

Email Subject: NJDEP Stakeholder Meeting: Stormwater Management Rules

Dear Stakeholder,

As a follow-up to the Department of Environmental Protection's request for ideas on potential amendments to the Stormwater Management Program (sent on September 5, 2018), the Department will conduct the fourth stakeholder meeting to discuss the ideas that we have received.

As you may be aware, several subgroups were formed around suggested ideas that were discussed but could not be fully explored at the previous larger stakeholder meetings. The subgroups discussed the following topics: climate change, nonstructural stormwater management techniques, nutrient removal, TMDLs, and improving maintenance. During this upcoming meeting, subgroups will present their suggested ideas to address stakeholder concerns with these topics for discussion with the full stakeholder group.

You (or a designee) are cordially invited to attend this meeting. It will be held on September 26th from 1:00 pm – 4:00 pm at the United States Geological Survey New Jersey Water Science Center, located at 3450 Princeton Pike, Suite 110 Lawrenceville, New Jersey 08648.

Please RSVP to Gabriel.Mahon@dep.nj.gov if you plan to attend.

As with the previous meetings, we will email the final agenda to the registered attendees prior to the meeting.

This invitation has been extended to a large group of stakeholders. In order to ensure sufficient seating for all attendees, please submit a list of all attendees from your organization with your RSVP. If the number of attendees exceeds the capacity of the room, organizations with large numbers of attendees may be asked to reduce their number of attendees.

Thank you!
