REVISION TO THE MERCER COUNTY WATER QUALITY MANAGEMENT
PLAN

TAKE NOTICE THAT ON DEC 01 1995, pursuant to the provisions of the Water Quality Management Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning Rules, N.J.A.C. 7:15-3.5 and 4.2(a)2, a revision to the Mercer County Water Quality Management Plan was adopted by the Department. This revision modifies the East Windsor Township Wastewater Management Plan by removing the Danser property located at Block 25, Lot 8, and the Rebh property located at Block 25, Lot 20, from the future sewer service area of the East Windsor Township Municipal Utilities Authority. Both single family homes are experiencing failing individual subsurface sewage disposal systems. The two single family homes will now be identified within the Borough of Hightstown sewer service area. The total projected wastewater planning flow will be 600 gallons per day to the Borough of Hightstown sewage treatment plant. The Borough of Hightstown sewage treatment plant discharges into Rocky Brook (NJPDES #NJ0029475) which is classified as a Freshwater 2 Non-Trout stream.
