Short-term:** Provide funding to needed, construction ready, highly ranked water quality improvement projects.

**Long-term:**

- Provide capital for water and wastewater infrastructure renewal to protect public health and the environment for multiple generations of New Jersey citizens;
- Continue serving as the Garden State’s premier source of environmental infrastructure financing through self-sustaining, efficient and transparent programs;
- Establish and efficiently manage a permanent source of funding for clean water and drinking water infrastructure projects;
- Provide project financing at a much lower cost than program participants could achieve individually thereby passing substantial savings on to New Jersey taxpayers and rate payers; and
- Increase access to capital markets for those participants that find it difficult or expensive on their own, due to lower credit ratings or a lack of familiarity with debt financing.

**Construction of Storage Tanks at the Jackson Twp. MUA**

### Drinking Water Borrower Eligibility

Public community water systems, both privately and publicly owned, and nonprofit noncommunity water systems (as defined by the National Primary Drinking Water Regulations) are eligible for Water Bank assistance. Public community water systems owned by water commissions, water supply authorities, and water districts are also eligible. Federally owned systems and State-owned systems (State agencies, such as State Police, Parks and Forestry, and Corrections) are not eligible to receive Water Bank assistance.

Project sponsors must satisfy the I-Bank and State of New Jersey creditworthiness standards to receive funding.

### Drinking Water Project Eligibility

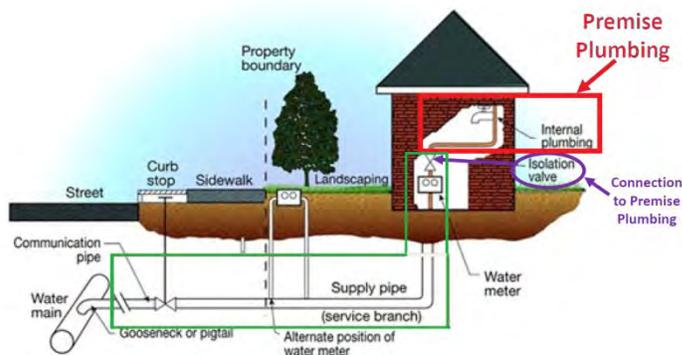

The main objective of drinking water funding is to protect the public health in conformance with the objectives of the Safe Drinking Water Act. Types of eligible projects include:

- Projects to maintain compliance with existing regulations for contaminants with acute health effects (e.g. Surface Water Treatment Rule, Revised Total Coliform Rule) and existing regulations for contaminants with chronic health effects (e.g. Lead and Copper Rule)
- Full lead service lines replacement by eligible systems, with priority given to water systems that have exceeded the lead action level. Eligible water systems that do not exceed the lead action level but want to replace lead pipes are eligible for principal forgiveness in ranked order.

**Drilling of a Drinking Water Well at the Berkeley Twp. MUA**

- Treatment of unregulated contaminants (contaminants that are currently not regulated under the SDWA rules, including contaminants of emerging concern for which there is no drinking water standard)
- Rehabilitate or develop sources to replace contaminated sources
- Treatment facilities
- Storage facilities
- Transmission and distribution pipes, including lead service line location and replacement, regardless of whether the system has ownership of the pipe
- Projects that address the exceedance of a recommended upper limit for secondary contaminants.
- Purchase or consolidation (i.e., restructure) of a water system that is unable to maintain compliance for technical, financial, or managerial reasons
- Emergency Repair Projects to replace the failure of an essential portion of a public water system that will disrupt water service to any number of the public water system’s customers for a minimum of 24 hours total and/or poses a substantial threat to the public health, safety, and welfare. Replacement must be in kind or parallel such that there is no potential environmental impact to the surrounding project area.
- Security Monitoring projects designed to improve security at otherwise funding-eligible drinking water facilities are eligible for funding, including but not limited to:
  - Fencing
  - Lighting
  - Motion detectors
  - Cameras
  - Secure doors
  - Alternative auxiliary power sources

**Drinking water service line eligible up to the isolation valve**

## Planning & Design Loans

The Program also offers loans to cover the costs associated with planning and design of a water infrastructure project. These short-term loans are currently being offered at 0% interest to eligible projects in the fundable range. Eligible costs include engineering fees, surveys, environmental or geological studies, and other costs related to project plan preparation. The loans must be rolled into a Water Bank capital improvement project or repaid in 3 years. (Long-Term Loan terms are established based on the IUP operative at the time of certification of the construction contract.)

## **FFY2020 FUNDING PACKAGES (LONG-TERM LOANS)**

### Water Infrastructure Finance and Innovation Act of 2014 (“WIFIA”) Program Funds

#### Background

As demand has increased, the Water Bank has taken measures to source additional funding sources, such as: supplemental sources of revenue from private lines of credit; transferring the maximum amount of CWSRF funds permissible under federal law to replenish depleted DWSRF funds; and leveraging anticipated additional state appropriations. These additional sources of funds have expanded the capacity of the Water Bank to meet more project needs while continuing to offer

competitive long-term loan rates. To further the Water Bank's goal of increasing available funds, expanding the number of funded projects, and ensuring the long-term viability of the program, the I-Bank submitted a letter of interest ("LOI") in July 2019 to the USEPA and was selected to apply for loan funds from the USEPA's Water Infrastructure Finance and Innovation Act of 2014 ("WIFIA") Program, a federal credit program that provides low-cost, long-term federal loans for eligible drinking water and wastewater infrastructure projects.

The DEP has proposed amendments to the Final Federal Fiscal Year ("FFY") 2017, 2018, 2019, 2020/SFY 2018, 2019, 2020, 2021 CWSRF & DWSRF IUPs that changes all instances in which the applicable IUP refers to a certain share of interest-free funding from the DEP (e.g. 25 %, 50%, 75%) combined with a certain share of market-rate interest funding from the I-Bank (e.g. 25%, 50%, 75%). The proposed amendment would allow the DEP and I-Bank to deviate from a strict adherence to the established funding shares where WIFIA funding will be used for eligible projects. For these projects, the combined long-term financing from the DEP and the I-Bank, inclusive of WIFIA funds, would be at an effective interest rate no greater than would have resulted from financing with the I-Bank's AAA bond funds at market interest rates and the DEP's interest-free loan funds at the applicable IUP referenced shares (25%, 50%, or 75%).

This concept is continued in the FFY 2021/SFY 2022 DWSRF IUP. Instead of referencing a certain share of interest-free funding from the DEP combined with a certain share of market-rate funding from the I-Bank, this IUP uses the term "% of I-Bank's AAA Market Interest Rate". For example, "50% of I-Bank's AAA Market Interest Rate" means an effective interest rate no greater than would have resulted from financing with a 50% share of I-Bank's AAA bond funds at market interest rates and a 50% share of the DEP interest-free loan funds.

As part of the LOI submission, the I-Bank included a pool of Water Bank projects eligible for long-term financing starting in State Fiscal Year ("SFY") 2021. Borrowers were selected in conformance with the eligibility requirements of the WIFIA program and Water Bank regulations. It is expected that WIFIA loan funds will be applied to projects with Water Bank long-term financing terms established by the applicable Final Federal Fiscal Year ("FFY") 2017, 2018, 2019, 2020/SFY 2018, 2019, 2020, 2021 CWSRF & DWSRF IUPs. The DEP and I-Bank may also include projects eligible for funding under the FFY 2021/SFY 2022 DWSRF IUP in the initial or future pools of WIFIA Water Bank projects.

### Purpose of Using WIFIA

The I-Bank intends to use WIFIA loan funds in lieu of a portion of the funds the I-Bank would otherwise secure through the issuance of tax-exempt bonds. Use of WIFIA loan funds offers several potential advantages over tax-exempt bonds, including lower interest rates, call options, and structuring flexibility.

The result of blending WIFIA loan funds into a loan package is that less of the DEP's SRF funds would be needed to achieve the same interest rate as if WIFIA loan funds were not used. The Water Bank intends to use these saved SRF monies to fund additional projects that would otherwise be outside the fundable range of the Water Bank. To learn more about the potential savings offered by using WIFIA loan funds, a detailed case study developed by I-Bank and entitled "NJ Water Bank – Base Case v. WIFIA Case for IUP Amendments" is posted on the DEP's website at <http://www.nj.gov/dep/dwq/cwpl.htm>.

The use of WIFIA loan funds will not affect when long-term financing terms are established. As previously established under prior IUPs, and continued in this IUP, for construction loans issued

upon certification of engineering contracts, long-term financing terms are established consistent with the IUP operative at the time of certification of the construction contract. For construction loans issued at the time of certification of construction contracts, long-term financing terms are established consistent with the IUP operative at the time of construction loan closing. For applicants financing the cost of construction through non-Water Bank sources or self-funding, long-term financing terms are established consistent with the IUP operative at the time of the long-term loan closing.

If WIFIA loan funds are ultimately awarded by the USEPA to the I-Bank, the Water Bank will identify potential pools of certified SRF projects to be financed with some combination of DEP SRF funds, I-Bank bond proceeds, and WIFIA loan funds. This will result in the use of a larger portion of I-Bank funds established in these IUPs, along with the WIFIA loan funds, and a lesser share of the SRF interest-free funds from the DEP established in these IUPs. However, this will still achieve a blended interest rate for borrowers that is no greater than if WIFIA funds were not used by the I-Bank as a supplement to a portion of its bond proceeds.

### Recently Appropriated State Funds

In addition to the WIFIA funds the I-Bank may also leverage a portion of funds recently appropriated to the DEP to create additional SRF savings for the DEP by blending the newly appropriated funds into loan packages for I-Bank's portion of project financing. All borrowers receiving these appropriated funds in their loan packages would still receive a long-term loan package with a blended interest rate no greater than if the I-Bank used its AAA market rate bonds for its portion of project financing as described in the applicable IUP.

### Principal Forgiveness Funds

The DEP expects to use the maximum amount available for principal forgiveness utilizing SRF monies subject to federal restrictions. In addition to the SRF, the DEP may increase any amounts identified in the IUP reserved for principal forgiveness and adjust any caps if additional SRF or non-SRF funds (including Natural Resource Damages (NRD) recovered by the State and Corporate Business Tax (CBT)-diesel funds or subsidized financing received for eligible large dollar-value projects in coordination with the Water Infrastructure Finance and Innovation Act (WIFIA) to supplement principal forgiveness or low-cost loan funding. In addition, the DEP may bank any non-SRF financing towards future State Match requirements subject to EPA approval.

### Lead Remediation Set-Aside Program

The existence of lead service lines in some of our aging drinking water infrastructure poses potential risk to public health. This risk can be significantly reduced through the identification and replacement of lead service lines or through the installation of corrosion control treatment.

## Water Infrastructure Funding Transfer Act

On October 4, 2019, President Trump signed the Water Infrastructure Funding Transfer Act (S. 1689), which allows states a one-time transfer of funds from the Clean Water State Revolving Fund to the Drinking Water State Revolving Fund. The legislation was sponsored by U.S. Senator Cory Booker, D-N.J. and is commonly referred to as the “Booker Bill”. The law allows State officials to transfer up to 5% of the cumulative clean water revolving fund or approximately \$113 million in federal funds to the drinking water revolving fund to invest in water infrastructure and reduce lead in drinking water. It does not allocate any new money but provides helpful short-term flexibility. Funds must be used as additional subsidy in the form of principal forgiveness, negative interest loans, or grants (or any combination of these) and used for projects related to protecting water systems from the impacts of lead.

## Principal Forgiveness for Projects to Reduce Lead Exposure

In FFY2020, the DEP capitalized on the flexibility provided by the Water Infrastructure Funding Transfer Act and transferred approximately \$113 million to the DWSRF to provide principal forgiveness (PF) to eligible recipients for projects in communities with an Median Household Income (MHI) less than the State MHI that reduce exposure to lead in drinking water. In addition, \$3M in lead PF was carried over from FFY2019. Approximately, \$106M was set aside to be used to fund lead service line replacement projects in priority ranked order, while the remaining \$10M is set aside to fund the installation of corrosion control treatment and lead service line replacement in priority ranked order at water systems serving a population  $\leq 1,000$ . Any of the \$116M that is not committed to eligible projects in FFY2021 will be rolled over and made available for projects to reduce lead exposure as described in more detail below.

## Approximately \$100M in PF for LSL Replacement

In FFY2021, the DEP will roll over any of the remaining \$106M that was not committed to other eligible projects in FFY2020 to continue to fund lead service line replacement projects in priority ranked order. Publicly owned and privately(investor)-owned water systems are eligible for principal forgiveness if the project is located in a community with a median household income (MHI) less than the median household income for the State. The MHI is calculated using 2017 Census data, in accordance with data obtained from <https://www.census.gov/quickfacts/NJ>. Priority will be given to water systems that have exceeded the lead action level. Water systems that do not exceed the lead action level but want to replace lead pipes are eligible for principal forgiveness in ranked order. Loans will be offered as 50% principal forgiveness (based on the caps noted below) and 50% funding from the I-Bank at AAA Market Rate Bond. The remainder of the project balance is eligible for financing by the I-Bank, as capacity allows.

Project applicants are capped at \$2, 10, or 20 million (\$1, 5 or 10 million in principal forgiveness) per water system (PWSID)/per year based on the number of **known** lead service lines being replaced in communities with an MHI below the State MHI. Project caps are based on known lead service lines in areas with an MHI that is below the State MHI and not the total number of lead service lines that may exist throughout the system. Water systems may be required to perform further materials evaluations in areas with an unknown number of lead service lines in order to qualify for principal forgiveness in those areas. Specifically, the caps are as follows:

- \$20M (\$10M principal forgiveness) for systems with > 5,000 known lead service lines;
- \$10M (\$5M principal forgiveness) for systems with  $\geq 1,000$  and  $\leq 5,000$  known lead service lines;
- \$2M (\$1M principal forgiveness) for systems with < 1,000 known lead service lines;

The remainder of the project costs above the specified caps may be financed by I-Bank at AAA Market Rate, as capacity allows.

For Example: A \$30M project submitted by a publicly-owned or privately-owned water system with >5,000 lead service lines serving a community with an MHI less than the State MHI, is capped at \$10M in principal forgiveness and \$10M by the I-Bank at the AAA Market Rate. The remaining \$10M is eligible for funding by the I-Bank at AAA Market Rate as capacity allows.

A \$16M project submitted by a publicly-owned or privately-owned water system with >5,000 lead service lines serving a community with an MHI less than the State MHI is eligible for \$8M (or 50% of total project costs) in principal forgiveness and \$8M from the I-Bank at AAA Market Rate.

#### *\$10M in PF for Small System Lead Remediation*

The DEP has set-aside \$10M of the approximately \$116M to fund the installation of corrosion control treatment or lead service line replacement at water systems with a population  $\leq 1,000$  in priority ranked order. Any of the \$10M that has not been committed to eligible projects in FFY2020 will be rolled over for these systems in FFY2021. This includes small community water systems, such as mobile home parks, as well as eligible noncommunity water systems that may include schools and religious institutions. The challenges facing these systems differ from their larger counterparts. In many cases, these systems contain no lead service lines and must rely on the installation of corrosion control treatment to reduce lead in their drinking water from internal (premise) plumbing. Loans will be offered as 100% principal forgiveness capped at \$1 million per water system (PWSID)/per year. If any of the \$10M is remaining as of April 1, 2022 it will be made available as PF under the terms of the LSL replacement category as needed.

#### Criteria for receiving a Water bank loan for LSL replacement

The following criteria must be met for the project to be eligible for Water bank loans:

- Be able to document the presence of lead service lines and components through historic records that the lines to be replaced are lead. Acceptable records include information on the age of the houses and high probability of lead lines and components being present, line installation records, etc.
- Lead plumbing and components are defined as containing at least 90% or more lead by weight. This includes lead service lines, goosenecks, pigtails, and lead joints.
- Provide an LSL Replacement Plan and Capital Improvement Plan to establish a strategy for lead line replacement that complies with all federal and State requirements.
- Partial lead line replacements are not allowable.

#### Nano Loan Program

In FFY2021, systems serving 10,000 or fewer customers will continue to be funded in ranked order with the available \$4 million principal forgiveness, subject to any State and federal limitations. These loans consist of principal forgiveness financing for 50% of project costs and a loan with a Blended Interest Rate of 50% of I-Bank's AAA Market Interest Rate for 50% of project costs. Projects are capped at \$1 million. Additional financing is available at the applicable base rates for amounts

greater than the \$1 million cap. These projects are selected based on priority ranked order. In addition, the DEP intends to prioritize projects that have secured federal/non-profit grants to be leveraged with SRF funding.

### Small Water System Programs

\$2 million of SRF funds is being made available for programs directed to provide assistance to small systems.

#### Community Engineering Corps

DEP is partnering with the Community Engineering Corps to identify water systems that serve fewer than 500 persons and need assistance to come into compliance with federal and State drinking water regulations. 100% principal forgiveness loans will be available to those systems that are assisted by the Community Engineering Corps, with a cap of \$750,000 per project. The DEP will not charge permit fees to these small systems.

#### Engineering Contract

In 2021, the NJDEP and the New Jersey Water Association (NJWA) are establishing a new contract, funded through a DWSRF set-aside, to provide small water systems with engineering services needed to close on a Water Bank loan. Under the terms of this contract, NJWA partners the small water systems with engineering firms to complete project milestones, including permitting, submittal of the Environmental Decision Document (EDD) and loan closing to fund projects including treatment for contaminants such as PFNA, PFOA, and PFOS. When these projects are ready for financing, they will be ranked, and financed to the extent that the DEP can accommodate their loan requests.

In FFY2020, the \$2M in principal forgiveness was made available to small systems serving ≤1,000 that are funded through participation in the engineering contract. Loans were offered at 90% principal forgiveness and 10% funding from the I-Bank at Market Rate. However, due to their size and the many challenges encountered by these small systems, even a 10% share of the total project costs is more than many can afford. Further, the project cap of \$500,000 set in FFY2020 is often not enough to cover the needed repairs to return these systems to compliance. Therefore, DEP is proposing to modify the FFY2020 DWSRF IUP and set forth a new financing package that will also be available in FFY2021. Loans will be offered as 100% principal forgiveness, capped at \$750,000 per water system (PWSID)/per year. Systems serving above >1,000 that are provided with assistance through the engineering contract will be funded in priority ranked order and eligible for Nano funds based on availability.

### Financing Options

The NJ Water Bank offers the following low interest financing options for eligible projects.

#### Base DWSRF

At the time a project is at or near construction completion, long-term financing will be issued.

The Base DWSRF funding package for FFY2021 consists of loan funding with a blended interest rate of 50% of the I-Bank AAA Market Interest Rate for publicly owned water systems and loan funding with a blended interest rate of 75% of the I-Bank's AA Market Interest Rate for privately-owned water systems.

In addition to water system ownership (publicly-owned vs. privately-owned), water system loan rates will be determined based on affordability criteria as described in Appendix 1. The DEP determined that for the purposes of the DWSRF Program, a municipality whose median household income equal to or less than 65% of the State's MHI (New Jersey's MHI was \$68,911 as reported in the 2010 Census) is a Disadvantaged Community. The publicly-owned water systems serving these communities will receive a funding package with a Blended Interest Rate of 25% of I-Bank's AAA Market Interest Rate capped at \$10 million.

Project sponsors are only eligible for one enhanced subsidization rate (Nano, affordability) per capital project up to the specified project caps. The remainder of project costs are financed at the applicable base rate.

### Project Caps

Project applicants for privately owned water systems are capped at \$10 million per project. In addition, all project applicants for both privately and publicly owned systems are capped at \$25M per applicant per year. Project costs over the specified caps can be financed by the I-Bank as capacity allows. The DEP is maintaining a funding cap of \$25 million (per applicant/per year) for FFY2021 for publicly-owned and privately owned water systems to ensure that multiple high priority drinking water projects receive funding. The total project cost financed, including any portion of the project financed at the base rate and financed at an enhanced subsidization rate (Nano, affordability) may not exceed \$25 million.

The above project caps do not apply to lead service line replacement projects funded with principal forgiveness as a result of the Water Infrastructure Funding Transfer Act. Those projects are capped at \$2M, \$10M or \$20M (\$1M/\$5M/\$10M principal forgiveness) as described above with the remainder financed by the I-Bank as capacity allows.

The DEP is actively pursuing additional funding sources to address the increasing drinking water infrastructure financial needs and reserves the right to modify or waive the cap requirement.

### Drinking Water Financing Timeline

For the DWSRF FFY2021/SFY2022 program, funding decisions will be based on the DWSRF Project Priority List, as determined by the DWSRF Project Ranking methodology in Appendix 1. DEP will be determining financing availability and loan terms in priority ranked order based on available funds as follows:

- All projects that are in the fundable range as of the date of certification by DEP will be allowed to proceed to a short-term loan closing on a readiness to proceed basis. The Department establishes the fundable range by deducting and reserving estimated costs for projects listed in rank order on the current fiscal year Water Bank Project Priority List as amended until the available unobligated drinking water funds are exhausted. Note that the actual number of projects in the fundable range could expand or contract as loan construction bids are received, and total low bid allowable project costs are evaluated.
- The DEP will contact all projects within the fundable range as of January 1, 2022 asking to confirm readiness to proceed in FFY2021 or request to be bypassed to the next FFY. This will allow the DEP to extend the fundable range by allocating funds from bypassed projects to the next ranked project. Projects in the fundable range that do not receive Authorization to Award

by April 1, 2022 will be bypassed for the FFY2021 funding cycle and the fundable range will be extended accordingly.

**Planning and Design**

The Water Bank is currently offering 100% interest-free financing for up to two fiscal years for the planning and design phase of short-term loans which finance a project’s planning, engineering design, legal, and construction expenses. Planning and design include projects such as the development of asset management plans. Loans are given to projects ranked high enough to be within the fundable range with the expectation that such plans will result in an eligible capital improvement project.

**SAIL Program**

The Statewide Assistance Infrastructure Loan (SAIL) program is a disaster relief loan program designed for project sponsors that anticipate receiving FEMA or other federal disaster relief grants. The SAIL program’s goal is to provide timely and cost-effective funds, in advance of federal reimbursements, to expedite and support the impacted communities’ recovery and rebuilding of environmental infrastructure. SAIL finances projects within a declared disaster area to rebuild water systems directly impacted by a declared disaster as well as costs associated with improving the resiliency of Clean Water and Drinking Water systems, regardless of direct disaster impact.

**Short-Term Loans**

All projects are encouraged to secure short-term loans at the time of execution of an engineering design contract for the entirety of the project (planning, design, and construction). Funding will be committed upon certification of each operable segment and satisfaction of the program’s credit worthiness standards. Such loans are currently at 0% interest for terms of up to 5 full fiscal years.

**Establishment of Long-Term Loan Financing Terms**

At the time a project is at or near construction completion, long-term financing will be issued. For construction loans issued upon certification of engineering contracts, long-term financing terms are established consistent with the IUP operative at the time of certification of the construction contract. For construction loans issued at the time of certification of construction contracts, long-term financing terms are established consistent with the IUP operative at the time of construction loan closing. For applicants financing the cost of construction through non-Water Bank sources or self-funding, long-term financing terms are established consistent with the IUP operative at the time of the long-term loan closing.

Long-term loan terms are established in accordance with the following criteria:

**For Projects financed through a Water Bank Construction (Short-term) loan:**

<b>Loan Issued Upon</b>	<b>Applicable Financing Term Year</b>
Certification of engineering contract	Date of certification of construction contract*
Certification of construction contract	Date of construction loan closing

\*If a project has multiple operable segments, various financing year terms may apply to a single project loan which are set at the time of each contract certification.

Applicants financing the cost of construction through non-Water Bank sources or self-funding, long-term financing terms apply at the time of long-term loan closing.

## SUMMARY OF FFY2021 FUNDING PACKAGES (LONG-TERM LOANS)

**Table 1: Long-Term 30 Year Funding Packages Breakdown – Drinking Water**

<b>Drinking Water</b>	<b>Blended Interest Rate I-Bank Market Rate for Non- Principal Forgiveness Share of Loan<sup>1</sup></b>	<b>Principal Forgiveness Share</b>	<b>Funding Cap</b>
Base DWSRF – Public	50%	0%	\$25 million <sup>2</sup> (remainder at I-Bank market rate as capacity allows)
Base DWSRF – Investor-owned	75%	0%	\$25 million <sup>2</sup> (\$10 million per project) (remainder at I-Bank market rate as capacity allows)
Nano ≤ 10,000 customers	50%	50%	\$1 million (remainder at base)
Affordability (publicly-owned water systems only) <sup>3</sup>	25%	0%	\$10 million (Remainder at base)
Small Systems (≤1,000): Engineering Contract <sup>4</sup>	N/A	100%	\$750,000 (Remainder at base)
Small Systems (≤500): Community Engineering Corp	N/A	100%	\$750,000 (Remainder at base)

Example: A \$50M project submitted by a publicly owned water system, is eligible for \$25M funding at a Blended Interest Rate of 50% of I-Bank’s AAA Market Interest Rate. The remaining \$25M is eligible for funding by the I-Bank at AAA Market Rate as capacity allows.

<sup>1</sup> 25% of I-Bank’s AAA Market Interest Rate means an effective interest rate no greater than would have resulted from financing with a 25% share of I-Bank’s AAA bond funds at market interest rates and a 75% share of the Department interest-free loan funds.

<sup>2</sup> The total project cost for funding (excluding lead service line replacement projects eligible for principal forgiveness) may not exceed \$25M per applicant per year and includes the cost of funded at the base rate as well as the cost financed at an enhanced subsidization rate (Nano, affordability).

<sup>3</sup> Systems serving municipalities with MHI ≤ 65% State MHI (2010 census).

<sup>4</sup> For eligible systems with a population less than or equal to 1,000 that are funded through the engineering contract.

**Table 2: Lead Remediation Principal Forgiveness Packages Breakdown**

<b>Drinking Water</b>	<b>I-Bank Market Rate**</b>	<b>Principal Forgiveness</b>	<b>Total Project Costs</b>
Lead Line Replacement <sup>5</sup>	50%	50% of project costs up to:	
>5,000 known lead service lines	50%	\$10M	\$20M
≥ 1,000 and ≤ 5,000 known lead service lines	50%	\$5M	\$10M
< 1,000 known lead service lines	50%	\$1M	\$2M
Lead Remediation <sup>6</sup>	0%	100% project costs up to \$1M	\$1M

Examples: A \$30M project submitted by a water system with >5,000 lead service lines, is capped at \$10M in principal forgiveness and \$10M by the I-Bank at the AAA Market Rate. The remaining \$10M is eligible for funding by the I-Bank at AAA Market Rate as capacity allows.

A \$16M project submitted by a water system with >5,000 lead service lines is eligible for \$8M (or 50% of total project costs) in principal forgiveness and \$8M from the I-Bank at AAA Market Rate.

<sup>5</sup> Publicly-owned and privately-owned water systems are eligible to receive principal forgiveness for lead line replacement funding in communities with an MHI less than the MHI for the State. These projects are funded in project priority order according to ranking assigned by the priority ranking system (see Appendix 1). PF Funding is capped per applicant/year based on the number of known lead service lines.

<sup>6</sup> Small systems with a population less than or equal to 1,000 are eligible to receive principal forgiveness for corrosion control treatment and lead line replacement in communities with an MHI less than the MHI for the State.

## Noteworthy Program Features

### Application

All applications are submitted on the H2LOans website ([h2loans.com](http://h2loans.com)). For security reasons, the project sponsor's authorized official will need to call the Water Bank at 609-219-8601 to create an H2LOans account. The authorized official can then designate a project manager (authorized representative) to submit required information. Application deadlines have been removed and rolling applications are being accepted any time of the year.

[H2LOans Tutorial Video \(https://www.youtube.com/watch?v=UgDDV\\_SyqL0\)](https://www.youtube.com/watch?v=UgDDV_SyqL0)

### Loan Awards

Loan awards for new projects will be made in FFY2020/SFY2021 in accordance with [N.J.A.C. 7:22-3, 4, and 5.9 \(http://www.nj.gov/dep/dwq/722.htm\)](#). The loan term for DWSRF projects will be up to 30 years but cannot exceed the useful life of the project.

Local government units are required to meet the technical, administrative, and environmental provisions of the rules of DEP and the Water Bank ([N.J.A.C. 7:22-3, 4, 5, 8, 9, and 10 http://www.nj.gov/dep/dwq/722.htm](#)). Disbursement and loan repayment provisions must be consistent with the rules.

### Pre-award Approvals/Emergency Projects

Eligible projects can qualify to receive pre-award approvals if the requirements of the rules ([N.J.A.C. 7:22-3.32 and 4.32 http://www.nj.gov/dep/dwq/722.htm](#)) are met and if executed contracts to implement the project have been received by DEP.

Only projects satisfying the following three criteria are eligible to qualify for emergency funds: (i) the project will repair the actual or impending failure of one or more components of a drinking water or wastewater system caused by structural or mechanical failure, sabotage or act of God; (ii) the actual or impending failure of the system could not have reasonably been foreseen; and (iii) the project is necessary and limited to correct the failure of an essential portion of the environmental infrastructure system to restore service (cumulatively hereafter referred to as "Corrective Action").

### DEP & I-Bank Fee

In accordance with the USEPA Policy on Fees Charged on Assistance Provided Under the SRF Programs, states must disclose information regarding the assessment and use of any fees associated with SRF activities that are passed on to the program participants. In New Jersey, DEP reserves 4% of the annual SRF capitalization grant to cover a portion of the administrative costs of administering the program. In addition, the annual legislation for the SFY2006 Program established a "Department Loan Origination Fund" that is administered by the Water Bank. The DEP now has a stable fixed fee of 2% of the participant's loan amount. No SRF funding is involved in DEP's loan origination fee. DEP's loan origination fee is not included in the principal amount of the CWSRF and DWSRF loan and is separately accounted for.

The I-Bank's loan is issued at the same market interest rate as the I-Bank obtains from the sale of its bonds. Rather than bonding for all the eligible closing costs associated with each financing, the I-Bank charges the borrowers a one-time charge of 0.1% of the principal I-Bank loan amount to partially cover the costs associated with that particular series' bond issuance expenses. These costs include such activities as: bond

counsel, financial advisor, rating agencies, printing and publishing of the Notice of Sale, the Preliminary Official Statement, the Official Statement, and other costs related to the Water Bank 's bond sale. In addition, the I-Bank has evaluated its existing fee structure and is returning to an annual administrative fee of 0.15% of the total original project loan amount to cover the balance of the closing cost and the annual operating expenses associated with the operations of the I-Bank and the on-going costs associated with the loan servicer and Trustees. The I-Bank 's annual administrative fee is not included in the principal amount of the loan and is held in an account outside of the SRF. Changes to the Water Bank 's fee annual structure is subject to all applicable approvals and publication in the SFY2022 Financial Plan in May of 2021.

### Sources and Use of Funds

The Table below represents estimated amounts available from prior program years and anticipated uses for the FFY2021/SFY2022 Drinking Water Environmental Infrastructure Financing Program:

#### **UPDATED ESTIMATES FOR DRINKING WATER PROGRAM ONLY:**

##### **FFY2021/SFY2022 Financing Program\***

##### **Anticipated Sources:**

Funds Available from prior years (Carryover WIFTA)	\$30 M
Repayments from prior years' loans	\$ 38 M
FFY2020 DW SRF Grant	\$ 16 M
<u>CW to DW Transfer (yearly allotment)</u>	<u>\$ 6 M</u>
Subtotal	\$ 90 M
Anticipated I-Bank Share (est. 50%)	\$ 90 M

**Total Program Sources: \$ 180 M**

##### **Anticipated Additional FFY2021/SFY2022 Sources:**

Carryover SFY2021 I-Bank Appropriation Share**	\$55 M
--	--------

**Total ALL Program Sources for FFY2021/SFY2022: \$ 235 M**

\* Current DWSRF obligations and project applications exceed this amount.

\*\* In SFY2021, \$50M was allocated from the State budget to fund drinking water projects. The leveraged \$25M I-Bank appropriation share is approximately \$110M. The NJDEP estimates that about 50% will be carried over into SFY2022. Therefore, the total of all program sources for SFY2022 is likely to be \$235M.

### Financial Relationships between the CWSRF and the DWSRF

The federal Safe Drinking Water Act Amendments of 1996 offer states the flexibility to meet the funding needs for drinking water and wastewater facilities by transferring funds from one SRF program to the other. Annually, an amount up to 33% of the DWSRF Capitalization Grant may be transferred from the CWSRF program to the DWSRF program, or vice versa. The EPA has issued guidance that would allow utilization of transfer credits and transfer of funds on a net basis (i.e., funds could be moved in both directions), provided that the final transferred amount does not exceed the authorized ceiling. Additionally, The Water Infrastructure Funding Transfer Act allows the State to transfer up to 5% of the cumulative

clean water revolving fund to the drinking water revolving fund to provide additional subsidy to eligible recipients for projects that abate exposure to lead in drinking water.

The SRF program evaluates funds available to determine if adequate monies are available to be used for clean water projects in the current fiscal year. In addition, the type and number of DWSRF projects are reviewed and a determination is made on the need of the funds to be transferred from the CWSRF accounts to the DWSRF accounts or vice-versa. DEP reserves the right to transfer funds from the CWSRF to the DWSRF (or vice-versa) each fiscal year to the extent allowed by law, including Sandy SRF funds.

While all projects that meet the program requirements and are ready to proceed have been able to receive a CWSRF or DWSRF loan in the past, the ability of the programs to finance all qualifying projects in the future is uncertain because of reduced federal funding levels and the increase in the demand for the limited DWSRF funds.

In addition to the potential transfer of funds between the CWSRF and DWSRF, DEP is continuing its policy to cross-collateralize the DWSRF with the CWSRF. This feature results in significant savings to project sponsors and benefits the drinking water project sponsors since there is a large source of revenue available via the CWSRF repayments to cover possible loan defaults. Under the EPA-approved procedures associated with cross-collateralization, a temporary transfer of funds between the two SRFs may occur if necessary, to cover the default of a loan repayment or other financial obligation. DEP and the I-Bank would take steps to collect any obligations resulting from a loan default and reimburse the appropriate drinking water or clean water account.

### Additional SRF Provisions:

Programmatic requirements are listed below. It is anticipated that these provisions will be maintained in a subsequent federal reauthorization act or federal policy. If substantial changes in the Act necessitate DEP's revision of the SFY2022 document, additional public participation efforts will be conducted.

1. The schedule of state capitalization grant payments, jointly agreed upon by the administrator of the EPA and each state, is based upon the state's IUP.
2. States are required to deposit in the SRF, from state monies, an amount equal to at least 20% of the total amount of all capitalization grants made to the state.
3. Monies in the DWSRF may be used to provide loans at or below market interest rate, for terms not greater than 30 years or the useful life, whichever is less. Repayments must begin no later than one year after completion of the project and must be credited to the SRF (principal and interest). The recipient of a loan must establish a dedicated source of repayments.

Section 1452 of the federal SDWA authorizes the states to provide funding for certain non-project activities, as long as the amounts do not exceed ceilings specified in the statute. The non-project set-asides provide for DWSRF activities that are not construction related and include administration of the DWSRF, technical assistance for small systems, state public water system supervision (PWSS) programs, source water program administration, capacity development, and operator certification. Each state must have a capacity development and operator program, or EPA may withhold up to 20% of the annual capitalization grant.

The DEP finalized a workplan for the FFY2020/SFY2021 non-project set-asides which was submitted to USEPA on June 29, 2020 and distributed to community and nonprofit noncommunity water systems and other stakeholders. This final workplan is a requirement for the FFY2020 Capitalization Grant. The DEP was awarded the Capitalization Grant in May 2020.

The Table below represents the amounts of the available sources and anticipated uses for certain non-project activities:

<u><i>Funds Available</i></u>	<u><i>FFY 2020</i></u>
Federal Capitalization Grant	\$ 18,792,000.00
State Match	
20%	\$ 3,758,000.00
<b>Projected Expenditures</b>	
Administration (net position)	\$ 1,017,182.00
Non-project Set-asides	\$ 1,767,200.00
Small System Tech Assistance (2%)	\$ 375,840.00

# APPENDIX 1: DRINKING WATER PROJECT RANKING

## METHODOLOGY

Table 1 of Category A lists the types of projects eligible for DWSRF funding. A project must be assigned points from Category A to be eligible for ranking; points assigned from the remaining categories are in addition to the points received in Category A. Priority points are assigned only if the project scope includes actual repair, rehabilitation, or correction of a problem or improvement clearly related to priority Category A. Projects that include multiple elements, as listed in priority Category A, receive priority points for the highest rated element in that category. Individual projects cannot receive points in Category A for multiple elements. Projects for the same water system involving multiple elements with unrelated scopes are separated and priority points assigned accordingly for each project.

DEP assigns points to each project using the Project Priority System and ranks all eligible projects according to the total number of points each project receives. All projects are subsequently placed on the Project Priority Comprehensive List according to their ranking. Projects with more points are ranked above those with fewer points. The addition of new projects to the Project Priority Comprehensive List, periodic revisions to the Priority System, or the identification of new information regarding a project, may result in changes to an individual project ranking.

The principal elements of the Priority System are: A) Compliance and Public Health Criteria, B) Water Supply Plans/Studies, C) State Designations, D) Affordability, and E) Population. Points are assigned for each of the five priority categories and are discussed in more detail below.

The order of project priority for funding is as follows:

1. Emergency Projects are considered a public health hazard and receive funding over other projects on the Comprehensive Priority List;
2. Surface Water Treatment Rule violations including uncovered finished water reservoirs;
3. MCL and Lead Action Level Exceedances;
4. Lead Service Line replacements in communities with an MHI less than the MHI for the State for water systems without a Lead Action Level Exceedance;
5. Unregulated contaminants (contaminants of emerging concerns);
6. Small Systems serving less than 10,000 persons, up to 15 % of DWSRF Funds;
7. Corrosion control and lead service line replacement in communities serving a population  $\leq 1,000$  that have an MHI less than the MHI for the State;
8. Projects that have secured federal/non-profit grants to be leveraged with SRF funding,
9. Other projects currently on the comprehensive list.

The prospective applicant must notify DEP of any changes to project scope or any other circumstance that may affect the calculation of priority points. DEP recalculates, if appropriate, the prospective applicant's ranking utilizing the new information submitted and revises the priority ranking accordingly.

Points are assigned for each of the five priority categories discussed below, as applicable.

### Category A. Compliance with the SDWA and Protection of Public Health

DWSRF funds are used to address contamination problems and to ensure compliance with the SDWA requirements. Priority is given to water systems in non-compliance with the surface water treatment

requirements and those incurring acute primary maximum contaminant level (MCL) violations, or action level exceedances as defined in the National Primary Drinking Water Regulations and the New Jersey Safe Drinking Water Regulations (N.J.A.C. 7:10). Table 1 describes the project elements that are eligible for DWSRF funds:

TABLE 1. Project Elements Eligible for  
Project Priority Ranking in the Drinking Water State Revolving Fund Program<sup>7</sup>

1.	Systems that use surface water that are not in compliance with the surface water treatment technique requirements or have had any acute violations (either <i>E. coli</i> or nitrates) and have been issued an administrative order or directive by DEP requiring the correction of any noncompliance of its treatment facilities to address an immediate public health threat.	500 Points
2.	Systems that use groundwater under the direct influence of surface water, that are not in compliance with the surface water treatment technique requirements or have had any acute violations (either <i>E. coli</i> or nitrates) and have been issued an administrative order or directive by DEP requiring the correction of any noncompliance of its treatment facilities to address an immediate public health threat.	350 Points
3.	Systems that use groundwater that have had any acute violation (either <i>E. coli</i> or nitrates).	300 Points
4.	Systems that have had, or DEP reasonably expects to have, any primary maximum contaminant level (MCL) violations (except acute violations) or exceedance of action levels (Lead and Copper Rule). <sup>8</sup>	250 Points
5.	Systems that have, or DEP reasonably expects to have, exceeded a groundwater quality criterion, guidance, or advisory as deemed applicable by the DEP.	200 points
6.	Systems that were classified as vulnerable, because of a 2007 DEP Interconnection Study.	200 Points
7.	Systems that have been issued a notice of noncompliance by DEP for reasons other than water quality; i.e. inadequate storage, inadequate source, lack of emergency power, etc.	175 Points
8.	Purchase and/or consolidation of a water system to comply with the SDWA for capacity development.	170 Points

---

<sup>7</sup> A project must be assigned points from Category A to be eligible for Project Priority List ranking; points assigned from Categories B through E supplement the points received in Category A.

<sup>8</sup> Systems with an ALE are eligible to receive the 250 points provided the system has an open violation with additional requirements to complete in order to return to compliance under the Federal rules.

9. Systems that are proposing improvements for drought or other related water supply management initiatives, as identified or designated by the State. 160 Points
10. Systems that have lost well capacity due to saltwater intrusion and a solution is needed to preserve the aquifer as a viable aquifer. 150 Points
11. Extension of water mains, including associated appurtenances and water system facilities, to private wells that have had any maximum contaminant level exceedances or have exceeded lead and copper action levels. 125 Points
12. Systems without a lead action level exceedance that: 1) are replacing known lead service lines in communities with an MHI less than the MHI for the State; and 2) are certified for principal forgiveness available as a result of the Water Transfer Funding Act. 125 Points
13. Existing treatment facilities that need to be rehabilitated, replaced, or repaired to ensure compliance with the SDWA. 100 Points
14. Existing transmission or distribution mains with appurtenances that need to be rehabilitated, replaced, repaired or looped to prevent contamination caused by leaks or breaks in the pipe or improve water pressures to maintain safe levels or to ensure compliance with the SDWA. 75 Points
15. Existing pump stations or finished water storage facilities that need to be rehabilitated or replaced to maintain compliance with the SDWA. 60 Points
16. New finished water storage facilities or pump stations that are needed to maintain pressure in the system and/or prevent contamination. 50 Points
17. Addition or enhancement of security measures at drinking water facilities, including but not limited to fencing, lighting, motion detectors, cameras, secure doors and locks, and auxiliary power sources. 45 Points
18. Green Infrastructure: renewable energy generation such as solar panels, hydroelectric, geothermal or wind turbines or infrastructure built at the water system facilities such as green roofs, porous pavement, bioretention or grey water reuse. 45 Points
19. Systems which have had any exceedance of any secondary drinking water regulations that have received notification issued by DEP that exceedance of a secondary drinking water regulation causes adverse effects on the public welfare, and for which the system has received a directive issued by the DEP requiring correction of the exceedance. 40 Points
20. Installation of new water meters and/or other water conservation devices, including but not limited to retrofit plumbing fixtures. 35 Points
21. Construction of new or rehabilitation of existing interconnections between water systems to improve water pressures to maintain safe levels, promote

availability of alternative source of supply, or to ensure compliance with the SDWA.

- |     |  |           |
|-----|--|-----------|
| 22. | Replacement of water meters.   | 25 Points |
| 23. | Redevelop wells, construct new wells, or construct or rehabilitate surface water sources with associated treatment facilities to meet the New Jersey SDWA rules for required pumping capacity. | 15 Points |
| 24. | Other project elements, not including items 1 through 21 above, that ensure compliance with the SDWA and protect public health, as approved by DEP.  | 1 Point   |

#### Category B. Water Supply Plans/Studies

Planning water system improvements that advance comprehensive water supply concepts can facilitate cost effective drinking water system rehabilitation. To provide an incentive for appropriate planning, 50 points are given if the project is clearly identified in other appropriate plans (i.e. five-year master plan, five-year capital improvement plan, rate setting study or comprehensive water supply plan for a particular region or watershed) approved by a municipal or State agency (such as DEP, the New Jersey Department of Community Affairs or the New Jersey Board of Public Utilities) within the last five years.

Thirty-five (35) points are given to each project that demonstrates that its water system structurally inspects its finished storage facilities every five years. Also, 25 points are given for a system that has a valve exercise program. Documentation must be provided to receive the above-mentioned points.

Please note that having an Asset Management Plan is now a requirement for project sponsors seeking a DWSRF loan.

#### Category C. State Designations

##### 1. State Plan

DEP assigns points to projects in municipalities that the State Planning Commission has approved under the Plan Endorsement or Center Designation Process. Please note that if a local entity has not received designation by the State Planning Commission, projects within that entity would receive zero points for this element.

- a. Projects located predominantly within or designed to provide service to a designated growth area that lies within a municipality that has received Plan Endorsement of its Master Plan from the New Jersey State Planning Commission or is an Urban Center or Urban Complex are eligible for 20 points.
- b. Projects located predominantly within or designed to provide service to a designated growth area that lies within a municipality that are identified in the Master Plan currently recognized as endorsed by the New Jersey State Planning Commission as a designated center other than an Urban Center (Regional Center, Town, Village, Hamlet) are eligible for 15 points.

For a current list of those local governments that have gained Plan Endorsement from the New Jersey State Planning Commission, please check the Office for Planning Advocacy at the Department of State website at <http://www.nj.gov/state/planning/plan.html> and then refer to the current State Plan Policy Map to determine if the project area lies within a designated growth area.

Contact the Office for Planning Advocacy, Department of State, P.O. Box 820, Trenton, N.J. 08625-0820 or call (609) 292-7156 for further information on the State Development and Redevelopment Plan.

2. Transit Village Initiative

The New Jersey Department of Transportation (NJDOT) participated in a multi-agency Smart Growth partnership known as the Transit Village Initiative. The Transit Village Initiative helps to redevelop and revitalize communities around transit facilities to make them an appealing choice for people to live, work and play, thereby reducing reliance on the automobile. The Transit Village Initiative is an excellent model for Smart Growth because it encourages investment in portions of New Jersey where infrastructure and public transit already exist. Aside from Smart Growth community revitalization, two other goals of the Transit Village Initiative are to reduce traffic congestion and improve air quality by increasing transit ridership. Therefore, DEP will provide five additional priority points to any project sponsored by a Transit Village community or to any project that is constructed within a Transit Village community. For more information about Transit Villages, please see <http://www.nj.gov/transportation/community/village/> and for a list of Transit Villages, please see <http://www.nj.gov/transportation/community/village/faq.shtm>.

3. Brownfield Development Area (BDA)

DEP sponsors a program to promote the re-use of formerly contaminated sites. DEP's Brownfield Program, spearheaded by the Office of Brownfield Reuse, serves as a vital component of the state's Smart Growth efforts to stem the tide of sprawl and channel new development into cities and towns. Under the innovative Brownfield Development Area (BDA) approach, DEP works with selected communities affected by multiple brownfield sites to design and implement plans for these properties simultaneously, so remediation and reuse can occur in a coordinated fashion. The DWSRF supports this initiative by providing five additional priority points to any project serving a BDA. For more information about Brownfield Development Area Initiative, please see <http://www.nj.gov/dep/srp/brownfields/bda>.

4. Green Project Reserve (GPR)

DEP promotes green infrastructure, water and energy efficiency, and environmental innovation in its water improvement projects. Therefore, DEP provides 15 additional priority points to any project that is a categorically eligible project.

Please note that the points from these four items of Category C can be cumulative. Please note for water systems that service more than one municipality; the municipality that has the highest population served will be counted for this category.

Category D. Affordability

The purpose of the affordability criteria is to determine which project sponsors' water systems are eligible for additional points under the Affordability Category.

Affordability is the degree of need for financial assistance based upon the New Jersey median household income compared to the municipal median household income (MHI). Affordability is determined by the following formula:

$$(\text{Municipal MHI} / \text{Statewide MHI}) \times 100 = \text{Affordability Factor}$$

Points are assigned as shown in Table 2.

TABLE 2. Point values assigned based on Affordability Factor calculation

1. Affordability factor of 100 or greater	0 Points
2. Affordability factor from 85 through 99	15 Points
3. Affordability factor from 66 through 84	30 Points
4. Affordability factor less than or equal to 65	80 Points

The median household income of the municipality which the water system serves and the statewide median household income will be determined from income data in the most recent United States Census, which is currently the 2010 Census.

DEP determined that for the purposes of the DWSRF Program, a municipality whose median household income is 35 % or more below the State’s MHI is considered a Disadvantaged Community and receives 80 priority points which is proportionately greater than the other affordability factor points. (New Jersey’s MHI is \$68,911 as reported in the 2010 Census.)

A weighted MHI is calculated for a project sponsor whose water system serves more than one municipality, as shown in the example below. Population served is based on the permanent population of the water system service area.

Example:

Municipalities Served	MHI	Populations Served	Fraction of total population served	Weighted municipal MHI
Lancaster	30,000	5,000	0.167	5,000
Mayberry	20,000	10,000	0.333	6,660
Holmeville	25,000	15,000	0.500	12,500
<b>Total</b>		<b>30,000</b>	<b>1.00</b>	<b>24,160</b>

Please note for water systems that service more than 10 municipalities, the 10 municipalities that have the highest populations served will be considered in the above table for the affordability factor.

### Category E. Population

As a tiebreaker, projects are assigned points based on the permanent population of the water system service area. For a resort community where the summer and winter populations vary greatly, the permanent population will be calculated by taking the sum of twice the winter population and once the summer population and dividing by three (see below). For water systems that service more than one municipality, a total of all the permanent population served in the multiple service areas is used. Priority points are calculated as the permanent population served by the water system divided by 100,000, expressed as a decimal. In the event that projects remain tied, the project which serves a greater proportionate population in the water system's area is given higher priority.

Population served for resort communities will be calculated by the following equation:

$$[(2 \times \text{Winter Population}) + \text{Summer Population}] / 3 = \text{Weighted Permanent Population}$$

## APPENDIX 2

### STATE OF NEW JERSEY PROPOSED FEDERAL FISCAL YEAR 2021 AND STATE FISCAL YEAR 2022 PROJECT PRIORITY LIST

Rank	Project Sponsor	Project Number	Project Name	Population	Building Cost	Support Cost	Total Project Cost	Cat A	Cat B	Cat C.a	Cat C.b	Cat C.c	Cat C.d	Cat D	Cat E	Total Points
1	Newark City	<a href="#">0714001-012</a>	Construction of a cover for the Cedar Grove Reservoir	285,000	\$50,000,000	\$12,730,000	\$62,730,000	500	50	20	0	0	0	80	2.85	652.85
2	Passaic Valley Water Commission	<a href="#">1605002-024</a>	Installation of a 2.0 MG storage tank next to existing Verona storage tank	347,052	\$2,970,000	\$1,566,800	\$4,536,800	500	0	20	0	0	0	80	3.47	603.47
4	Passaic Valley Water Commission	<a href="#">1605002-014</a>	Levine Reservoir Water Storage Improvements - Phase 1	314,900	\$17,142,000	\$5,186,920	\$22,328,920	500	0	20	0	0	0	80	3.15	603.15
5	Newark City	<a href="#">0714001-020</a>	Phase-2 Lead Service Line Replacement (LSLR) Project	280,139	\$12,989,172	\$418,386	\$15,693,186	250	50	20	0	5	0	80	2.9	407.9
6	Trenton City	<a href="#">1111001-011</a>	Lead Service line replacement	391,000	\$13,000,000	\$2,900,000	\$15,900,000	250	50	15	0	5	0	80	3.91	403.91
7	Newark City	<a href="#">0714001-019</a>	Phase-1 Lead Service Line Replacement (LSLR) Project	280,139	\$6,000,000	\$1,528,353	\$7,528,353	250	50	15	0	5	0	80	2.8	402.8
9	Hopatcong Borough	<a href="#">1912001-009</a>	Installation of 48-inch pipe at wells to increase chlorine contact time at nine wells	7,900	\$750,000	\$525,000	\$1,275,000	350	0	15	0	0	0	0	0.08	365.08
10	Newark City	<a href="#">0714001-021</a>	Phase 3-10 Lead Service Line Replacement (LSLR) Project	280,000	\$120,000,000	\$100,000	\$144,929,550	250	0	20	0	5	0	80	2.94	357.94
