OFFICE OF LAND AND WATER PLANNING

REVISION TO THE UPPER RARITAN WATER QUALITY MANAGEMENT PLAN

TAKE NOTICE that on **JUL 11 1994**, pursuant to the provisions of the Water Quality Planning Act, N.J.S.A.. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules, N.J.A.C.. 7:15-3.5, a revision to the Upper Raritan Water Quality Management Plan was adopted by the Department. This revision corrects Plates 5 and 6 of the Mount Arlington Borough Wastewater Management Plan (WMP) to include all portions of Block 61, Lots 23.07, 23.10, 23.11, and 23.12 as within the sewer service area of the Arlington Hills Sewerage Company sewage treatment plant (STP). These areas are part of the Seasons Glen of Mount Arlington (formerly Hills of Arlington) Planned Unit Development project described in the Mount Arlington WMP. Portions of these lots were mistakenly excluded from the service area in the original WMP mapping. This revision also adjusts the total number of residential units for this development to 591 units. However, based on current actual flows to the Arlington Hills Sewerage Company STP, no change in projected wastewater flow above that specified in the WMP (158,405 gpd) is provided for by this revision.
