¹ Federal and State water systems have been removed, as they are not eligible for DWSRF.
² The weighted Median Household Income (MHI) for PWSID systems were calculated by adjusting the MHI of each municipality according to the proportion of the total system population that it serves and summing the weighted MHI's of all municipalities for each PSWSID system. For smaller water systems, where the service areas do not encompass entire municipalities, the MHI can be assessed using finer geographic scales, such as blocks or census tracts, to more accurately determine eligibility for disadvantaged status.
